READ—

Annual Report on Education in Mysore for the year 1877—78.

No. 7348—EDL. 1056, DATED BANGALORE, 10TH DECEMBER 1878.

ORDER THEREON.—The Director of Public Instruction chronicles with very natural regret the fact that this year for the first time a decrease in the number of pupils under instruction has occurred. Mr. Gordon is well assured that this was quite unavoidable and reflects no discredit on the Department. Society was so unhinged that the impossibility in many cases of continuing instruction to the children of a starving peasantry was but natural, and it is a hopeful sign that in such a year the Government and aided schools have actually increased, and more girls have received instruction than before.

2. With private unaided schools the hardships of the times have told still more severely having caused a marked diminution in the number of schools as well as pupils. There are now 652 schools with 8,815 pupils, whereas in the year previous these private schools numbered 935 and educated 13,165 pupils.

3. The Government and aided schools are thus classified:—

Class of Schools.	Government.		Aided.	
	Schools.	Pupils.	Schools.	Pupils.
College and Collegiate Schools	3	958	1	136
Boys' Schools, Higher	5	449	5	1,151
Midlle	44	3,261	34	2,175
Lower	728	19,742	47	2,383
Girls' Schools, Higher	...	...	4	547
Middle	...	...	10	722
Lower	11	468	25	1,734
Normal Schools	4	81	...	...
Special Schools	5	822	2	168
Total.....	800	25,781	128	9,016

4. In all there are in Mysore 1,580 schools of all classes educating 39,379 boys, and 4,233 girls. The increase in 1877—78, where such has occurred, has been in the direction of primary education.

5. *Inspection.*—The work of inspection was seriously retarded both by absence on sick leave of the Inspectors and by one, Mr. Hodson, being detailed for famine duty. It is intended to reorganize the inspecting agency entirely in a way which, it is anticipated, will by increasing the number of Inspectors facilitate more frequent and thorough inspection of all schools, while the cost of the agency will not be increased.

6. *Financial Statistics.*—The Government expenditure of the year was as follows:—

	Rs.
Direction..	15,698
Inspection	28,090
Instruction (including all other charges)	2,96,877
Total	3,40,665

This is an increase of Rs. 6,702 on the previous year, an increase which falls wholly under the third head. The charges for direction and inspection were 4·61 per cent and 8·24 per cent of the whole expenditure respectively.

7. Private expenditure, especially in unaided schools, has fallen off so that the total expenditure on education is Rs. 4,44,809 contrasted with Rs. 4,53,353 in the previous year.

8. Government receipts have been adversely affected, and aggregate Rs. 95,288. The net cost to Government for education has thus been Rs. 2,45,377, an increase over the previous year's amount by Rs. 21,131.

9. The expenditure on different grades of Government schools is shewn to have been as follows:—

	Rs.
College and Collegiate Schools	40,937
Higher Class Schools	15,418
Middle ,,	32,159
Lower ,,	1,10,745
Girls' Schools	4,153
Normal Schools	7,559
Special ,,	11,349

10. Grants-in-aid were 18 per cent of the Government expenditure on instruction, and the expenditure on lower class schools has been increased. The Chief Commissioner considers that the greatest good can be done by a judicious extension of grants-in-aid and the development of the system of lower class schools.

11. *University.*—The results attained at the University examinations are fairly good and call for no comment beyond noticing with pleasure that in Miss Gow the Mysore Province has sent up the first successful female candidate to the Matriculation examination.

12. *College and Collegiate Schools.*—The falling off in the attendance at the Bangalore Central College is ascribed to the famine and to the change in school hours. The latter probably worked most strongly, for Bishop Cotton's School has improved in its numbers and the change in the Government institution has prevented employed-lads from attending. Without employment they cannot afford to attend, and the Director of Public Instruction recommends Government scholarships as a remedy for decreasing numbers in the higher college classes. Scholarships judiciously bestowed on exceptionally meritorious boys in poor circumstances are quite legitimate and productive of good, but the Chief Commissioner would hesitate to provide scholarships merely for the purpose of securing larger attendance in the higher classes.

13. *Higher Class Schools.*—The school at Túmkúr appears to have stood the trials of the past year better than any other, notwithstanding that Túmkúr was more severely affected than any other Districts; while Hassan and Chikmagalur situated more on the verges of distress suffered the greatest losses. It is, however, no doubt the case that disease was exceptionally rife, and mortality exceptionally great in those towns. With more favorable times these schools will recover their former prosperity, but in the case of Kolar school reform, the Chief Commissioner considers, is called for from within.

14. *Middle Class Schools.*—The decrease in the number of pupils in the five Anglo-vernacular schools is not great considering all things, and their condition on the whole seems to have improved. The vernacular schools, of which class there are 39, have maintained a good standard, and only lost in attendance; but that was inevitable.

15. *Lower Class Schools.*—The falling off in attendance is naturally greater in proportion the lower the class of school and reaches a climax in the hobli schools scattered as they are throughout all parts of the Province. These primary schools the Chief Commissioner considers the backbone of the whole system, and he desires special attention to be paid to their inspection and supervision. They have evidently become popular and are doing a good work in carrying elementary education into the most humble house-holds. The present movement in favor of female education is most marked and is a very encouraging sign. Mr. Gordon has lately satisfied himself that the hobli schools and the vernacular girls' schools are doing extensive good.

Proceedings of the Chief Commissioner of Mysore, Educational Department, 10*th December* 1878.

16. The Director of Public Instruction gives the information required by the Government of India in respect to the branch hobli schools. If care is taken in frequently inspecting these and in preventing their being placed under incompetent teachers, the Chief Commissioner believes that they will prove useful as indicators of localities where hobli schools may be, with most advantage, located.

17. The School of Engineering and Natural Science has been fairly successful and the men passed out from it are well spoken of.

18. *Private Institutions under Government Inspection.*—The number of these has increased by two, there being 4 more lower class girls' schools. The average attendance has however slightly declined and so have the fees, the expenditure and the grants-in-aid. The higher class aided schools appear to be progressing very satisfactorily.

19. Aided female schools are doing very useful work, and the Chief Commissioner notices with especial satisfaction the success achieved by the Wesleyan Mission in the lower education of girls.

20. The Anglo-Indian-Aid Association grant expired on the 1st of January, and it has been renewed under somewhat different conditions.

21. The two years of famine have caused more than half the private unaided schools to stop altogether and reduced the number of children being educated in these by 9,000, a calamity from which it is to be feared they will take long to recover.

W. J. CUNINGHAM,
For Secretary.

To—The Director of Public Instruction.

OFFICE OF THE DIRECTOR OF PUBLIC INSTRUCTION,
BANGALORE, 30*th July* 1878.

From

LEWIS RICE, ESQ.,

Director of Public Instruction, Mysore.

To

MAJOR TREDWAY CLARKE,

Secretary to the Chief Commissioner of Mysore.

SIR,

I have the honor to submit the Annual Report on Education in Mysore for the year ending 31st March 1878.

I.—SUMMARY.

2. The unparalleled famine which prevailed through the country at the commencement of the year deepened in intensity as time wore on. The hopes of a favourable south-west monsoon were blasted. A gloom as of despair seemed to settle upon the inhabitants, and death overshadowed the land. Under these circumstances all interests had to be sacrificed to the one pressing cry for food. And if it be true, as statistics seem to shew, that the Province has suffered a loss of nearly 30 per cent of its population by the mortality arising from the famine and attendant diseases, it is no matter for surprise that the number of the young under instruction have fallen. Thus it has come to pass that, for the first time since I have been responsible for the Department, a decrease has to be reported. But it is with grateful feelings of relief that, since the close of the year, increasing signs are noted betokening the end of the famine. With the return of the prosperity which the country formerly enjoyed, we shall more than recruit all the losses now sustained. But, at the same time that a reduction has taken place in the aggregate numbers under instruction, it is worthy of special notice that the number of girls at school has considerably increased.

3. The total number of schools connected with the Department at the end of the year was 928, with 34,797 pupils. Compared with last year, the number in Government schools stands at 3,592 less, while in the Aided schools the total is the same: a result which raises a suspicion that the registration in some of the latter may not have been rigidly confined to children in actual attendance. The following are the comparative details :—

Year.	Government.		Aided.	
	Schools.	Pupils.	Schools.	Pupils.
1876—7	795	29,373	126	9,016
1877—8	800	25,781	128	9,016

4. The Unaided schools are returned at only 652, with 8,815 pupils, against 935 last year, with 13,165. The great reduction in the figures under this head shews the direct effect of the famine.

5. Adding together all classes of schools in Mysore, we obtain a grand total of 1,580 : in which there are being instructed 39,379 boys and 4,233 girls, or 43,612 children altogether.

6. The pupils of Government and Aided schools consist of 30,564 boys and 4,233 girls. According to creed, 28,794 are Hindus, 3,491 Muhammadans, and 2,512 others, which includes 622 Europeans, 643 Eurasians, and 1,247 Natives.

7. The following list shews the number of schools connected with Government that fall under each grade, and their strength as regards pupils:—

Class of Schools.	Government—		Aided—	
	Schools.	Pupils.	Schools.	Pupils.
College and Collegiate Schools	3	958	1	136
Boys' Schools—				
Higher...	5	449	5	1,151
Middle...	44	3,261	34	2,175
Lower	728	19,742	47	2,383
Girls' Schools—				
Higher...	...	...	4	547
Middle...	...	...	10	722
Lower	11	468	25	1,734
Normal Schools	4	81	...	...
Special „	5	822	2	168
Total.....	800	25,781	128	9,016

II.—CONTROLLING AGENCIES.

8. *Inspectors.*—As the famine increased in severity, and the demand for European agency in superintending measures of relief became more urgent, the Inspectors of the First and Second Circles were told off for famine work.

9. Mr. Hodson was in charge of the Central Relief Camp at Mysore for some time, until, by the appointment of a Famine Commissioner and the provision of a special agency by the deputation of officers from Upper India, other arrangements were made. Both the Famine Commissioner and the Commissioner of the Division expressed much satisfaction with the manner in which Mr. Hodson had superintended the famine operations placed under his control.

10. Mr. Marsden was unfortunately not in a state of health to undertake famine work, however willing to render aid. He was therefore granted leave to Europe for a year, on medical certificate. Later on, Mr. Hodson suffered so seriously in health, that he was also under the necessity of taking three months' privilege leave on medical certificate.

11. Mr. Marsden left on the 16th of October, and his place was taken by Mr. Candy, Head Master of the Raja's High School, who, however, was also disabled for some time by severe fever, the cold season having been exceptionally sickly. Mr. Hodson's leave commenced on the 15th of March, and the current duties of his office were, as a temporary arrangement, during his absence, attached to those of the Director.

12. *Deputy Inspector.*—Mr. Venkatpati Aiyangar, acting in this appointment, was transferred, in connection with the above changes, to the charge of the District School, Chitaldroog, and the Deputy Inspector's correspondence duties have for the time being been discharged by the Assistant in the Director's Office. A tour of inspection through the Circle was made by myself.

13. It will be evident from the foregoing statements, that inspection work has been much interrupted, but the state of the country, with a starving population, was such as to preclude the possibility of in any way pushing educational measures. The people everywhere expressed an earnest desire that schools might not be given up: they were deserted only on account of the terrible famine; as soon as this came to an end they would be filled again.

14. *Sub-Deputy Inspectors.*—At the end of the year, owing to the closing of the Normal Schools, the services of the full number of 15 Sub-Deputy Inspectors for Hobli Schools were available for inspection work, and 15 Circles were accordingly formed. The following was the arrangement as it stood on the 31st of March :—

Name.	District.	Station.
Srinivas Aiyangar ...	Bangalore East ..	Bangalore.
Venkat Ramanaiya ...	Bangalore West ...	Magadi.
Venkat Narnaiya ..	Kolar South ...	Hoskote.
Rangaswami Iyer ...	Kolar North ...	Sidlaghatta.
Venugopal Naidu ..	Túmkúr North ...	Sira.
Dakshina Murti Shastri ...	Mysore West ...	Mysore.
Dasappa ...	Mysore East ...	Chamrajnagar.
Murti Rao ...	Mysore North ...	Seringapatam.
Venkat Rao ...	Hassan West ...	Hassan.
Srinivas Tatachari ...	Hassan East ...	Kadaba.
Puttappa ...	Shimoga West ...	Ságar.
Tirumalachari ...	Shimoga East ...	Shimoga.
Seshaiyangar ...	Kadur West ...	Chikmagalur.
Applachari ...	Chitaldroog North ...	Chitaldroog.
Timmappa ...	Chitaldroog South ...	Hosdurga.

15. The above distribution to a great extent equalizes the work of these officers, and is such as to allow of thorough and complete supervision of the Hobli schools within each range.

16. During the year several changes occurred. Among these I regret to report the death of Ramacharlu, of the Kolar South District. He was very active and successful in inspection work, and had been in charge of the Shimoga District for some years before his transfer to Kolar South. His death resulted from fever, contracted in the course of travelling on official duty. Shamachari, who retired last year, also died, as well as Lakshmanaiyangar mentioned in the last Report. Raghavendra Rao was dismissed for gross neglect of duty.

17. The vacancies which arose were filled up by appointing Venkat Narnaiya, who had been in charge of the Nagar Normal School, to Kolar South ; Venugopal Naidu, Assistant Master of the Túmkúr District School, to Túmkúr North ; Seshaiyangar (since deceased I regret to say) from the Ashtagram Normal School, to Kadur West ; Dasappa, Head Master of Chamrajnagar Taluk School, to Mysore East ; and Applachari, from the Nundydroog Normal School, to Chitaldroog North. At the same time, Tirumalachari was transferred from Chitaldroog to Shimoga East, and Timmappa from Kadur to Chitaldroog South.

18. The two Hindustani Sub-Deputy Inspectors, Khwaja Muhammad of the Head Quarter and First Circles, and Sayad Mustafa of the Second Circle, have worked hard, and kept up, especially the former, who has now gained much experience in the work, a regular system of inspection. I regret that the new rules for travelling allowance have imposed great hardship on these men.

III.—GENERAL FINANCIAL STATISTICS.

19. *Charges.*—The Government expenditure for the year was according to the following statement, which also shews the sources from which the funds were obtained :—

Head of Charge.	From State Funds.	From Local Funds.	From Municipal Funds.
Direction with its subsidiary charges	15,698	...	...
Inspection do do	19,842	8,248	...
Instruction (including all educational expenditure not coming under the above heads)	1,96,275	97,874	2,728
Total.....	2,31,815	1,06,122	2,728

20. By adding the private expenditure from other sources, which amounted to Rs. 85,833 in Aided schools and to Rs. 18,311 in Unaided schools, a grand total is obtained of Rs. 4,44,809 expended on education for the year from all sources public and private.

21. *Receipts.*—For Government schools the receipts amounted to Rs. 95,288; which sum was made up of Rs. 17,172 from fees, Rs. 14,538 proceeds of book sales, Rs. 60,850 educational share of Local Fund collections, and Rs. 2,728 contribution from Municipal Funds. It will be seen that not only were the returns from fees and book sales diminished, directly owing to the famine, but the Local Funds assigned for education were less by Rs. 9,653 than last year, and Rs. 33,176 less than the year before.

22. In Aided schools the receipts are returned at Rs. 89,111, of which Rs. 31,485 were derived from fees. In Unaided schools the receipts amounted to only Rs. 18,311, against Rs. 28,149 last year and Rs. 38,113 the year before.

23. Adding together the receipts from all sources, we obtain a grand total of Rs. 2,02,710 as the educational income of the Province both public and private. Of this sum Rs. 66,968 were paid in fees by the pupils.

24. The details of the expenditure on instruction in the various grades of Government and Aided schools are exhibited in the following statement in the prescribed form :—

Description of Schools.	Government.		Aided.	
	From State Funds.	From Local Funds.	From State Funds.	From other sources.
College and Collegiate Schools... ...	40,937	...	3,760	7,190
Boys' Schools—				
Higher	15,418	...	8,400	25,077
Middle	29,787	2,372	11,587	15,438
Lower	24,390	86,355	8,413	12,145
Girls' Schools—				
Higher	...	...	3,800	10,161
Middle	..	...	4,360	1,727
Lower	4,153	...	7,038	10,738
Normal Schools	2,085	5,474	...	...
Special „	11,349	...	2,4 0	3,357
Total Rs....	1,28,119	94,201	49,758	85,833

25. Of the amount in column 2, Rs. 2,728 were expended from Municipal Funds, namely Rs. 2,372 on middle class Boys' schools, and Rs. 356 on lower. Grants-in-aid bore to the whole Government expenditure on instruction the ratio of 18 per cent.

IV.—UNIVERSITY.

26. *Affiliation.*—In July the Madras University adopted new rules of affiliation, in connection with which a candidate for the F. A. or B. A. examination was required to produce a certificate from the Head of some affiliated institution, that he had studied the subjects prescribed for the examination and had attended an authorized institution for at least eighteen months since passing the previous examination. At the same time the list of formerly affiliated institutions was cancelled.

27. In accordance with the new rules above mentioned, the following institutions in Mysore have now been affiliated to the Madras University :—

In Arts:— *First Arts.*

Maharaja's High School, Mysore.
High School, Shimoga.

Bachelor of Arts.

Central College, Bangalore.
Bishop Cotton Schools and College, Bangalore.

In Civil Engineering:—

School of Engineering and Natural Science, Bangalore.

28. *Branch Examinations.*—Last year it was reported that Mysore had been appointed a station for the holding of the Matriculation and First Arts examinations in addition to Bangalore. During the year under review, Shimoga likewise received the same privilege, thus providing a centre of examination for each Division.

29. *Bachelor of Arts Examination.*—The following candidate from this Province was successful in taking the B. A. degree in February last.

Third Class.—44. R. Raghunatha Rao Central College.

He unfortunately fell ill during the examination, and was thus unable to appear for the mathematical papers. That he passed, notwithstanding so serious a drawback, may be accepted as evidence of his ability to have taken a much higher place on the list had he been present throughout the examination. Three others went up without success.

30. *First Arts Examination.*—The number of candidates sent up in December was 34, of whom there were successful 15, shewing a return to the normal proportion. For in the previous year, owing to special causes then explained, the number was only three. The following are the institutions from which the present candidates appeared. All passed in the second class : 13 were Hindus and 2 Europeans. One other, who went up from the Madras Christian College, received part of his preparation in the Central College here.

Institutions.	Number of Candidates.	
	Presented.	Passed.
Government—		
Central College	20	9
Raja's High School	6	3
Shimoga High School	5	1
Aided—		
Bishop Cotton's	3	2

31. *Matriculation.*—The number of candidates who appeared from this Province was 148, of whom 139 were sent up from various schools. The number who matriculated was 62, of whom 6 passed in the first class. Five others educated in Mysore went up, 2 from Presidency College, 1 from Kumbhakonam College, and 2 from Private study. The total shews a good advance upon the normal average, though lower than last year, when, owing to exceptional causes, 104 passed.

32. Of the successful candidates, 50 were Hindus, 11 Europeans or Eurasians, and 1 a Native Christian. It deserves to be specially noted that one was a girl, Miss Edith Annette Gow, a pupil of Bishop Cotton's who took a very creditable place in the first class. This is the first female candidate who has matriculated in the Madras Presidency.

33. The following statement shews the schools from which the passed candidates proceeded :—

Schools.	No. of Candidates.			
	Presented.	Passed.		Total.
		I.	II.	
Government—				
Central College	21	1	8	9
Raja's High School	12	1	8	9
Shimoga do	10	...	5	5
Hassan District School	6	...	2	2
Túmkúr do	8	...	4	4
Chitaldroog do	7	...	1	1
Chikmagalur do	6	...	1	1
Aided—				
Bishop Cotton's	18	2	3	5
Wesleyan Institution	14	1	7	8
London Mission do	14	...	7	7
Wesleyan School, Mysore	11	1	4	5
St. Andrew's	12	...	6	6
Total...	6		56	62

V. GOVERNMENT INSTITUTIONS.

34. The usual detailed information regarding Government educational institutions required by the prescribed form is contained in the subjoined statement :—

Description of Institutions.	No. of Institutions.	No. on the rolls (monthly average.)	Average daily attendance.	Total Expenditure.		Total Amount returned to Government.	
				From Provincial Funds.	From Local Funds.	From Fees.	From Book sale.
College and Collegiate Schools....	3	961	795	40,937	...	8,678	10,355
Boys' Schools Higher....	5	473	386	15,418	2,372	2,881	1,139
Middle....	44	3,183	2,589	29,787	...	2,268	1,004
Lower....	728	19,602	13,979	24,390	86,355	1,601	2,040
Girls' Schools. ...	11	387	298	4,153	...	4	...
Normal Schools. ...	4	81	81	2,085	5,474	...	...
Special Schools. ...	5	822	822	11,349	...	1,740	...
Total...	800	25,509	18,950	1,28,119	94,201	17,172	14,538

A. College and Collegiate Schools.

35. *Central College, Bangalore.*—The number of students in the Central College at the end of the year was 444, with an average daily attendance of 349. The fees yielded Rs. 4,729. The decrease from last year is attributed to the famine, and "change of school hours possibly affected the number of students." This inference is drawn from the fact that few new boys were admitted in January and May, the candidates having apparently joined one or other of the neighbouring Aided institutions, which adhered to the long standing system of holding school only from 7 to 11.

36. At the University examinations, 9 students matriculated, one of them in the first class, 9 passed the First Examination in Arts, and one took the Bachelor of Arts degree. On this subject Mr. Waters reports as follows :—"Of the 6 candidates for B. A., only 4 appeared, of whom one was taken ill during the examination and lost the marks of the mathematical papers. The 3 who failed were employed. Three who

were expected to pass the F. A., satisfied the examiners in English, usually the most difficult subject for Native students, but failed in mathematics. I wish those who passed these examinations had taken better places. For, as often remarked, a mere pass is of no value to a boy. Yet so many shew too much eagerness to appear for the examination, but are unwilling to submit to the hard labor required to secure an honorable place on the list. Vernaculars and easy subjects are neglected, so long as the minimum marks required can be obtained."

37. The College Department contains 101 students, of whom one is in the senior B. A. class, 11 in the junior B. A., 29 in the senior F. A., 16 in the junior F. A., and 44 in the Matriculation class. "In previous years" the Principal states "most of our students reading for the B. A. degree were employed in Office during the day, and consequently unable to devote much time to study. Slender means, and the expensive books required in this class, compel many young men involuntarily to seek for employment. One or two scholarships of Rs. 15 each would enable deserving students to graduate, who, on account of being employed, often fail. Our junior B. A. class has 11 students, all unemployed, and it perhaps might be regarded as our first *bonâ fide* B. A. class. It fortunately has the following scholarships :--- Dobbs' scholarship Rs. 7, three given by Mr. Venkat Vardaiengar, M. L. of Rs. 10 each, one given by Mr. Rangacharlu of Rs. 5, Palace scholarship Rs. 7½, Government scholarships, one of Rs. 15 and two of Rs. 4.

38. "There are 29 in our senior F. A. class, all, with two exceptions, unemployed. The class has good ability, but lacks application. Some, however, are working on steadily. One or two students in this class have offered a prize of Rs. 200 to any fellow-student who comes in the first 5, or Rs. 100 if in the first 10. In the junior F. A. class there are one or two promising students, but the class is small."

39. The College and School Departments are examined thrice a year at the end of each term. Saturdays are devoted to examinations in the week's work, the senior classes in the School Department giving their answers on paper, and the others on slates. The annual examination, conducted by the senior masters, was, it is stated, on the whole satisfactory.

40. In the Review on last year's Report, (No. 117, dated Simla 15th May 1878,) the Government of India desire that the present Report should give full information on the following point :---

"At para 30 of the Director's report, it is mentioned that the change of hours at the Central College will prevent young men who are employed in public offices from carrying on their collegiate course. It seems inexpedient that young men engaged in office work should, at the same time, be allowed to pursue general or any heavy special courses of study at Government schools or colleges. As a general rule the result would be that in such cases neither the school nor the office work would be done satisfactorily. The Director in his coming report should notice whether this practice is still permitted and how it works."

41. The practice of admitting boys at school into offices as volunteers has been prohibited for some years. But, as already stated above, few of the youths who matriculate can afford to continue unemployed during the subsequent 4 years (the earliest period within which it is possible for them to graduate) for the purpose of carrying on their studies, unless they are supported during the time by liberal scholarships. Though systematically dissuaded from giving up study at Matriculation for the sake of some situation that offers, perhaps on a small salary, and though the advantages to be derived from a more thorough course of education even in subsequently obtaining employment are pointed out, the majority are involuntarily compelled to embrace the first opportunity that presents itself of earning some means of support. And while the school hours were from 7 to 11 in the morning, a ready method of compromise presented itself. For the young men could join the morning classes, and yet earn something by attending office during the rest of the day. Such students are not sought after, for they often have less control over their time than was expected, and are consequently irregular and nearly always ill prepared. But if they present themselves, the Principal under whom they have hitherto studied is reluctant to deny them admittance on the ground of their being employed, and in some cases were he to do so he might possibly have no students at all to shew in under-graduate classes.

42. The only remedy appears to be in the provision of a certain number of scholarships, of such amount as will compensate matriculated students who forego employment, and serve to maintain them until they graduate. The Native gentlemen alluded to above who have liberally contributed for this object are entitled to special thanks, and I trust others will be encouraged to imitate their example. But I would advocate that more Government funds should be applied to the purpose, and desire to bring forward the matter in drawing up the next year's budget.

43. *Raja's High School, Mysore.*—The Head Master, Mr. Candy, being appointed in October to act as Inspector of Schools in the Second Circle, Mr. Leonard, Head Master of the Shimoga High School, was transferred here from that time. The strength of the school at the close of the year was 311, with an average daily attendance of 265. Fees yielded the sum of Rs. 2,595. A few students are said to have left for the Wesleyan school in consequence of the change of hours, which is stated to be unpopular with a large section of the boys.

44. At the University examinations 3 students from this school passed the First Arts examination, and 9 matriculated, one in the first class. As compared with last year these results are very creditable. The present year opens with 15 students in the senior F. A. class, 10 in the junior F. A. and 37 in the Matriculation class. Before closing for the Christmas holidays, the whole school was thoroughly examined by the Head Master and the 4 Upper Assistants. Excepting mathematics in the 1st class, and the 4th and 6th B classes, all the others passed a most satisfactory examination, and very nearly 50 per cent of the boys were advanced to higher classes.

45. Besides the allowance for Government scholarships, a Palace scholarship of Rs. 7½ is awarded annually to the boy who takes the highest place among those who matriculate from the city of Mysore, and is continued till in due course the student takes his degree. Regarding this the Acting Head Master reports, "as no condition is attached to the scholarship, the recipients in most cases elect to study in Madras, where the schools are rich enough to supplement the Palace scholarship with one equally good. In consequence, some most promising students trained in the schools of the Province carry their attainments elsewhere, and bring that credit upon other institutions which might well have been reflected on our own. It is usually urged, no doubt with some little truth, that boys educated in the Colleges of the Presidency town imbibe larger ideas and more liberal views. But, apart from this, I think that in the interests of the Central College and the Raja's High School, some restriction as to the place of study should be made, otherwise the College classes of these institutions will continue to be deprived of some of the best recruiting material."

46. *High School, Shimoga.*—This school was conducted by Mr. Leonard until October, when, on his transfer to Mysore, Mr. Clapham from Túmkúr took charge. The absence of a First Assistant during the greater part of the year threw much hard work on Mr. Leonard. Mr. D. Subbaiya, B. A., from Chikmagalur, has since been appointed First Assistant.

47. The year closes with 203 pupils on the rolls, and an average daily attendance of 181. The fees collected during the year amounted to Rs. 1,353. One student passed the First Arts examination, and 5 matriculated. At the annual examination the results were fair, with the exception of the first class, which did very badly. The 3rd class did remarkably well, and 38 per cent of the school passed in all subjects.

B. Schools of the Higher Class.

48. *District Schools.*—The five schools in this class have all been exposed to loss, and close the year with a total of 449 pupils, which gives an average of only 90 to each against 118 last year. But the monthly average was up to 473. Túmkúr school is the one which has best maintained its attendance, there being still 112 pupils against 116 at the time of last report. Hassan and Chikmagalur, especially the latter, have lost considerably, as also Chitaldroog. In all three cases the fall is mainly due to epidemic diseases. The fees realized in the five schools amounted to Rs. 2,881.

49. *Hassan.*—Mr. J. Arbuthnott, B. A., was in charge of the school throughout the year. The First and Third Assistants were withdrawn for some months for famine duty, on the application of the Deputy Commissioner. The attendance at the end of March was 112. The fees for the year yielded Rs. 1,010. Out of six candidates sent up for Matriculation, two passed. The school was inspected in January, as the result of which the Inspector reports, "that of the pupils examined 50 per cent fully passed under their respective standards. The general condition of the school is decidedly good. The decrease in attendance is owing entirely to the distress and sickness which have carried off many pupils and driven away others."

50. *Túmkúr.*—Mr. Clapham had charge of the school till October, when he was transferred to Shimoga, being succeeded by Mr. Coleman from Chitaldroog. The First Assistant, who was not satisfactory, was removed to a school of a lower grade. The Third Assistant was appointed Sub-Deputy Inspector, those below him getting a step of promotion in consequence. The year closed with 112 pupils on the rolls. The amount obtained by fees was Rs. 892. The school had four successful candidates at Matriculation, out of eight sent up, thus maintaining the lead it took in this respect among the District schools last year. The inspection was held in September, when "the results of the examination were satisfactory in all classes, with the exception of English in the second class." K. Rangappa, Second Assistant, is specially commended for the great help rendered by him to the Head Master both in and out of school.

51. *Chitaldroog.*—Mr. Coleman, the Head Master, was on leave till the end of May, and transferred to Túmkúr in October, when Mr. Venkatpati Aiyangar, acting as Deputy Inspector of Schools, was put in charge. The strength of the school was 87 at the end of the official year. The amount obtained by fees was Rs. 303. One student matriculated, out of seven sent up. No place has more severely felt the pressure of famine and sickness. The Inspector, on proceeding thither for the examination of the school, was, with the whole of his establishment, so prostrated with the fever that was desolating the neighbourhood, that he was obliged to leave without accomplishing his object. I visited the town in January, and also suffered from an attack which compelled me to return, but not before I had examined the school. Allowing for the great depression prevailing on account of the majority of the inhabitants being down with a fever, which, as in the case of one of the most promising of the engineering students, often proved fatal in a few days, the school was in fair working order. Its success for the last three or four years may be attributed to Mr. Coleman, and with the passing away of the famine, it will doubtless recover from the losses it has this year undergone.

52. *Kolar.*—Mr. Birch continued as Head Master throughout the year. There are 65 pupils on the books, with a daily attendance of 43. Fees produced Rs. 204. The school has not been favorably reported on of late. I inspected it myself in December, and had reason to express great dissatisfaction with much that I saw. The Head Master has been warned and allowed a short time within which to effect a change. The First Assistant has been removed, and a competent teacher put in his place. Transfers have also been made among the lower masters. The school will be inspected again soon, with the view of determining whether the present Head Master, who has been wanting in energy and control, should longer remain in charge.

53. *Chikmagalur.*—Mr. D. Subbaiya, B. A., was Head Master till the 1st of March, when he was transferred, at his own request, as First Assistant to Shimoga High School, his place being taken by Nadamuni Naidu from Chikballapur. The year closes with 73 pupils, though the monthly average was 97. The amount obtained by fees was Rs. 482. One student matriculated, out of six who appeared. When inspected in July, the results of the examination in all classes were stated to be fair. All the masters were well reported on except the First Assistant, who was very unpopular.

C. Schools of the Middle Class.

1. *Anglo-Vernacular Schools.*

54. The five schools under this head have a total attendance of 172 pupils, against 183 last year. The sum of Rs. 508 was obtained from fees. The largest of the schools is the one at Chikballapur. I inspected it in January, and formed a favorable opinion of the work done, so far as it went. The Channapatna school has lost a good many boys: Gundlupet and Húnsúr, both of which are now provided with good premises, shew a slight increase. In the first case, most of the senior boys of last year have come to Bangalore to the Central College to continue their studies. The decline in attendance is ascribed by the Inspector solely to the pressure of the famine. The Head Master has rendered much assistance in famine relief measures. The Gundlupet school is favorably reported on, but not that at Húnsúr, where a change of masters is proposed. Applications have been received for the transfer of the Narsipur school to Saklespur, for the benefit of the Manjarabad coffee planting community.

2. *Vernacular Schools.*

55. As in last year's report, there are included here 35 Kanarese and 4 Hindustani schools, or 39 altogether. The total attendance is 3,089, in which number are included 76 girls, who attend various schools along with the boys. They are most numerous at Yedehalli, Malvalli and Pavagada. The marginal statement shews the distribution of these schools by Districts. The fees collected in them for the year amounted to Rs. 1,760. Nothing could be done in the way of increasing the rate pending the continuance of this dreadful famine.

District.	Schools.	Pupils.	Average.
Bangalore ...	7	538	77
Kolar ...	4	212	53
Túmkúr ...	5	338	68
Mysore ...	7	719	103
Hassan ...	3	233	78
Shimoga ...	7	577	82
Kadur ...	2	186	93
Chitaldroog ...	4	286	71
Total...	39	3,089	79

56. The chief increase in attendance has been at Nyamti, Shikarpur, Channagiri, and Davangere, all situated in the west, where the famine was not so severely felt, and all places largely inhabited by Lingayat merchants, who may be presumed to have made a good deal of money by the grain trade. The schools in the larger towns to the east have also kept up their attendance pretty well, as at Dodballapur, Nelamangala, Sira, Closepet, Sidlagatta and some others. In my tour through the Kolar District, I was glad to find all the schools in the last named town so popular, and apparently doing excellent work. I inspected also the Koratagiri and Maddagiri schools. The instruction in the upper class of the latter was more thorough than it is usual to meet with. The schools commended in the last report continue on the whole entitled to credit, though the attendance has been more or less reduced. Magadi and Yelahanka have lost ground considerably.

D. Schools of the Lower Class.

1. *Taluk Schools.*

57. The number of schools is 75, in which there were at the close of the year 3,127 pupils. The fees for the year amounted to Rs. 1,611. The marginal statement shews the distribution of the schools, and the language which forms the medium of instruction. The average attendance shews the greatest diminution in the Túmkúr District, which has felt the famine very severely. Shimoga is the only District which has maintained the same average as last year. One Kanarese school, that at Narsapur, has been converted into a Hobli school, while a Hindustani school was newly established at Hassan.

District.	Schools.			Pupils.	Average.
	Kanarese.	Telugu.	Hindustani.		
Bangalore ...	3	1	7	495	45
Kolar ...	10	6	3	654	34
Túmkúr ...	3	1	3	212	30
Mysore ...	6	...	3	311	35
Hassan ...	6	...	2	271	34
Shimoga ...	3	...	3	330	55
Kadur ...	5	...	3	449	56
Chitaldroog ...	5	...	2	405	58
Total...	41	8	26	3,127	42

58. *Kanarese Schools.*—The 41 schools imparting instruction in Kanarese have 2,033 pupils, or an average of 49·6. These include 1,983 boys and 50 girls. The latter, as last year, are most numerous at Shringeri, where there are 24 in attendance. A separate branch for them at this station has been proposed. The schools which shew the most decided increase in numbers are those at Jagalur, Saklespur and Goribidnur, an improvement entirely due to the appointment of more suitable masters. On the other hand, Honnavalli shews a very great decline. Some dispute between the master and the people seems to have produced this effect, and he has since been removed. The school at Chitaldroog is a large one, with over 100 boys. Those at Sorab, Kadur and Birur have 90 and upwards, while those at Huliyar, Tirthahalli, Chikballapur, and Hoskote have 70 and upwards. Talkad Narsipur is also doing well. Efforts are being made to ensure a minimum attendance of 50 in each of this class of schools.

59. *Telugu Schools.*—The number continues the same, or 8. The attendance is 231, all boys. Those at Kolar, Mulbagal and Shrinivaspur are in good condition. Chintamani school is also a good one, though there has been a decline in the numbers, due in some measure to a severe outbreak of cholera in the place. Very earnest petitions have been received from Chikballapur for the transfer of the Telugu school there to a more convenient part of the town, on which the attendance will be trebled. For want of funds this could not be done at the time, but the measure may perhaps be carried out in the ensuing year.

60. *Hindustani Schools.*—There are 26 schools, with 863 pupils, of whom 23 are girls, 21 attending at Sidlagatta and 2 at Húnsúr. The people at the former wish for a separate Hindustani girls' school. One new school, as previously stated, was established at Hassan, the Aided Hindustani school which has been carried on there for some years being given up. The Malur Narsapur school having been converted into a Hobli school, the Hindustani department has been made a branch of the latter. The Sidlagatta, Túmkúr, Shikarpur, Dodballapur and Bangalore Barr Lines are doing well, as also those at Mulbagal, Shimoga and some other places. But the Muhammadans as a class are well known to have endured great distress on account of the famine. At Hoskote there was even a proposal that the school should be removed into the relief camp, 2 miles from the town, as all the boys went there for the daily dole. With the disappearance of the famine there is no doubt that these schools will add considerably to their numbers.

1,601	0—8—7	2,175	944	8	3,127

2. *Hobli Schools.*

61. There are at the close of the year 653 schools, with 16,615 pupils. A second year of famine has told severely on these schools, which, situated as they are not alone in favored and populous localities but impartially distributed over every hobli of every taluk, are very sensibly affected by every influence adverse or otherwise which is of general operation. A mischievous report also got abroad that, in connection with measures of retrenchment to be introduced in consequence of the famine expenditure, all the Hobli schools were to be closed, and this naturally led masters to neglect their work in looking out for some method of providing for their future livelihood. The most earnest inquiries were addressed to me by the people every where during my tour on this question, and many declared their intention to keep up the schools themselves if Government should withdraw. I believe the report may have originated in the proposal that the Hobli Normal schools should be closed, and did what I could to dissipate the wrong notion that had got abroad. The Hobli schools have now taken such a firm hold on the people that their abolition would doubtless be regarded in the light of a national calamity.

62. The statement in the margin shews the distribution of the schools by Districts. The highest average has been maintained in the Shimoga District. The average has fallen most in Túmkúr, Chitaldroog, Bangalore and Hassan Districts. The new inspection arrangements will enable a more even supervision of the schools.

District.	Schools.	Pupils.	Average.
Bangalore	97	2,598	26·7
Kolar	107	2,412	22·5
Túmkúr	75	1,879	25
Mysore	111	3,002	27
Hassan	76	1,428	18·8
Shimoga	73	2,203	30·1
Kadur	55	1,494	27·1
Chitaldroog ...	59	1,599	27·1
Total.....	653	16,615	25·4

63. The total number of pupils includes 16,225 boys and 390 girls. According to creed, there are 15,708 Hindus, 863 Muhammadans and 44 others.

64. Among so many discouraging influences during the past year, one indication of the most hopeful character demands special notice. This is the increase of girls in attendance at the Hobli schools. The number three years ago was 147, last year it increased to 327, and now it stands at 390. No better sign could be adduced that the prejudice against female education is wearing away, and that the schools are silently exerting an important influence.

65. There are 3 schools with over 100 pupils, namely, those at Vadagenhalli, Melkote, and Siralkoppa; 4 schools with from 80 to 100 pupils, namely, Tyamagondal, Bellavi, Chelur, and Ajjampur; 12 schools with from 60 to 80 pupils, namely, Sulibele, Bidadi, Hosur, Lakkur, Tiptur, Gargesvari, Sosile, Hebbalaguppe, Belagutti, Chetnahalli, Mandali and Holalkere. Next to these are 24 schools with from 50 to 60, 62 with from 40 to 50, 96 with from 30 to 40, 217 with from 20 to 30.

66. Girls are most numerous, as last year, at Melkote, where there are 38. Nagaragere has 13, Rampura 11, Pulavadi and Holalkere 10 each, Molur 9, Bommagondankere and Meglapura 8 each, Sulibele, Manchanbele, Ronur, Yedarur, Mandikal, Maleyur, and Naraganhalli 7 each. Others have 5, 3, 2 and so on. Altogether 114 schools have some girls in attendance.

67. The course of study and general standard of attainment as described in last year's report it is unnecessary to repeat. But certain special information called for by the Supreme Government may be most appropriately given here.

68. In the Review of the Report for last year, (No. 117, dated Simla, 15th May 1878) the 6th paragraph is as follows:—"The Government of India would also wish to have (in next report) more particular information about the branch Hooblee schools opened under pupil teachers. Is the branch school in such cases under the supervision of the master of the parent Hooblee school, and does the pupil teacher continue to receive any instruction; or is he merely a low paid teacher? It would be well that a detailed account of a sample branch school of this kind should be furnished, shewing its distance from the parent Hooblee school, the age of the pupil teacher in charge, his previous training, and how far he is under supervision."

69. In compliance with these instructions, it may be stated that at the end of the year there were 17 branch schools of this description. In the case of 4 they were, two and two, branches of one parent school. The master of the parent Hobli school is held responsible for the management of the branch school, and through him all returns and correspondence are sent. The pupil teacher in charge of the branch school, in common with other pupil teachers, is required to pass an examination before promotion to a full mastership. He accordingly carries on such a course of study as to attain the required standard, receiving what assistance he may require in his preparation from the master of the parent school. Otherwise he is admitted to a Normal school to be trained for the office, a substitute acting for him during the time.

70. As examples of branch schools, the following cases may be quoted. Ajjampur Hobli school, with 62 pupils, has a branch at Attimage with 35 pupils. This village is less than 2 miles distant, and the pupil teacher in charge of the branch is of the Kuruba or shepherd caste, 21 years of age, and studied in the Ajjampur school for 4 years. Nidigatta Hobli school, with 37 pupils, has a branch 5 miles off a river being between, at Diggenhalli, with 14, in charge of a pupil teacher, 20 years' old: he is a Lingayat, educated for 4 years in the Nidagatta school, and the son of a Lingayat ayya or combined priest and schoolmaster of that sect at Nidagatta. Bidare Hobli school, with 40 pupils, has two branches, one at Irkasandra, one mile to the north, a large tank coming between, with 22, and one at Goravipur, 2 miles to the south, with 20. The pupil teacher in charge of the former is 21 years' old and was educated in the Bidare school: the one in charge of the latter is 25, was educated in a private school and had a private school of his own.

E. Female Schools.

71. The number of Government Girls' schools is 11, one being a new one established at Nyamti, a populous Lingayat town in the Shimoga District. Another at Chitaldroog has been taken over by Government at the end of the year and will appear in next report. The total attendance of girls is 468, an increase of 112 over last year. The table in the margin shews the distribution of the schools. Four of the schools have female pupil teachers.

District.	Schools.	Pupils.
Bangalore	5	218
Kolar	4	150
Shimoga	2	100
Total.....	11	468

72. Of the schools in the Bangalore District, the one at Bangalore has made considerable improvement and has nearly doubled its attendance. The others are also maintaining their position very well. Magadi school, which was the weakest, appears to be making some advance.

73. In the Kolar District I visited all the schools. Those at Sidlagatta and Shrinivaspur occupy the first place, and seem to be very popular with the townspeople, so much so that at Sidlagatta the Muhammadans are also petitioning for a Girls' school. At Shrinivaspur, the first class contained a Brahmani girl and a tall young woman of the Ganiga or oil presser caste, both educated in the school, who had made greater advances in the study of literature than many boys of their age. They were able to repeat from memory, and explain with evident appreciation of the meaning, long passages from difficult works. The Chikballapur school is a very pleasing one, but the master seemed to lack control, and the girls might be said to manage him rather than he them. The well known old master of the Chintamani school is as proud as ever of the performances of his pupils, and they certainly excel in arithmetic. The majority of the girls in this school are of the Komati or merchant class.

74. Of the schools in the Shimoga District, the Inspector reports very favorably of the Holehonnur school, in which 61 per cent of the girls passed in all subjects. The young Mahratti widow who is the assistant has rendered efficient help. The Nyamti school, opened in June, has made an excellent start with 60 girls. The majority here are Lingayats.

F. Normal Schools.

Hindustani Normal School, Bangalore.

75. This school has sent out 5 passed candidates during the year, who have been appointed to masterships in various places. The number of paid students at the end of the year was 7. The Training Master, Hasan Ali, has rendered some aid in revising our Hindustani school books. For the teaching of arithmetic, which was formerly found to be defective, he has been allowed the services of a young Hindu well acquainted with the subject and who knows Hindustani.

Training Schools for Hobli Masters.

76. The three Divisional Normal schools for the training of Hobli school masters were in active operation till near the close of the year, when, in connection with retrenchments rendered necessary by the famine, they were all closed. The Nundydroog school was located at Kolar, the Ashtagram school at Hole Narsipur, and the Nagar school at Shimoga.

77. *Nundydroog Normal School.*—There were 35 students nominated for admission, of whom 5 did not join. Subsequently 4 were dismissed, 2 absented themselves without leave and 1 died. This left 23 who completed their course of training, including 7 masters, 13 pupil teachers and 3 others. The general results of their final examination, held in March, were satisfactory. The Training Master, Aplachari, has taken charge of Chitaldroog North as Sub-Deputy Inspector.

78. *Ashtagram Normal School.*—The number of students under training was 26, of whom 24 were present at the final examination in January. Of these, 9 had previously acted as masters, the remainder were new candidates. Altogether 18 were passed for employment. The Inspector remarks that in the language paper only 4 men failed to secure one-fourth of the maximum number of marks. In neatness the answer papers shewed improvement. The arithmetic questions were generally well answered, and in a style superior to any former occasion. In geography the maps of Asia and Europe were tolerably familiar, but America was still almost an undiscovered country. The Training Master Seshaiyangar was appointed to Kadur West as Sub-Deputy Inspector, but died after a few months.

79. *Nagar Normal School.*—Out of 22 students, 16 were examined in November, and 13 passed. The remainder were subsequently examined, and the school closed, at the end of December. Venkat Narnaiya, the Training Master, was appointed to Kolar South as Sub-Deputy Inspector in August, and his place taken by Nanjunda Shastri, Taluk Master of Koratagiri, who has now been transferred to Shringeri.

80. Though closed for the present, I am of opinion that Normal schools cannot be dispensed with permanently, as it is only by means of specially trained masters that the general style and methods of education can be improved and elevated.

G. Other Schools for Special Education.

School of Engineering and Natural Science.

81. At the commencement of the year, there were in the Upper department 8 third year and 4 second year students: in the Lower department upper subordinates class, 4 second year and 6 first year students.

82. In June, the 4 upper subordinates who had passed their final examination, obtaining marks as given in the margin, were appointed, the first and last to the Irrigation Branch, Public Works Department, and the other two to the Roads and Buildings Branch. The officers under whom they have been serving bear very gratifying testimony to their efficiency, except in the case of the last. The Executive Engineer, Túmkúr, writes "the two first grade Sub-Overseers who were sent to me from the College gave complete satisfaction and were becoming the most useful hands in Túmkúr. I consider one in particular a first class man, and they are both a credit to the training they have received."

	Maximum 1,050
Nalla Nayagam ...	702
Narsimha Aiyangar ...	605
Raghavachari ...	504
Phaure	431

83. In January it was resolved to open a class for lower subordinates, and no less than 90 applications for admission were received. Of this number 19 were selected to compete for admission, of whom 10 were allowed to join.

84. The 8 advanced students of the Upper department, 5 of whom were candidates for the Public Works Department and 3 for the Forest Department, had at the end of the year almost completed their course of instruction, under the arrangements described in last report, and have since passed their final examination. This was conducted by a Board of Examiners nominated by the Chief Engineer, composed of Captain Bowen, R. E., as President, and Major Fraser, R. E. and Lieutenant Kensington, R. E., as Members. The Conservator of Forests conducted the examination of the Forest students in their special subjects.

85. Anticipating a little the period embraced by this report, the numerical results of this examination are here given, and the order in which the students passed:—

Rank.		Maximum Marks.	3,150	Department.
1.	A. Govindacharlu ...	...	2,019½	Public Works.
2.	Y. Srinivas Rao, B. A. ...	...	1,952½	do
3.	M. Muttanna ...	...	1,936	Forests.
4.	E. P. Lovery ...	...	1,859	do
5.	B. S. Venkatachari ...	...	1,855½	Public Works.
6.	M. Balakrishna Tivari ...	..	1,796	do
7.	Abdul Karim ...	...	1,714	Forests.
8.	Raghavalu Naidu ...	...	1,651½	Public Works.

86. The 4 first year students of this department stood in the last quarterly examination as per list in the margin, the maximum number of marks being 600.

Ranga Rao ...	439
Sitaram Rao ...	361
Narayan Rao ...	302
Prahlada Rao ...	289

87. At the same examination, the 6 first year students in the upper subordinates class passed in the order stated in the margin, the maximum marks being 600. It is matter for much regret that the first in the list, not only a most promising young man but apparently one of the strongest in the school, on going to Chitaldroog for the Christmas holidays, caught fever and died in a few days.

Ramanujachari ...	391

Armugam Mudliar ...	317
Srinivas Rao ...	288
Ananda Rao ...	239

88. Taken altogether, the results of the instruction imparted in this important institution may be considered as having proved not a little encouraging and successful. Mr. Lynam, C. E., acted as Principal from May, with Mr. Subba Rayar, B. A., B. C. E., as Assistant. Mr. Harman, M. R. A. C., F. C. S., lectured on scientific subjects, and Mr. Cameron gave instruction in Botany.

89. The number of convicts in jail who have been under instruction is 809, as per list in the margin. Of those in the Central Jail, Bangalore, 37 were juveniles, and 14 women.

Jail Schools.		
Bangalore	...	338
Mysore	...	261
Shimoga	...	210

90. The following extracts are from the report by Dr. Law, Superintendent of the Central Jail.

"In educational results, the past year exhibits a great falling off as compared to previous ones, and this is due to several causes ; at one time the school master was away ill, and he has been pensioned with a gratuity; then many of the prisoners who assisted in this work were released on the first day of the year, but the main and chief cause was the great number of prisoners in jail. The educational ½ hour had to be sacrificed to the additional time necessary to accomplish the counting and locking up of the prisoners, and also to necessary and urgent works of the jail, as bringing in bricks from the garden and storing them from exposure to weather and building temporary sheds, which very often employed every available man in prison.

"The paid female teacher attends the women's evening class regularly, the improvement made by those at school has been fair; all the prisoners have not been mustered at school, as a great number of them were of short term.

"In the juvenile prison the old school master has been pensioned with a gratuity after 10 years' service and a young man well recommended by a native gentleman has been put on probation, and he appears to be interested in the task and the boys progress fairly well."

VI.—PRIVATE INSTITUTIONS UNDER GOVERNMENT INSPECTION.

91. The following statement exhibits, in the prescribed form, details regarding the schools receiving grants-in-aid from Government :—

Class of Schools.	Number of Institutions.	Number of Pupils on the rolls, monthly average.	Average daily attendance.	Government grants-in-aid.	Expenditure from all other sources.	Fees.

92. *New Grants.*—In reviewing the last Educational Report, the Government of India remark that "the administration of the grant-in-aid fund appears to have been successful." During the past year the following new grants have been given :—

Boys' School.

Wesleyan Kanarese School, Old Agrahara .. .. .. Rs. 12

Girls' Schools.

Wesleyan Kanarese School, Chikmagalur	..	..	..	15
,, ,, ,, Kunigal	..	..	..	15
,, ,, Orphanage, Bangalore	..	..	..	20
Q. O. Sappers and Miners Tamil School ,,	..	..	..	10
St. Andrew's English Girls' School ,,	..	..	..	80

93. In addition to the above, the following grants were made in aid of the erection or furnishing of school premises :—

Building Grants.

Wesleyan Kanarese Girls' School, Shimoga	Rs. 1,000
,, ,, Boys' ,, Hebbur	130
Sanskrit School, Muttur	150

Furniture Grants.

Wesleyan Kanarese Boys' Schools, Gubbi, and 3 other villages ..	145
Sanskrit School, Chikballapur	19

94. *Grants stopped.*—The following grants were withdrawn or ceased, for the reasons stated against each :—

Sanskrit School, Seringapatam ..	Rs. 20	Withdrawn on Inspector's Report.
Kanarese Girls' School ,, ..	15	,, ,,
Sanskrit School, Chintamani ..	10	School closed on master's death.
Miss Fergusson's School, Shule ..	30	,, on Mistress' marriage.
St. Mark's Infant School, Bangalore	25	,, by Chaplain.
Hindu Girls' School, Chitaldroog ..	10	Converted into Government School.
Anglo-Indian-Aid Association ..	200	Ceased on expiry of terms of sanction.

95. The following table shews the Aided schools according to the language which forms the subject or medium of instruction :—

Language.	Boys' Schools.	Pupils.	Girls' Schools.	Pupils.
English	7	434	7	336
Anglo-Vernacular	12	1,731	3	400

Chitaldroog	2	64	1	41

A. Aided Schools of the Higher Class.

97. *English.*—The number of students at the end of the year was 136, against 128 last year, and 138 the year before. The average daily attendance was 127. The amount collected by fees is stated at Rs. 7,190, against Rs. 6,273 last year. There was no change in the educational arrangements. The number of boarders was 29 on the premises, and 10 private boarders with assistant masters. At the University examinations 2 students passed the F. A. and 5 matriculated, 2 of the latter in the first class, one of them being the only female candidate who has hitherto appeared from the Madras Presidency. The college classes are very faithfully taught. At the inspection the 4th form were going through poetry which seemed too difficult for them. In the junior forms somewhat more attention was found to be required to dictation and arithmetic.

Bishop Cotton School and College.

98. The strength of this school is about the same as last year, or 106 against 109. The average daily attendance is 95. Fees yielded Rs. 4,650 against Rs. 4,374. The number of boarders is 15. Six students matriculated. The general results of inspection were favorable, and the school appears to be making steady progress.

St. Andrew's School.

99. *Anglo-Vernacular.*—The number of pupils on the rolls is 374, against 377 last year, with an average daily attendance of 302. The returns from fees were Rs. 3,153 against Rs. 2,991. At the Matriculation examination 8 passed, 1 in the first class. The Rev. Mr. Vanes was succeeded as Principal in November by the Rev. Mr. Gulliford. The school was inspected in November, and the classes found to be in good working order, with a little falling off in respect of the lowest.

Wesleyan Institution.

100. The total number of students on the roll rose from 305 to 333, but the average daily attendance was only 230, or lower than last year. The fees also produced less, or Rs. 2,196 against Rs. 2,750. Seven students matriculated. The Rev. Mr. Walton having gone to Europe on leave, his place as Principal was taken by the Rev. E. P. Rice, B. A. At the inspection the classes on the whole passed a good examination, and the fifth may be specially commended.

London Mission Institution,

101. The number of pupils continues the same, or 181, with a daily average of 150. The fees produced Rs. 1,574. Five students succeeded in matriculating, 1 being placed in the first class. The school has not adhered to the midday hours adopted last year, but reverted to the former practice of opening from 7 to 11. On the results of his examination the Inspector remarks that the majority of pupils are being successfully carried through a useful course of instruction.

Wesleyan School, Mysore.

102. There is a slight increase in the numbers from 142 to 157, but the daily average is very low, being only 95. The receipts from fees were Rs. 690, against Rs. 627 last year. No students passed any of the University examinations. At the inspection, about half the boys present in each class are stated to have passed in all subjects, but there were numerous absentees.

St. Joseph's Seminary.

B. Aided Schools of the Middle Class.

103. Under this head are included 34 schools with 2,175 pupils, of whom 45 are girls. The schools may be classified as in the margin. The remarks made in last year's report continue in general applicable to the various schools there mentioned. No marked changes have occurred during the year under review calling for special comment. The Jaghirdar's school, Yelandur, has been transferred from the Anglo-Vernacular branch to the Kana-

rese, while 3 Sanskrit schools disappear from the list, 2 being closed on the death of the pandits who conducted them, and a third being deprived of a grant on account of its unsatisfactory condition. The Yelandur Jaghirdar's school and the London Mission schools at Anekal and Malur fairly supply the place of taluk schools in those towns. The Malur school has a branch for girls.

C. Aided Schools of the Lower Class.

104. Bringing these into one list, as with those of the middle class, there are 47 schools, attended by 2,223 boys and 160 girls, distributed as in the margin. There has thus been an increase in the number of girls, while the number of boys has somewhat diminished.

	Schools.	Boys.	Girls.

Hindustani	20	492	38

105. St. Mark's Infant school has been given up by the chaplain at the close of the year. It was very poorly attended. The Catholic schools at Mysore seem to have been turned into a famine orphanage for the time being. The Wesleyan Kanarese schools in the villages round about Túmkúr have all more or less suffered a diminution in attendance. The famine has been very heavily felt in this District. Their school at Shimoga is well reported on. Of the Hindustani schools, those at Davangere and Honnali are doing very well, and an improvement has been made in several others, but those at Ságar and Benkipur are not satisfactory.

979	0—6—11	1,138	572	673	2,383

D. Aided Female Schools.

106. *Higher Class.*—There are 4 schools with 547 pupils, against 3 last year with 344. Bishop Cotton's School has increased its numbers from 81 to 117. The number of boarders is 12. There are 13 small boys taught in the girls' school, while 10 of the senior girls form a college class, taught in the boys' school with those preparing for Matriculation. One of them, Miss Gow, as already mentioned in a former part of this report, passed the Matriculation examination of last December in the first class. She is the first female candidate from the Madras Presidency, and her example is likely to be followed by others. On this subject Dr. Pope says—"Our college form was opposed and even sneered at; but I am sure that in after-days it will be felt that we did good service in leading the way to the higher education of women in this Presidency." The junior classes of the school were examined with fair results.

107. An important addition has been made to this grade of schools in Bangalore by the opening of St. Andrew's Girls' school, in January, under Miss Millard, a lady of much experience and success in education. The immediate cause for this step was the intended closing of the Wesleyan English Girl's school, the grant for which was, on the application of the Mission, transferred for some months to an orphanage for famine girls. But means have since been found for continuing the Wesleyan school also, though on a reduced scale. A distinguishing feature of the St. Andrew's school is a *kindergarten* class for young children, under the management of a German lady practised in that system of instruction..

108. The Convent of the Good Shepherd has very largely recruited its numbers, chiefly by the reception of famine orphans. The year closes with 336 girls on the roll against 201 last year. The number of Europeans and Eurasians, who are more properly those that receive higher class instruction, is 77, against 100 last year.

109. *Middle Class.*—This includes 3 English, 4 Kanarese and 3 Tamil and Telugu schools, with altogether 722 pupils. St. John's schools are doing well, as usual, in a populous neighbourhood. Miss Fergusson's school has been closed. The Wesleyan Kanarese and Tamil schools are all well conducted and popular. The Hindu Female school, Bangalore, continues to deserve the encomiums passed on it in former years. The Hindu Girls' school, Chitaldroog, under a Lingayat mistress, has been transferred to the direct control of Government. In connection with this the people of the town have subscribed and purchased suitable premises for the school in the main street, which, on the occasion of my visit to Chitaldroog in January, were formally occupied and made over for the purpose.

110. The Telugu Girls' school of the 36th Regt., M. N. I., has also been provided with commodious premises, erected in the new lines, at the expense of the Subedar-Major who is its chief promoter. At the same time, with the view of making it a permanent institution, the name has been altered to Native Regimental Girls' school, and girls from the other Native regiments in garrison are admitted. The Subedar-Major proposes to retire and settle here, retaining the oversight of it, while on the removal of his Regiment in the ordinary course of relief, it will also carry a Girls' school with it to its new station.

111. *Lower Class.*—There are under this head 25 schools with 1,734 pupils, according to the statement in the margin. Last year there were 21 schools with 1,681 pupils. The statements made in last year's report on these various schools continue to hold good. The Kanarese Missionary schools especially, are all carefully superintended and encouraged. The two Hindustani schools are reported by the Muhammadan Sub-Deputy Inspector to have made decided progress during the year in some subjects. In the Petta school special arrangements have been made for instruction in needle work.

E. Aided Schools for Special Education.

112. *Anglo-Indian-Aid-Association.*—The period for which a grant was sanctioned in aid of the Association expired on the 1st of January. At that time there were 32 apprentices articled by it, as well as 39 boys and 42 girls under instruction in Ragged schools connected with it.

113. Of the apprentices, 27 were boys and 5 girls. The latter were all apprenticed as domestics. The former were bound to the following trades:—8 as printers, 1 as boot and shoemaker, 3 as carpenters, 4 as mechanics, 1 as jeweller, 1 as a farrier, 4 as weavers, 3 as book binders, 1 as a mercantile clerk, 1 as compounder of medicine. Two are in Madras, the remainder in Bangalore.

114. The income of the Association for the year was Rs. 4,713, of which Rs. 2,000 was granted by Government. The question of renewing the grant has been under consideration, and in applying for it the Association set forth the following as the results of their operations for the past two years.

115. They have had altogether 54 apprentices, of whom 6 are stated to be now obtaining an independent livelihood, 3 died, 10 deserted and 6 enlisted in the army. Of the 6 who are now able to support themselves, 2 boys have set up in Bangalore as cabinet makers and rattan men, 2 have entered the service of the South Indian Railway and 2 girls got comfortably married. Two other girls not apprentices have also done this. Of the 6 boys who enlisted, one entered the Royal Horse Artillery, one Her Majesty's 45th Regiment, one Her Majesty's 16th Lancers, and three as bandsmen of the 36th Regiment, Madras Native Infantry.

116. A Home is maintained for the apprentices, in which 22 are lodged, fed and clothed, besides receiving instruction in a night school. This Home, which is kept up entirely by the Association, forms the principal charge on its funds; but it has been pointed out that the employers of the apprentices may fairly be required to contribute towards the support of those of whose labor they derive the benefit as soon as it becomes of value.

F. Private Unaided Schools.

117. The returns entered in last report shewed a diminution of 415 schools and 4,700 pupils in the indigenous seminaries of the country, an effect directly due to the famine. With the continuance of this calamity, a still further reduction has occurred, and there are reported to be now only 652 with 8,815 pupils, against 935 last year with 13,165. The numbers have thus again fallen by 283 schools and 4,350 pupils. It thus appears that, during the last two years, no less than 9,000 children have disappeared from the total of those previously under instruction, and no less than 700 masters withdrawn from educational work.

118. The following are the statistics for the past year by Districts :—

District.	Schools.	Pupils.	Average.
Bangalore	219	3,231	14·8
Kolar	59	912	15·5
Túmkúr	75	840	11·2
Mysore	104	1,474	14·1
Hassan	67	708	10·6
Shimoga	34	421	12·4
Kadur	70	900	12·9
Chitaldroog	24	329	13·8
Total...	652	8,815	13·5

VII.—BOOK DEPARTMENT.

119. *Stock.*—The stock of books in the Central and Branch Depôts on the 31st March 1878 was of the value of Rs. 70,870. There were added during the year to the Central Depôt 44,346 books, at a cost of Rs. 14,611. The number of books supplied to Branch Depôts for sale was 23,071, valued at Rs. 6,810.

120. *Sales.*—The amount realized by sales and paid into Government treasuries was Rs. 14,538, the famine having checked the demand for purchase of books throughout the districts.

121. The following books were printed for the Department :—

Kanarese First Book	20,000	copies
Vagvidhayini, Kanarese Grammar	10,000	,,
Bhuvivarane ,, Geography	10,000	,,
Padya Sara, Poetical Selections	10,000	,,
Amarakosha	5,000	,,

122. The following books were purchased for the Department :—

Kanarese.	Anglo-Kanarese First Reader	200	copies
	Teacher's Hand book to do	20	,,
	Channa Basava Purana	100	,,
	Raja Shekhara Vilasa	25	,,
	Anubhavamrita	25	,,
Telugu.	Geography of Asia	100	,,
	Duncan's Europe	50	,,
Hindustani.	Barnard Smith's Arithmetic	100	,,
	Hindustani Teacher	12	,,

123. The large new wall-map of India had the names written in Kanarese preparatory to printing, and will soon be completed.

124. At the close of the year it was decided, in connection with measures of retrenchment in public expenditure, to abolish the office of Curator of the Book Depôt. Mr. J. J. Steele, who has held this office for the past four years, has conducted his duties with much care and method. From the new official year the sale of Government books to the public has been entrusted to the Tract and School Book Society's Depository, with an allowance of 15 per cent commission on the amount of sales effected. The supply of school books, &c., to Government schools is attached to the Director's Office.

VIII.—LITERATURE.

125. The following summary is from the separate report submitted by me on works published and registered in Mysore in 1877. The total number was only 32, against 68 in 1876, and 38 the year before.

126. The publications may be classified under the following of the prescribed heads :—Biography 2, Drama 2, Fiction 8, History 1, Language 3, Law 2, Miscellaneous 1, Poetry 1, and Religion 9. Of these works 18 were in Kanarese, 9 in Hindustani, 1 in Sanskrit, 1 in Kanarese and English, 1 in Kanarese and Latin, 1 in Sanskrit and Kanarese and 1 in English and Hindustani.

127. The following ancient manuscripts were obtained by me. *Vikramárjuna Vijaya*, an ancient Jain work in Old Kanarese of the 10th century; *Grihya-tátparya dars'ana*, a scarce Sanskrit work on domestic ritual; *Sudha Lahari*, a clever work, written 200 years ago, by a pandit of Magadi to supersede the well-known *Kádambari*.

IX.—SCHOOL BUILDINGS.

128. The construction of school houses of the second class design at Talkad Narsipur and Bowringpet was completed by the Educational Department, and of those at Gundlupet and Kortagiri by the Public Works Department.

129. The enlargement of the Central College premises and of the Shimoga High School was carried out by the Public Works Department.

130. Various repairs to 18 school houses were made by the Educational Department, at a cost of Rs. 2,617, and school compounds laid out and enclosed in 5 stations at a total cost of Rs. 883. Repairs were executed to 2 schools by the Public Works Department, at a cost of Rs. 584.

X.—CONCLUSION.

131. It only remains for me, in conclusion, to record the acknowledgments of the Department to the Chief Commissioner, and to the Officers of the Mysore Commission generally, for the countenance and aid at all times willingly rendered to educational operations. Many of the Amildars and subordinate officials are honorably distinguished for their efforts to promote the interests of the schools which come under their notice.

132. To the Officers of the Educational Department my best thanks are due. Circumstances beyond human control have interfered to somewhat check for the time the progress of the Department, and many fellow-workers, not to mention children, have fallen victims to diseases engendered by famine. But brighter prospects are reviving at the time this Report is being written, and the coming year it is hoped will more than restore the losses that have been sustained.

I have the honor to be,

Sir,

Your most obedient Servant,

L. RICE,

Director of Public Instruction.

APPENDIX I.

TABULAR STATEMENTS.

Proceedings of the Chief Commissioner of Mysore in the Revenue Department, (Educational),—dated 27th November 1879.

READ—

Annual Report on Education in Mysore for the year 1878—79.

No. 4466-76—EDL. 21, DATED CAMP NAGAR, 27TH NOVEMBER 1879.

ORDER THEREON.—It is unnecessary to notice in detail all the various points dwelt upon by the Director in the above Report in connection with the operations of the Educational Department during the year 1878—79. The Province had not altogether recovered from the effects of the famine which had told on the attendance in the lower classes of schools, and in the Chitaldroog District especially, educational operations were much retarded by a severe form of fever which was generally prevalent throughout the year. The aggregate results for the whole Province however shew no falling off as compared with the previous year either in regard to the number of schools maintained or of the pupils attending them. There is an increase in the number of schools, which however is more apparent than real, being due to the change in the nomenclature and classification of the schools recently adopted under the orders of the Government of India. Under this arrangement, the several departments in a school imparting different standards of instruction are numbered as so many separate schools. This plan is useful as shewing the number of pupils under each grade of instruction, but it may be misleading in regard to the number of educational institutions maintained in the Province.

2. The number of schools of different grades as above classified, with their attendance, are shewn below:—

Class of Schools.				No. of Schools.	No. of Pupils.
University ...	...	...	Colleges	4	92
Boys' ...	Secondary ...		High Schools, English	14	574
			Middle do do	24	1,129
			Do do Vernacular	82	1,183
Girls' ...	Secondary ...		High Schools, English	1	17
			Middle do do	6	151
			Do do Vernacular	7	114
Boys' ...	Primary ...		English Schools	32	2,095
			Vernacular do	827	25,323
Girls' ...	Primary ...		English Schools	6	252
			Vernacular do	43	2,625
Special.	Engineering, Normal and other institutions			9	823
			Total.....	1,055	34,378

It will be seen that there are 875 Government schools imparting instruction to 25,620 pupils and 180 Aided schools with an attendance of 8,758. In the latter are included 27 schools with an attendance of 956, intended specially for the education of European and Eurasian youths at Bangalore.

3. There are under instruction in all the schools 30,636 boys and 3,742 girls, and in regard to caste or race, they may be classified as follows:—

	No.
Hindus	28,279
Muhammadans	3,577
Europeans and Eurasians	1,302
Native Christians	1,049
Others	171
Total ..	34,378

4. The Director's report does not distinguish the number of boys and girls of each race attending school, nor does it shew the number of Muhammadan boys receiving the different standards of instruction. Information on these points may be usefully furnished in future reports.

5. The expenditure incurred on education during the year under notice was on—

Direction	Rs.	16,067
Inspection	„	30,209
Instruction including all other charges	„	2,83,016
Total	„	3,29,292

and it was contributed from the following sources :—

From Provincial Revenues	Rs.	2,35,029
„ District Funds	„	91,736
„ Municipal Funds	„	2,527

6. The provincial expenditure comprises grants made to Aided institutions to the extent of Rs. 48,059, or 20·4 per cent. The remaining expenditure under this head was incurred in the maintenance of the Government colleges and District and Taluk schools, as well as for Direction, Inspection and other general charges of the Department. The District Funds are entirely devoted to the inspection and maintenance of the Hobli or Primary schools ; but it is under contemplation to give a wider sphere to the employment of these funds, so as to bring under them the Taluk, and if possible, even the District schools, thereby proportionately relieving the provincial expenditure on education. The Municipal contribution referred to consists of the grant made, in a solitary instance, by the Municipality of Chikmagalur for the maintenance of an Anglo-Vernacular school in that town.

7. Against the Government or Provincial expenditure of Rs. 2,35,029, must be set off the receipts from fees in Government schools amounting to Rs. 14,493, and from the sale of books, Rs. 14,082, which are both carried to the credit of Government. The purchase of books may, in future, be more conveniently provided by a separate advance, to be reimbursed by the proceeds from the sale of the books.

8. Besides the Government expenditure on education above shewn, there are the charges of the Aided institutions defrayed by their managers from sources other than Government grants. These are returned at Rs. 93,653, of which Rs 36,960 are derived from school fees. The fees in the Aided schools thus contribute 26 per cent of their total cost, inclusive of the Government grants ; and they compare favorably with those realized in Government schools which amount to only Rs. 14,493 as already mentioned. This is owing to the fact that education is free in all the Hobli schools, whilst a nominal fee of only one anna is levied in the Taluk schools. In the higher schools, the fees fixed are for the present sufficient, but there seems to be some laxity in their collection, remissions being made in favor of poor boys. Any such artificial encouragement can scarcely any longer be required now that education is thoroughly established. Those who seek education especially in the higher schools, ought in every case to pay for it. The cases of the few gifted boys of the poorer classes who deserve encouragement are sufficiently provided for by the scholarships allowed. The Director's attention is therefore drawn to the necessity of a stricter enforcement of the fees in the higher Government schools, and he should also take into consideration the expediency of introducing a very light fee in the Hobli schools, and of somewhat raising the rate of fee now collected in the Taluk schools. It is true that these schools are maintained entirely from cesses contributed by the people, but the levy of a light additional fee from those actually under instruction cannot be in any way incompatible with this fact, and if judiciously managed it may serve to set a value on the education given.

9. The aggregate expenditure on education in the Province, inclusive of that contributed from private sources for the maintenance of Aided schools, amounts to Rs. 4,22,950, and may be distributed as follows :—

Superior instruction	..	.. 5·6 per cent.
Secondary do	..	.. 42·5 do
Primary do	..	.. 31·1 do
Special do	..	.. 4·1 do

10. Collegiate education is given in the Government colleges at Bangalore, Mysore and Shimoga, and in the Bishop Cotton's College at Bangalore. The number of students under instruction in these classes during the year was 92. The Government schools established at the District head-quarters and 5 Aided Mission schools at Bangalore and Mysore rank as High Schools, giving instruction up to the Matriculation standard. They have an average attendance of 574. Out of all the above schools, 3 candidates presented themselves for the Bachelor of Arts degree examination and all passed. One hundred and thirty-one candidates appeared for the Matriculation, and 38 for the First-in-Arts Examination, of which 26 and 17 respectively were successful. This unfavorable, result, which was also general in the Madras Presidency, is attributed to the character of the examination held, and not to any defect in the instruction given; but the District schools at Shimoga, Chitaldroog, Kolar and Chikmagalur do not seem to have progressed well. The Director should see that they are kept up to the mark. The success of the schools depends very much on their Head Masters. The selection to these appointments therefore demands great care and discrimination.

11 The Taluk and the Hobli schools which provide primary vernacular education to the masses of the population are of the greatest importance. These schools are now thoroughly established throughout the Province, and education is freely sought by the masses. It becomes all the more necessary therefore to give the greatest attention to the proper selection and training of the masters placed in charge of these schools, in which respect, it is believed, there is still great room for improvement. Such schools if ill-conducted without proper discipline, and under inexperienced masters or mastery of indifferent qualifications, are likely to be more productive of evil than good. The schools are at present inspected by a comparatively inferior class of Sub-Deputy Inspectors. The arrangements which have lately been made to substitute a superior class of Native Deputy Inspectors, one for two Districts in the place of two European Inspectors for the whole Province, will, it is hoped, serve to bring the Taluk and Hobli schools more under supervision. The establishment of Normal schools for the proper training of Hobli school masters, which is a matter of the greatest importance to the success of these schools, is now under consideration.

12. The subjects ordinarily taught in the Hobli schools comprise reading, writing and arithmetic. It will be useful to add some elementary instruction in agriculture, laws of health, mensuration and the system of village administration and accounts, and there should be also provision for a somewhat higher instruction in vernacular literature, if these schools are to command the esteem and sympathy of the native population. In order to infuse greater life into these schools, it is further necessary that the Deputy Commissioners and the other higher officials in the Districts should take a practical interest in them by personally inspecting them as often as they can, and the results of such inspection should be brought to notice in their periodical reports. Local boards of management, where such can be formed, as for instance at District or Taluk head-quarters, will be particularly useful, as such connection of the leading members of the population would serve to make the schools more popular.

13. Female education in the Province not only amongst the European and Eurasian classes in Bangalore, but also the primary vernacular education of native children in the Province is dependent on the efforts of Missionary societies, who receive grants-in-aid from the Government. They maintain, besides the English schools for the European and Eurasian children at Bangalore, 31 schools with an attendance of 2,121 for the vernacular education of the native female children. Female education is not a measure which, in the present circumstances of the country, the Government can successfully directly undertake, and Government operations are best confined for the present to giving grants-in-aid of private efforts, whether by Missionary bodies or by natives. Twelve Government Vernacular girls' schools, with an average

attendance of 504, appear to be kept on at Bangalore, Kolar, Shimoga and Chitaldroog. These schools which are generally attended by the superior classes in towns may well gradually give way to private and Aided schools, and where they must be retained, a moderate school fee may be properly collected in order to ensure that the education given is really valued. It is observed that the rural population do not object to send their daughters to the Hobli schools for instruction along with their boys.

14. Another department of education which is also best left to private efforts is Sanskrit education. It is noticed that the number of Aided Sanskrit schools decreased during the year under review from 13 to 12; but the efficient manner in which two of these schools at Melkote and Mysore are conducted gives promise of greater general progress hereafter with the increasing interest in the subject which is being awakened in the minds of the leading classes of the native community.

15. It now remains to notice the School of Engineering and Natural Science established at Bangalore. This school has hitherto had but a limited sphere of usefulness. During the year under review, it had only 10 students on its rolls. The Chief Commissioner has it in contemplation to throw the school open to larger numbers of students on moderate fees, but without any guarantees of appointments such as are likely to be attended with difficulties in future.

16. The Chief Commissioner in conclusion has perused with satisfaction the statement annexed to the 136th para of the Director's report. The large number of responsible Government appointments filled by men who have been educated in the public schools of the Province is conclusive testimony of the useful results with which education has hitherto been attended. The increasing numbers of students sent out of the schools for whom Government appointments cannot be found render it a matter of the greatest interest and importance to inquire in what manner they find useful occupation other than Government employment.

17. It is noticed that the Director's report, though dated the 1st June 1879, was received in this Office only on the 12th August.

C. RANGACHARLU,
Revenue Secretary.

To—The Director of Public Instruction in Mysore.
,, Deputy Commissioners of Districts.
,, Commissioners of Ashtagram and Nagar Divisions.

REPORT

ON

PUBLIC INSTRUCTION IN MYSORE,

FOR THE YEAR

1878—79.

INTRODUCTION.

1. The Report drawn up by Mr. Rice for the year ending March 1878, gives expression to a hope that the losses sustained during the late unparalleled famine would be made up during the coming year. This expectation has not been fulfilled. Just as the schools were beginning to exhibit signs of recovery from the crushing effects of the long famine, ominous rumours of extensive reductions produced a most unsettling effect. Assurances that their position was not endangered were cautiously being accepted by the alarmed Vernacular masters, when the removal of European Inspectors and the substitution of Natives caused suspicion to blaze up again. That their own countrymen were being put into office afforded no comfort. "When a tree is being cut down does it derive any consolation from the knowledge that the handle of the axe is of kindred wood with itself?" was an observation addressed to me characteristic of the general feeling. Apprehension has at last been allayed. The newly organized native inspection agency is in operation, schools are settling down to regular work and the diminished attendance rolls are beginning to fill.

2. No increase in the number of schools has taken place since last year, but an apparent difference in the total occurs owing to the adoption of the altered classification and revised forms of Educational returns prescribed by the Government of India. There were at the end of the year 1,055 schools with 34,378 pupils, against 928 schools and 34,797 pupils the previous year.

3. The trifling loss in pupils is traceable almost entirely to Aided schools, as may be seen from the subjoined statement:—

Year.	Government—		Aided—	
	Schools.	Pupils.	Schools.	Pupils.
1877—78	800	25,781	128	9,016
1878—79	875	25,620	180	8,758

The pupils attending Government and Aided schools consist of 30,636 boys and 3,742 girls.

4. According to creed and nationality there are 28,279 Hindus, 3,577 Muhammadans, 1,302 Europeans and Eurasians, 1,049 Native Christians and 171 others.

5. It has been usual to present the figures for the preceding year in juxtaposition with those for the year under report. This arrangement will be adhered to as far as possible, but exactly comparative statements are rendered impracticable on account of the re-classification of the schools. Rather than omit all comparison of statistics, I have, at the risk of some appearance of inaccuracy, re-cast last year's returns according to the new nomenclature and presented side by side the figures for this and last year.

6. Following the classification recently prescribed by Government and omitting all schools not under regular inspection, the subjoined statistics are obtained:—

Class of Institutions.			1877—78.		1878—79.	
			Schools.	Pupils.	Schools.	Pupils.
University		Colleges	4	1,094	4	92
Boys ...	Secondary ...	High Schools, English	10	1,600	14	574
		Middle do do	78	5,436	24	1,129
		Middle do Vernacular			82	1,183
Girls ...	Secondary ...	High do English	4	547	1	17
		Middle do do	10	723	6	151
		Middle do Vernacular			7	114
Boys ...	Primary	English	775	22,125	32	2,095
		Vernacular			827	25,323
Girls ...	Primary	English	36	2,202	6	252
		Vernacular			43	2,625
Special Engineering, Normal and others			11	1,073	9	823
		Total.....	928	34,797	1,055	34,378

7. Separating Government from Aided schools we have the following :—

	1877—78.		1878—79.	
	Schools.	Pupils.	Schools.	Pupils.
Government	800	25,781	875	25,620
Aided	128	9,016	180	8,758
Total.....	928	34,797	1,055	34,378

8. Schools for Europeans and Eurasians furnished the following details :—

Class of Institutions.			1877—78.		1878—79.	
			Schools.	Pupils.	Schools.	Pupils.
University		Colleges	1	13	1	15
Boys...	Secondary	High Schools	3	386	3	78
		Middle Schools	2	66	4	152
Girls...	Secondary	High Schools	3	200	1	17
		Middle Schools	2	86	5	137
Boys...	Primary	Primary Schools	3	227	8	405
Girls...	Do	Primary Schools	1	22	5	152
		Total.....	15	1,000	27	956

General Financial Statistics.

9. The expenditure for the year under the different budget headings is summarized below :—

Head of Charge.	Provincial.	Local.	Municipal.
Direction	16,067	...	...
Inspection	20,867	9,342	...
Government Schools	1,26,455	76,856	2,527
Aided Schools	48,059	...	...
Scholarships	1,332	...	...
Miscellaneous	22,249	5,558	...
Total... ..	2,35,029	91,736	2,527
		3,29,292	

10. By adding the private expenditure from other sources which amounted to Rs. 93,658, a grand total is obtained of Rs. 4,22,950. The details of the expenditure on instruction in the various grades of Government and Aided colleges and schools, are exhibited in the following statement :—

Class of Institutions.			Government.		Aided.	
			From Provincial Funds.	From Local Funds.	From Provincial Funds.	From Other Sources.
University	...	Colleges	20,274	...	2,160	1,440
Boys... Secondary	...	High Schools, English ...	23,441	708	3,073	11,320
		Middle do do ...	13,285	1,005	5,431	16,185
		Middle do Vernacular ...	9,026	...	3,579	4,660
Girls... Secondary	...	High do English	...	...	600	612
		Middle do do ...	...	...	2,619	6,505
		Middle do Vernacular ...	339	76,836	362	348
Boys... Primary	...	English ...	10,536	351	9,056	17,995
		Vernacular ...	36,705	463	9,062	10,852
Girls... Primary	...	English ...	...	...	2,508	9,155
		Vernacular ...	4,081	...	7,859	13,230
Special	...	... ...	14,369	...	1,750	1,358
		Total.....	1,32,056	79,363	48,059	93,658

11. Of the amount in column 2, Rs. 2,527 were expended from Municipal funds, *viz.*, Rs. 708 on High Schools, English ; Rs. 1,005 on Middle English schools, and Rs. 814 on Primary English and Vernacular schools. Grants-in-aid bore to the whole Government expenditure on instruction the ratio of 18·5 per cent.

12. *Receipts.*—For Government schools the receipts amounted to Rs. 1,45,392, which sum was made up of Rs. 14,493 from fees, Rs. 14,082 proceeds of book sales, Rs. 1,14,290 Educational share of Local Fund collections and Rs. 2,527 contributions from Municipal funds.

13. In Aided schools the receipts are returned at Rs. 93,658, of which Rs. 36,960 were derived from fees against Rs. 31,485 reported last year. The returns from Unaided schools are altogether omitted.

14. Adding together the receipts from all sources we obtain a grand total of Rs. 2,39,050. Of this sum Rs. 54,453 were paid in fees by the pupils.

15. The fee income from Government institutions shews a falling off of Rs. 2,679. Almost the whole of this deficit is accounted for in the diminished receipts at the Engineering School, the Central College and High School, Bangalore, and the Maha Raja's College and High School, Mysore. At the Engineering School the receipts are less by Rs. 1,015 than they were last year. This is owing, as elsewhere explained, to two causes, the departure of 7 out of 11 students, and the reduction of the fee paid by the remaining men from Rs. 15 to Rs. 10, the latter being the rate fixed for students who had satisfactorily completed their first year's course of study. The Bangalore Central College and High School total is lower by Rs. 500 than last year. At Mysore the Maha Raja's College and High School together shew loss to about the same amount. The remission of fees to poor boys appears to be the explanation. Many deserving boys, some of them having come from a distance for the sake of higher education, after working their way up to the High School and College classes, found themselves, during the famine, hard pushed to find food. One meal a day was in several cases all that could be afforded. To refuse some relaxation at such a crisis would be unnecessary harshness. Fee payments are now being enforced as usual.

16. *University Education* shews no change except a difference of 8 students. The tabular statement makes it appear that there were 92 students against 1,094 the previous year. But the real difference is 92 against 100. The larger number of 1,094 was obtained that year by including with College returns pupils attending High School classes. For instance the Bangalore Central College returned 101 students in

1877—78, but of these 44 belonged to the Matriculation class, leaving 57 actually on the College rolls. This year there are 60, consequently in that particular College a slight increase has taken place. The loss is traced to the Maha Raja's College, Mysore.

17. *Secondary Education* by absorbing the numbers withdrawn from college returns as explained above, shews a gain, but the actual figures are almost stationary.

18. *Primary Education* has also remained unaffected.

19. *Schools for Europeans and Eurasians* are shewn separately. It will be seen that schools are provided for every grade of general education for boys and girls. The largest number is very properly in Bangalore where Government aid is extended to institutions of various religious persuasions. Special instruction at the Engineering School is also open to this class as well as to Natives for whom it is more particularly intended.

20. *Re-organized Inspection Agency.*—The steps taken for reorganizing the inspection agency for the coming year may be gathered from the following circular order issued from this Office in March.

Circular Orders regarding the inspection of Schools.—Under the orders of the Government of India, the following arrangements for the inspection of schools in Mysore will come into operation from the 1st April 1879 :—

(1.) Schools above Primary and Middle will be inspected by the Director as Inspector General.

(2.) Primary and Middle schools, excepting Hobli schools, will be inspected by Deputy Inspectors.

(3.) Hobli schools will, as heretofore, be inspected by Sub-Deputy Inspectors, as well as Hindustani schools.

(4.) There will be five Deputy Inspectors, with the following charges :—

	Consisting of—	Head-quarters at—
South Circle	Mysore and Hassan Districts	Mysore.
East Circle	Bangalore and Kolar do	Kolar.
West Circle	Shimoga and Kadur do	Shimoga.
North Circle	Chitaldroog and Túmkúr do	Túmkúr.
Bangalore	Bangalore Town and Cantonment	Bangalore.

(5.) The two Sub-Deputy Inspectors of Hindustani schools will be attached, one to the East and South Circles and Bangalore, the other to the West and North Circles.

(6.) The 15 Sub-Deputy Inspectors of Hobli schools will be distributed as at present, namely :—

Charge.	Station.	Charge.	Station.
Bangalore East	Bangalore	Hassan West	Hassan.
Bangalore West	Magadi	Hassan East	Kadaba.
Kolar South	Hoskote	Shimoga West	Ságar.
Kolar North	Sidlagatta	Shimoga East	Shimoga.
Túmkúr North	Sira	Kadur West	Chikmagalur.
Mysore West	Mysore	Chitaldroog North	Chitaldroog.
Mysore East	Chamrajnagar	Chitaldroog South	Hosdurga.
Mysore North	Seringapatam		

(7.) Sub-Deputy Inspectors will forward reports through their Deputy Inspectors, who will transmit the same with endorsement and remarks to the Director. Deputy Inspectors will report on their inspections to the Director, sending duplicates of such parts as are not exclusively departmental to the Deputy Commissioner of the District for information.

(8.) In conducting the examination of schools, all inspecting officers will adhere to the standards recently laid down by the Government of India, as explained in circular orders of this Office dated the 8th instant.

(9.) They will also adopt the marking system introduced in 1873-74, which is as follows:—

The school studies being assigned to the three main heads, (1) Language, (2) Mathematics, (3) History and Geography or other knowledge—a maximum of 100 marks will be allotted to each. An equal number of questions being put to all the pupils in a class examined in the same subject, every pupil who obtains one-fourth of the marks assigned to the sub-division of a head, and one-third of the aggregate of that head, will be considered to have passed in it. One who passes in all heads of the standard examined will have fully passed in that standard.

(10.) Promotion of pupils from one standard or class to another will be made by inspecting officers, and only pupils fully passed in any one standard will be eligible for promotion to another.

(11.) Deputy Inspectors are required to visit Government schools at intervals of not more than six months, or twice a year, and Aided schools at least once a year. Sub-Deputy Inspectors of Hobli schools will visit their schools at intervals of not more than four months, or thrice a year.

(12.) Inspecting officers will be expected to provide themselves with serviceable ponies or horses, to enable them to visit all parts of their Circles without impediment.

21. A register is kept in the Director's Office of all inspections made by the Deputy Inspectors who keep similar record of the work done by Sub-Deputy Inspectors. By these means the results, as far as they can be gauged by figures, may be tabulated, and an even distribution of inspection visits is maintained preventing the neglect of schools remote from Head-quarters or difficult of access.

II. CONTROLLING AGENCIES.

22. *Direction.*—The post of Director was occupied by Mr. Rice until the end of the official year. On the 8th April he handed over to me charge of the office and availed himself of fifteen months' furlough to Europe.

23. *Inspection.*—I returned in June from three months' absence on privilege leave on medical certificate, and resumed my duties as Inspector of Schools, First Circle. In order to give effect to certain measures of reduction, I was gazetted in November by the Government of India to act as Inspector of Schools in British Burma and was actually on my way to embark when the transfer was cancelled. I returned to my former appointment at Mysore and remained there until the close of the official year.

24. The Second Circle of Inspection was in charge of Mr. Candy, the Head Master of the Maha Raja's High School until the 15th January. But from the 15th November he was absent on privilege leave on account of ill health and the current duties of this office were attached to those of the Director.

25. Mr. Marsden who held the appointment substantively returned from Europe, whither he had been on fifteen months' leave on medical certificate, on the 29th January and was transferred to Coorg as Principal of the Mercara Central School.

26. From the 1st April the new scheme for inspection came into operation. In the place of two European Inspectors five Deputy Inspectors have been appointed to the charge of five circles as specified below:—

Name.	Grade.	Circle.	Area.	Number of Schools.
Mr. B. Venkatpataiengar ...	1st	East	5,491	63
„ W. Grieveson	Do	Bangalore Town ...	...	44
„ D. Subbaiya, B. A.	2nd	South „	7,419	48
„ B. Desikachar	3rd	West	6,091	31
„ V. Nadamuni Naidu ...	Do	North	8,077	40

27. The number of schools in the East Circle exceeds that in the other circles; this is owing to the establishment in the Kolar District of Telugu schools in the same stations with the Kanarese. The apparent excess therefore is no objection to the formation of the circle.

28. For the Town of Bangalore it is desirable to have a European or an East Indian Deputy Inspector.

29. The newly created appointments have been formed into three grades with progressive rates of pay:—

	Minimum Rs.	Maximum Rs.
1st Grade	150	200
2nd Do	100	150
3rd Do	75	100

30. The following is a summary of the cost of the new arrangements:—

Five Deputy Inspectors	7,500
Writers and Peons	1,380
Travelling and Contingent allowances ..	780
	9,660

31. Under the above arrangement each Deputy Inspector whose special duty is the supervision of Primary and Middle schools has about 45 schools for which he is directly responsible besides exercising a general control over Sub-Deputy Inspectors having about 160 Hobli schools for inspection.

32. High Schools are inspected by the Director as Inspector General.

33. Sub-Deputy Inspectors in charge of Hobli schools are distributed as follows:—

Hobli Sub-Deputy Inspectors.

Name.	District.	Station.	Number of Schools.
Srinivasaiengar	Bangalore East	Bangalore ...	51
Venkatramanaiya	Do West	Closepet ..	41
Dakhshina Múrti	Kolar South	Hoskote ..	56
Rangaswami Iyer	Do North	Sidlagatta ...	53
Venugopal Naidu	Túmkúr North	Sira ...	43
Srinivas Tatachar	Túmkúr South	Kadaba ...	32
Venkatnarnaiya	Mysore West	Mysore ...	42
Dasappa	Do East	Chamrajnagar ...	46
Múrti Rao	Do North	Seringapatam ...	51
Venkat Rao	Hassan West	Hassan ...	50
Puttappa	Shimoga West	Ságar ...	38
Tirumalachar	Do East	Shimoga ...	44
Subba Rao	Kadur West	Chikmagalur ...	46
Applachar	Chitaldroog North	Chitaldroog ...	32
Timmappa	Do South	Hosdurga ..	28

34. For the inspection of Hindustani schools there are two Sub-Deputy Inspectors.

Hindustani Sub-Deputy Inspectors.

Name.	District.	Station.	Number of Schools.
Khaja Mahomed	East and South Circles and Bangalore	Bangalore ...	
Syed Mustafa	West and North Circles ...	Shimoga ...	

35. Departmental changes and an unusual amount of sickness amongst all grades of inspecting officers, have interfered with inspection work; but at the time of writing this report everything is working smoothly and the general health is improved.

III. UNIVERSITY EDUCATION.

36. In accordance with the recent orders of the Government of India, schools educating up to the F. A. standard are classified as 2nd grade Colleges instead of appearing in the returns as Collegiate schools. By this change of nomenclature the number of Colleges in the Province is increased from two to four.

	Rate of Monthly Fee.	Average Number on the Rolls.
Government—		
Bangalore Central College	Rs. 2 to 4	48
Mysore Maha Raja's College...	Rs. 2 to 3	18
Shimoga College	Rs. 2 to 3	7
Aided—		
Bishop Cotton's College, Bangalore	Rs. 5 to 10	15

37. No additional expenditure has been incurred with the change. The title of Principal is accorded to the head of a full College only: at 2nd grade Colleges the Head Masters retain their former designation.

38. Here, as in other parts of India, those who have passed the entrance examination find it more and more difficult to qualify themselves for any profession unless they go forward to a University degree. Amongst the students in the Bangalore Central College are to be found young men from the most remote parts of the Mysore as well as from Coorg, an unquestionable proof of the value attached to Collegiate instruction.

39. *University Examinations* were held at Bangalore, Mysore and Shimoga, the Head-quarters of the three Divisions of the Province. The year was one of unprecedented failure. At the entrance examination the number of unsuccessful candidates was 80 per cent; at the F. A. 55·26 per cent. But at the B. A. examination none failed. Greater confidence would be felt in these examinations if the standard were more constant. The number passed is shewn below:—

Matriculation Examination, December 1878.

Schools.	Number of Candidates.			Total.
	Presented.	Passed.		
		First.	Second.

Maha Raja's College, Mysore ...	1	...	...	† 1	1
Total.....	3	...	...	3	...

†Two others educated in this College appeared after a course of private study and passed the B. A. degree examination.

40. *College Reports.*—The following accounts are taken from the annual reports of the Bangalore Central College and of the Head Masters, Mysore and Shimoga Colleges.

41. *Bangalore Central College.*—There was no change in the staff until the end of the year when Mr. Srinivas Rao who had acted as Translator in the Chief Commissioner's Office, resumed charge of the sixth class, and Mr. Krishna Rao was transferred to Shimoga. The average daily attendance shews a slight falling off since last year. This is attributed to the famine and the change to midday school hours, but there is reason to believe that the new school hours are becoming popular.

42. The expenditure of the College amounted to Rs. 14,184, of which Rs. 533 were contributed by fees. Regarding the fee income Mr. Waters remarks—"The College fees defray but a small fraction of the expenditure. After strictly investigating the circumstances of individual boys, so many seem quite unable to pay fees, and I have been obliged to split up the Government allowance for scholarships into a number of small ones, the recipients of which have been almost exempted from paying fees. Others have been allowed to be free. I hope to be more strict in enforcing payment of fees and to reduce the number of the scholarships by increasing the value of each, but I fear some students will consequently be unable to continue their studies. I believe some would not be able to provide themselves with the necessary expensive books, but for the help of friends on whom also they often depend for support. I think the boys here are really poorer than in other parts of India." The following is a summary of the scholarships given away :—

College ...	Ordinary	Rs. 50 divided amongst 17 students.
	Special	„ 15 } For B. A. students who ap-
By Mr. Venkat Vardaiengar		„ 30 } pear for examination in 1880.
„ „ Rangacharlu		„ 5
Palace Scholarship		„ 7½
Dobbs' Scholarship		„ 7

" Our single student in the senior B. A. class left during the year and graduated from Madras. Two others who had read for the degree in previous years at the Central College also passed, one being at the time a master in the College. In the First in Arts we passed 12 out of 25 which is comparatively creditable. The class was strong in English and Physiology, but weak in Mathematics and Optional Language, the latter being too much neglected by native students. Physiology which presents many difficulties to a native student was well studied and Mr. Bhabha took great pains to make it intelligible. The anatomical casts have come and will be useful."

43. *The Maha Raja's College, Mysore.*—Mr. Leonard acted as Head Master from October 1877 until the middle of January 1879, when Mr. Candy who had been acting as Inspector of Schools, Second Circle, resumed charge. At the close of the year the College lost the services of Mr. Cress, the 2nd Assistant, who was promoted to the Headmastership of the High School, Chikmagalur. For the last 16 years he has belonged to this institution as pupil and teacher, and has always shewn himself cheerful and painstaking in the discharge of his duties besides co-operating heartily with the students in their sports.

The number on the rolls at the end of the official year was 12. Fees produced Rs. 164.

" Six candidates were sent up for the F. A. and two passed. Three others appeared on their own responsibility, but failed. Another successful candidate, A. Rama Rao, had been sent up from Mysore in 1876, when he failed. He was appointed Assistant Master at Mercara High School, and in 1878 after two months study here he appeared and passed. Of the successful students, one, Venkatsami is now a teacher in the Wesleyan Mission High School, Mysore; the other, T. Subba Rao is reading for his B. A. degree at the Madras Christian College. Three former pupils graduated this year as Bachelors of Arts.

		Passed F. A. from this institution in—
1.	K. Ramasami	1873
2.	S. Cress	1871
3.	M. A. Krishnaiengar	1872

The present senior F. A. class is not a large one, but consists of industrious and intelligent students of whom I entertain great hopes."

44. *Shimoga College* has not taken a good place this year. It sent up two candidates for F. A. and 7 for Matriculation, all of whom failed. In explanation it is stated that the students were not regular in their attendance especially in the months immediately preceding the examination. It should also be stated that the teaching staff is not so strong as at other institutions of this grade. Mr. Clapham acted as Head Master until the 24th January, when Mr. Leonard resumed charge. Mr. D. Subbaiya, the 1st Assistant, was promoted to a second class Deputy Inspectorship at the end of March, and Mr. G. Krishna Rao from the Central College, Bangalore, took his place.

45. Scarcity of funds has compelled the observance of such rigid economy that it is to be feared the proper action of the institution has been somewhat checked. When the finances allow of it, money would be well bestowed in strengthening the teaching staff, making needful additions to the very meagre library and supplying necessary apparatus for illustrating lessons on Physics.

Aided Colleges.

46. *Bishop Cotton's College.*—As in former years Dr. Pope takes the college classes and is assisted by Mr. Flynn, who has taken the place of Mr. Taylor formerly holding this position. The remaining classes are under Mr. Cox and three other masters. Mr. Rice, the Director of Public Instruction, who inspected it in December 1878, states that real work is being done and a good system maintained. At the university examination two students passed the F. A. Fees produced Rs. 1,440.

IV. SECONDARY EDUCATION.

Government High Schools.

47. The Report for 1878—79 placed in this rank, under the name of Higher class schools, five Anglo-Vernacular schools that taught up to the Matriculation standard. By adding to the list the three High schools which are attached to the Colleges of Bangalore, Mysore and Shimoga, the number is increased to eight. Some of these schools have this year failed to come up to the appointed standard, but it is not to be expected that every school of this grade will send up candidates year by year. The diminished success has been universal throughout this Province and the Madras Presidency, and is not due to improper classification. Cruel disappointment has been caused by the wholesale massacre of Matriculation candidates; out of 2,647 registered, only 356 matriculated. But when the time comes for the formation of the F. A. classes next year, good results may be expected in the superior attainments of the men admitted and in the better preparation for future examinations.

48. In 1877—78 there were 5 schools with a total attendance in High school classes of 449, giving an average of 90 to each school. For the year under report there are 8 schools with a total of 286 pupils which gives an average of 36.

49. *Bangalore High School* had on its rolls at the end of March 89 pupils. The income from fees amounted to Rs. 1,134. Out of 23 candidates, only 4 matriculated. Mr. Waters says "Pupils and Teachers must partly be blamed for this bad result, but I feel that one or two would have passed in previous years."

50. *The Middle School* contains 171 pupils. Saturdays are generally devoted to examinations in the week's work. At the end of each term also, as far as possible, written examinations are held. The papers are mostly set by the masters of the College, but several gentlemen are in the habit of contributing papers. A Reading Room is kept up by subscriptions from masters and students. English and Indian papers and periodicals are purchased and some are lent by friends. The students have also access to the College Library. "The united schools athletic sports were very successful, but not many prizes were gained by Native boys."

51. *Chikmagalur High School* declined seriously during the year in standard and attendance. The Inspector reports—"There is no Matriculation class and there seems to be no prospect of one being formed next year, for class I is a very bad one" At the end of March the attendance was only 6. Fees produced Rs. 41. The unfavorable condition of the school is largely due to a change of Head Master during the year which appears to have had a bad effect, and the First Assistant has not given satisfaction. Steps have been taken to correct this state of affairs. In December Mr. Samuel Cress, B. A., took up the post of Head Master and has energetically set to work re-organizing the school.

52. *The Middle School* with 58 pupils was in a state just as unsatisfactory as the High School, but is now on the road to improvement. Fees produced Rs. 116.

53. *Chitaldroog High School* when examined in January was found to have fallen off, but as it had suffered terribly from sickness, this result is not surprising. Out of 6 pupils sent up, 1 matriculated. The registered attendance at the end of March was 19. Fees produced Rs. 127.

54. *In the Middle School* there were 29 pupils. Fees produced Rs. 61. The Inspector reports that when he visited the school the Head Master shewed him a list of 88 pupils who had died or left the place, on account of the ill health of themselves or their relatives. One class, it is reported, "for seven months existed only in name as all the pupils and the master were down with fever:" in another class, only one boy has been able to attend regularly. "Two of the most promising boys died" and so on throughout the school. The public health of the place has since improved.

55. *Hassan High School* has an attendance of 27 boys. Fees produced Rs. 237. Four candidates appeared for the Matriculation examination, and one passed. Notwithstanding the failure which as shewn elsewhere is due to exceptional causes, this school is a good one. Mr. Arbuthnott, B. A., and his Assistants have worked well during the year.

56. *Kolar High School* has not been well managed. At the end of the year it had 8 pupils and its income from fees was Rs. 33. Changes have been made in the teaching staff, and Mr. Coleman who was very successful at Chitaldroog and Túmkúr has been placed in charge.

57. *The Middle School* classes number 44 pupils and raised by fees the sum of Rs. 200. Being under the superintendence of the High School Head Master, an improvement may be counted on.

58. *Maha Raja's High School, Mysore*, until the middle of January was in charge of Mr. Leonard, whilst Mr. Candy was acting as Inspector of Schools in the Second Circle. Of 14 candidates who went up for Matriculation, 6 passed. Considering that only about one-seventh of the total number of candidates were successful, the proportion passed by this school (which stands this year at the head of all the institutions in the Province) is very good. Fees amounted to Rs. 645.

59. The Europeans and Eurasians do not take a very high place in the school. They have all neglected the study of Kanarese so much as to be unable to read it with the class to which they belong. Mr. Candy has made it compulsory for them to attend a special class which was opened by Mr. Leonard. Several Muhammadan boys take a very good place in Kanarese and there are some very promising boys amongst them.

60. The Library has been steadily improved by the addition of about 70 useful books of reference, and good use was made of it by the masters and students. Athletic sports took place in the Residency Park during the Maha Raja's marriage festivities. Several cricket matches were played during the season with the other schools. In response to the Maha Raja's kind promise to provide the necessary apparatus for gymnastics, an estimate for nearly Rs. 300 has been prepared and the work put in hand.

61. *The Middle School* department contained 88 pupils who paid in fees Rs. 614. This and the High School when inspected just before the hot weather vacation shewed every indication of activity and efficiency.

62. *Shimoga High School.*—Mr. Clapham acted as Head Master until January when Mr. Leonard who had been acting for the Head Master of Maha Raja's School, Mysore, resumed charge. Seven pupils went up for the Matriculation, but all failed. As a partial explanation of this complete failure, it is stated that the boys were not regular in their attendance especially in the months immediately preceding the examination.

63. Fees produced Rs. 401. There appears to have been unnecessary laxity in levying school fees and an undue proportion of free scholars. The appointed scale is now enforced. From want of funds this important school has not been kept well supplied with library books, apparatus for illustrating lessons on physics, and with gymnastic appliances: unfortunately the present state of the finances compels further postponement. The boys keep up a cricket club and Mr. Leonard has started swimming and athletic clubs. The boys are fond of exercise and are all the better for it.

64. *The Middle School* contains 84 boys. Rs. 581 were collected from fees. The classes forming this school are in good working order. At the annual examination about 30 per cent were fully passed. The teaching staff is not quite strong enough for the proper tuition of every class.

65. *Túmkúr High School* did well at the annual inspection. One candidate passed, ranking first in the second class. Fees produced Rs. 293. Mr. Coleman had charge until January when Mr. Clapham returned from Shimoga.

66. *The Middle School* had on its books 29 names and its fee income was Rs. 203.

Aided High Schools.

Bangalore:—

67. *The Wesleyan Mission High School* containing 99 pupils, sent up 14 candidates for Matriculation, of whom 1 was successful.

68. *The Middle School* division has 111 pupils. About one-fourth of these are Tamil-speaking boys for whose instruction in their vernacular provision is made. There are also a few Muhammadans; some of these took a very good place in the highest class at the annual examination. In Geography there is a general backwardness. The maps in use are not the most suitable that could be procured for school purposes, being faintly colored and too crowded with names. Viewed as a whole this important institution seems to be carefully and methodically conducted. The Revd. Mr. Guilliford has had charge throughout the year.

69. *The London Mission High School* passed 3 out of 12 at the Matriculation examination. When inspected in December, the 6th class shewed great inequality and two or three boys were decidedly unfit for this grade.

70. *The Middle School* contains 104 pupils. At the annual examination most of the classes did very well. The junior classes evidently receive careful superintendence. There is some very good apparatus in the school in the way of desks with reversible backs, black-boards, relievo maps, &c. The school has been in the charge of the Revd. E. P. Rice, B. A.

Mysore:—

71. *The Wesleyan Mission, High School.*—Out of 17 sent up, 2 passed the Matriculation examination. The 6th class did fairly when examined in March.

72. *In the Middle School* there are 92 boys divided into four classes. Promotions had been made rather too easily and the standard aimed at had in one or two classes been lost sight of. The school maintains its position. For the greater part of the year the Revd. Mr. Sawday was in charge.

Government Middle Schools.

73. Under the old gradation there were in 1877-78 five Middle class Anglo-vernacular schools with a total of 172 boys. According to the new classification there are 12 English Middle schools with 568 boys. No new schools of this grade have been opened: the additions to this list are obtained by the transfer of the classes hitherto incorporated with higher grade schools. Reports on such Middle schools appear in connection with the High schools to which they are affiliated.

74. There remain four separate Middle schools; of these the one at Chikballapur is still the largest. Channapatna school fluctuates, but on the whole does its work fairly. Gundlupet is well conducted. Húnsúr does not give satisfaction.

The sum of Rs. 3,883 was obtained in fees.

Aided Middle Schools.

Bangalore:—

75. Belonging to this grade, there are three, *viz.*, the London Mission Cantonment School, the London Mission Alsur School and the Broadway School.

Secondary Education for European and Eurasian Boys.

76. *Bangalore:—Bishop Cotton's High School* was inspected in December, when 33 out of 37 pupils were present. Being close upon the time for the University examinations and the Christmas holidays, the Matriculation classes, senior and junior, were engaged in a written examination conducted by Dr. Pope. It was unnecessary to interrupt this work, but the answer papers were looked over and shewed that real work was being done.

77. At the Matriculation examination, out of 17 sent up, 4 passed.

78. The two classes forming the *Middle school* aggregate 31 pupils. A good system is maintained. The provision of suitable aids and apparatus in the selection of the newest school books, maps, &c., is a feature to be specially noted. The institution altogether exhibits evident signs of prosperity.

79. There are 30 boarders in these schools.

80. *St. Andrew's High School* was inspected in November. The senior and junior Matriculation classes contained together 20 pupils. The general condition of the school is commendable. Three candidates passed the Matriculation out of 10 presented.

81. The roll of the *Middle school* bore 65 pupils. The arrangements are judicious and the work of each class is carried on satisfactorily under the systematic supervision of Mr. Thompson.

82. *St. Joseph's Catholic High School* has 21 pupils in the High school classes, but none have matriculated.

83. *The Middle school* contains 41 pupils.

84. *Bangalore St. John's Middle school* attended chiefly by the children of European pensioners numbers 15 pupils. The annual inspection in February exhibited favorable results. Except Euclid all subjects had been well taught.

85. The two other schools belonging to this grade are St. Mary's and St. Patrick's Roman Catholic Schools.

High School for Girls.

86. The only school that has reached this grade is *Bishop Cotton's High School, Bangalore.* When inspected in December, there were 41 girls, of whom 17 formed the Matriculation class. The latter were taught by Dr. Pope with the boys. Out of 3 girls sent up none passed this year.

87. The *Middle school* consists of two classes with 38 girls. Considerable disparity of attainment was apparent, but the majority of the girls did well in the subjects taken up for examination. Both money and good judgment have been used in the supply of apparatus and the arrangements generally. The good order prevalent and the pleasing manners of the pupils deserve remark. There are 11 boarders in this school.

Middle Schools for Girls.

88. *Bangalore*:—*St. Andrew's.*—Classes I to III with 45 girls form the *Middle school.* Mr. Thompson, Head Master of the Boys' school, gives lessons in Arithmetic and Mr. Zcherpel teaches music. At the inspection held in December, 40 per cent fully passed in class I, and 19 per cent in class II. It should be stated that the teacher of this class was absent and had been away some short time back on leave. Some excellent plain and fancy needlework done in the school was shewn. Also writing books containing exercises in paraphrasing. The hand writing, except in one or two cases where it was too angular to be easily legible, may be described as neat and good. Some maps drawn by the girls were shewn illustrating the travels of St. Paul. These were very poor. Some better wall maps might be supplied; one or two hanging up appeared of a very ancient type. For Geography lessons the girls use small atlases.

89. On the whole the school has made encouraging progress and is attended by a promising class of pupils. Miss Millard and her assistants are using every effort for its improvement. There are 10 boarders, of whom 5 are little boys.

90. *Convent School.*—There were 12 girls examined under the *Middle school* standard who did fairly in most subjects.

91. *St. John's School* presented 15 girls in two classes. "The girls of the 1st and 2nd classes did very well in all subjects and had evidently been carefully taught. Eight of them are going up for the Teacher's examination next December; five for the

second and three for the third grade." Last year three pupils were successful in the third grade examination. Miss Brignall, the Head Mistress, holds a first grade teacher's certificate. She is an old pupil of the school.

92. *Wesleyan Mission School.*—The first class is taught by Miss Whitwell who holds a first grade teacher's certificate. Twenty-five girls in two classes came up for examination under the Middle school standard. The girls did very well in all subjects but Arithmetic. Only one or two worked an easy sum in reduction. Last year one pupil passed the Teacher's examination, first grade; two, the second grade: and, two, the third. This year 13 are going up for the examination.

93. *Mysore:—St. Bartholomew's School* is a mixed school for the European and Eurasian children of the town of Mysore. The Middle school has 10 girls and 4 boys. Miss Boyton is a well qualified mistress and takes great interest in her work. Class-singing on Hullah's system is taught with fair success. A circulating library containing about 100 volumes has been established and seems to be appreciated by the pupils and their parents. Up till March seven Roman Catholic children attended the school, but these were withdrawn on other arrangements being made for their instruction by the Roman Catholic Mission.

Aided Sanskrit Schools.

94. These are 12 in number, being one less than last year through the withdrawal of the grant enjoyed by the Viniya Bodhini at Chamrajnagar. An impression exists that Sanskrit schools are principally engaged in teaching religion. This is an entirely erroneous opinion. On this subject Mr. Rice has elsewhere stated—"The course of study in all without exception is *Sahitya*, or literature, followed by either *Tarka*, logic, or *Vyákarana*, grammar. The Sanskrit language in short is the object and end of the instruction given. No doubt this is regarded as a sacred language, but it is not studied in sacred books, that is books designed to inculcate religious doctrines. The books read in all the schools are poetical works increasing in difficulty up to the plays or dramatic poems." Of these institutions the best are at Melkote, Mysore, Chikballapur and Muttur. The Melkote Sanskrit Vidyasale has on its rolls the names of 82 students. It is well managed by two learned Shastris and possesses a valuable library comprising upwards of 1,000 works chiefly in manuscript. The Mysore Vidyasale has been about 5 years in operation. During that time it has, under vigorous management, grown into an important school. The Shastri at its head is a man of enlightened and liberal views. In the hope of encouraging the cultivation of the neglected Jaina literature, assistance was extended to two Jaina schools at Shravanbelgola and Chamrajnagar. From the latter school the grant has been withdrawn; and the state of the one at Shravanbelgola is disappointing, but may be revived. The pupils at Sanskrit schools are almost all Vaidika Brahmans.

Government Vernacular Girls' Schools.

District.	Schools.	Pupils.
Kolar ...	2	10
Chitaldroog.	1	8
	3	18

95. The best school of this grade is the one at Sidlagatta. A young Brahman widow employed as Pupil Teacher takes much interest in her work. The school at Chitaldroog has not altogether fulfilled expectations formed.

Aided Vernacular Girls' Schools.

District.	Schools.	Pupils.
Mysore ...	3	89
Hassan ...	1	7
	4	96

96. Of the three schools in Mysore, the Fort school may be mentioned as the best of this class of schools. The Inspector in his report of September last states that the three Mission schools, *viz.*, the Shivarampet, Mandipet and the Fort School take the lead amongst Girls' schools in Circle I.

V. PRIMARY EDUCATION.

Government English Schools.

97. Last year only five English, or Anglo-Vernacular, schools appeared in the returns as Primary. This figure is now increased to 13 by separating departments of Middle schools and returning them with Primary schools:—

District.	Number of Schools.	Number of Pupils.	Average.
Bangalore	2	156	78·
Kolar	2	64	32·
Túmkúr	1	46	46·
Mysore	3	139	46.3
Hassan	2	49	24·5
Shimoga	1	78	78·
Kadur	1	43	43·
Chitaldroog	1	16	16·
Total...	13	591	45·4

Aided Boys' Schools—English.

98. There are 19 schools of this description with an attendance of 1,504 pupils as shewn in the annexed table. The rate of monthly fee varies from 1 to 8 annas:—

District.	Schools.	Pupils.	Average.
Bangalore	17	1,250	73·5
Kolar	...	...	...
Túmkúr	...	254	...
Mysore	2	...	1·17
Hassan	...	...	...
Shimoga	...	...	...
Kadur	...	...	...
Chitaldroog	...	...	...
Total.....	19	2,504	79·1

99. The following tabular statement exhibits separately the schools intended specially for Europeans and Eurasians:—

District.	Schools.	Pupils.	Average.
Bangalore	8	405	5·6

Aided English Schools for Girls.

100. The only schools of this description are intended for the education of European and Eurasian girls, and are with one exception all in the Cantonment of Bangalore:—

District.	Schools.	Pupils.	Average.
Bangalore	5	242	48·4
Mysore	1	10	10
	6	252	42

101. The scale of fees ranges from 8 annas to 3 Rs. The sum collected during the year amounted to Rs. 6,941.

Taluk Vernacular Schools.

102. The number of Primary Taluk schools is 110 with, at the close of the year, 5,431 pupils. A uniform fee of 1 anna is levied which produced Rs. 3,020. The distribution of the Vernacular Taluk schools by Districts is shewn in the subjoined table:—

District.	Schools.			Pupils.	Average.
	Kanarese.	Telugu.	Hindustani.		
Bangalore	10	1	7	943	52·3
Kolar	10	6	5	747	35·5
Túmkúr	8	1	3	494	41·1
Mysore	12	...	4	998	62·3
Hassan	9	...	2	380	34·5
Shimoga	10	...	2	739	61·68
Kadur	8	...	2	510	51·
Chitaldroog	9	...	1	620	62·
	76	8	26	5,431	49·3

103. *Kanarese Schools.*—There are 76 Primary schools of this class with 4,221 pupils or an average of 55·5 each. Of these pupils 163 are girls. In last year's report, Sringeri was mentioned as having the largest number of Kanarese girls, but it no longer stands alone in its prominence. Harihar has 30 girls; Sringeri 25; Malvalli 14; in small numbers girls are attending Davangere, Nanjangúd, Tirthahalli, Yedatore and other schools. Perhaps the most noteworthy instance of educational innovation is the presence of 26 Muhammadan girls in connection with the Hindustani Boys' school at Sidlagatta. The services of the master of this school have been asked for at Virajpet in Coorg, where with the assistance of his sister a new Girls' school may be formed.

104. *Telugu Schools* have not got on so well as Kanarese schools principally for the reason that trained masters are not yet available. The number of Telugu schools is 8, with an attendance of 228 pupils.

105. *Hindustani Schools* are 26 in number with 982 pupils. These also lack the vitality apparent in Kanarese schools. The masters, as a class, are superior in attainments to the Telugu masters, and most of them have had a Normal school training, but the general poverty of the parents is put forward everywhere as a reason for irregular attendance. In some schools the 1 anna fee was reduced one-half and during the famine was largely remitted, but it is doubtful whether the minimum fee should any where be less than one anna. It has been found that a relaxation in levying fees has generally aggravated irregular attendance.

Hobli Schools.

106. Hobli schools shew a very slight increase of pupils. There are at the close of the year 653 schools with 16,776 pupils against 653 schools with 16,615 pupils the preceding year. This increase, slight as it is, may be regarded as a sign of returning prosperity amongst the agriculturists after the crushing effects of the late famine. Reviving activity is beginning to make itself apparent by applications for new schools, repairs to neglected school houses, and vigorously expressed complaints against certain masters who are not giving satisfaction. Discipline was relaxed under the presence of severe calamity, and it has not everywhere been fully re-established yet.

107. Attending Hobli schools there are 16,456 boys and 320 girls. According to creed there are 15,977 Hindus, 785 Muhammadans and 14 others.

108. The distribution of schools and pupils by districts, is shewn in the margin.

District.	Schools.	Pupils.	Average.
Bangalore ..	97	2,632	27·1
Kolar... ...	108	2,575	23·8
Túmkúr ...	70	1,876	26·8
Mysore	110	2,941	26·7
Hassan	77	1,602	20·8
Shimoga... ...	73	2,128	29·1
Kadur	58	1,360	23·4
Chitaldroog ...	60	1,662	27·7
	653	16,776	25·6

109. Last year it was noted that the average had fallen most in the Districts of Túmkúr, Chitaldroog, Bangalore and Hassan. This downward tendency has been checked in all but *Chitaldroog* and *Kadur* Districts. In the former although there is a slight decrease it is not general. Some very good schools are in operation of which the following are the best.

110. Siddapanhalli School with 48; Guddada Rangappanhalli with 47; Molkalmuru with 45; Rampura and Bommagaudankere with 42 and Racherlu with 36.

111. In Racherlu Hobli of Pavagada Taluk there is a desire for instruction in Telugu which will be met.

112. *Kadur.*—Schools are still backward in Balehalli, Kallushethalli, Kudarvalli and Lakya and parts of Chikmagalur where the grip of distress retained its hold longest, but the villages of Hulikere, Vastara, Basvanhalli, Mattavara and Malalur have excellent schools and others are rapidly improving.

113. *Shimoga District* still shews the largest average.

114. *Kolar District* betrays signs of imperfect supervision in the north, and *Bangalore District* has not recovered so rapidly as it should have done. *Hassan* in common with other districts in the Malnad presents peculiar difficulties which have been successfully grappled with, but great difficulty is experienced in obtaining school masters willing to work in these highlands. The offer of higher pay will not retain men from the plains as their health almost invariably fails. It is proposed to open a training school in the locality and admit only Malnad men.

115. The attendance which these schools draw, may be gathered from the following details.

116. There are three schools containing over 100 pupils, namely, Vadagenhalli, Siralkoppa and Belagutta; 3 schools with from 80 to 100 pupils, namely, Tyamagondal, Bellavi and Kubatur; 9 schools with from 60 to 80 pupils, *viz.*, Melkote, Sulibele, Hosur, Kora, Devanur, Talkad, Ajjampura, Mandli, Mangote; 13 schools with from 50 to 60 pupils, *viz.*, Kalkunte, Banasvadi, Dommasandra, Bidadi, Manchenhalli, Hebbalguppe, Ganjam, Palhalli, Kyatanhalli, Sosale, Hulikere and Holalkere. Next to these are 30 schools with from 40 to 50; 66 with from 30 to 40; 258 with from 20 to 30.

117. The attendance of girls is most numerous in the following Hobli schools, 20 at Melkote; 17 at Sindhughatta; 12 at Malur; 10 at Sulibele; 8 at each of the 3 schools at Manchanbele, Tiptur and Grama; 7 at each of the 3 schools at Kora, Udeyavara and Devanur; 6 at each of the 9 schools at Kuderu, Bonur, Yeladur, Dodhejjaji, Vadagenhalli, Yeliyur, Holalkere, Kubatur and Devarhalli; others have 5, 4, 3 and so on. Altogether there are 109 schools which count some girls with the boys.

Vernacular Girls' Schools.

118. Separate schools for Kanarese girls are established at the places shewn in the margin. Last year there were 11 schools and 468 girls. The additional school is at Chitaldroog. No fees are levied in any Vernacular Girls' schools, but I think the time has arrived for doing so at Bangalore and other large towns where the wealthy and well-born send their daughters regularly for instruction. Although the education of girls is unquestionably on the increase, the practice cannot yet be regarded as popular, and the schools opened for this

District.	Schools.	Pupils.
Bangalore	5	244
Kolar	4	138
Shimoga	2	90
Chitaldroog	1	32
	12	504

purpose require most careful treatment. Too much must not be expected of them. It has been advocated that Government should withdraw from this branch of education leaving it in the hands of Missionary and other agency assisted by grants-in-aid; but the 12 schools now conducted by the Department are almost all beyond the range of Missionary work. Efforts are being made to engage the services of Hindu women, chiefly Brahman widows, as teachers in these schools, but in this direction much caution is necessary.

Aided Vernacular Girls' Schools.

119. All except the Hindu Female School, Regimental Telugu Girls' School, Muhammadan Female Educational Institution and Madrasa Nisvan are under the management of Missionary Societies, Protestant and Catholic. A tabular statement is appended from which it will be seen that there are 31 schools with 2,121 pupils. Those under European management are most successful.

District.	Kanarese.	Tamil.	Hindustani.	Pupils.	Average.

	22	7	2	2,121	68·4

120. *Grants-in-aid.*—During the year the following new grant has been given:—

Boys' School.—Broadway Anglo-Vernacular School, Rs. 40.

121. In aid of the erection, repair or furnishing of school premises the following grant has been made:—

Building Grants.—Melkote Sanskrit School, Rs. 157.

122. *Grants stopped.*—The following grants were withdrawn or ceased for the reasons stated against each:—

	Rs.	
Anglo-Indian-Aid Association	100	Failing to comply with conditions.
Sanskrit School, Chamrajnagar (Viniya Bodhini)	15	Withdrawn on Inspector's report.
Hindustani School, Benkipur	7	

VI. SCHOOLS FOR SPECIAL OR TECHNICAL TRAINING.

123. There were in March nine institutions of the special class, *viz*:—

The School of Engineering, &c.,	Bangalore.
The Hindustani Normal School	,,
Aided Literary and Scientific Institute	,,
Aided Anglo-Indian Association School	,,
Five Jail Schools.	

124. *The School of Engineering and Natural Science*, which has been in operation since 1st May 1875, consists of an Upper and a Lower Department.

125. Mr. Lynam, C. E. had charge of this school during the whole of the year with Mr. Subbarayer, B. A., B. C. E., as Assistant. Mr. Cameron, the Superintendent of the Public Gardens, gave lectures on Botany. Mr. Gramatzki, who previously held the post of Principal, was, on his return from furlough to Europe, appointed to Coorg as 3rd grade Executive Engineer. At the examination of the Upper Subordinate Division, 2 out of 5 students passed the required test. One was appointed to the D. P. W. and the other to the Forest Department. The three candidates who failed have, I am informed, obtained employment in the Lower Subordinates' grade of the D. P. W. On the final examination of the Upper Subordinates' class, the examining Committee make the following report:—

(1.) "The number of students presented for examination was 5, of whom 3 were candidates for the Department Public Works and 2 for the Forest Department. Owing to one of the former (Kadarvelu) being attacked with chicken pox on the eve of the examination, as certified by the medical authorities, the date of the examination was postponed to the 10th of February to allow of his appearing.

(2.) The question papers, of which copies are attached, were obligingly set by the following Examiners :—

Geometry	..	Mr. A. G. King, B A.
Algebra	..	„ Krishnasami Iyer, B. A.
Trigonometry	..	„ Malhari Rao, B. A.
Applied Mechanics.	..	„ C. Waters, M. A.
Hydrostatics	..	
Hydraulics	..	„ E. R. Subbarayar, B. A., B. C. E.
Mechanics	..	„ W. P. Lynam, C. F.
Drawing	..	
Engineering	..	Captain C. Bowen, R. E.
Construction	..	
Materials	..	
Surveying	..	
Estimating	..	
Botany	..	Mr. D. E. Hutchins.

(3.) The detailed results, as exhibited in the number of marks gained by each candidate, are contained in the accompanying list from which it will be seen that out of a maximum of 1,050 marks the 5 candidates have gained as follows :—

1. C. Kadarvelu	..	577	Public Works.
2. M. Srinivas Rao	..	474	Forests.
3. V. S. Armugam	..	408½	Public Works.
4. B. Raghunathaiengar.		388½	Forests.
5. K. Ananda Rao	..	349½	Public Works.

One has thus gained over a half the maximum marks, and three others over one-third. These results do not come up to those of the corresponding examination of 1877. In individual subjects, Armugam has failed in Surveying and Levelling; Raghunathaiengar in that and in Mensuration and Estimating, while Ananda Rao has failed in four subjects.

(4.) We are of opinion that Kadarvelu is the only student who can be regarded as having passed a fair examination, and even his marks are not high. Srinivas Rao has a steady average and has done well in Botany. We would therefore pass him for the Forest Department. As regards the remaining three we do not consider them qualified to pass. Armugam has not only failed in a subject of the greatest importance to an Upper Subordinate of the Department of Public Works, but has very low marks in all the Engineering subjects. Raghunathaiengar hassimilarly failed in two essential subjects; while Ananda Rao has failed almost completely."

126. There are at present under instruction the following :—

Upper Department 4 students will complete the course in January 1880.
Lower do 6 do will complete the course in March 1880.

Up to the end of March 1879 the number of students who have completed the course of instruction and been admitted to the public service is 8 in the Superior grade and 6 in the Upper Subordinates' grade. Of the former five are Apprentice Engineers in the Public Works Department and three Probationary Assistant Conservators in the Forest Department. Of the latter, three were appointed to the Roads and Buildings' Branch of the Public Works Department, two to the Irrigation Branch and one to the Forest Department. Fees for the year produced Rs. 725 which is less by Rs. 1,015 than the sum levied the previous year. This is owing to a fall in the number of students from 11 to 4 and to the reduction made in the school fees levied from students during their second year's course of study.

127. In connection with other educational reductions it has been proposed to close this school and send selected candidates for this special course of training to the Civil Engineering College either at Madras or Poona.

128. It is gratifying to know that of the men passed out of this school all but one have been reported on in very favorable terms by their superior officers.

129. *The Hindustani Normal School, Bangalore* was the only training school kept up, all others having been closed the previous year in connection with retrenchments rendered necessary by the famine. It may here be mentioned that it is intended, the coming year, to re-open a training school for Hobli school-masters in the West where great difficulty is experienced in obtaining qualified men.

130. At the final examination of the Hindustani Normal school, two out of five students were declared qualified. The school was then closed and the services of the master transferred to the English Primary School, Bangalore, where he teaches a class of young Mussalman boys.

131. *The Literary and Scientific Institute* keeps up a circulating Library and Reading Room where lectures are occasionally delivered and discussions carried on. It is intended for the improvement of Europeans and Eurasians.

132. *The Anglo-Indian Association School* enjoyed a temporary grant-in-aid which ceased in December, the committee having failed to comply with the conditions upon which the grant was made.

133. Under instruction in five jails at the stations noted in the margin there are 660 convicts. Of these 600 were male convicts; 37 juvenile and 23 women. The following extracts are taken from the report made by Dr. Henderson, Superintendent of the Central Jail, Bangalore:—

	Jail Schools.		
Bangalore	2	...	347
Mysore	2	...	147
Shimoga	1	...	166

Education and employment in Jail.

"They are engaged at school for nearly four hours daily in the forenoon. After that they work in the garden, carry water, clean up and some go to learn a trade. There have been 2 at carpentry, 2 at press, and 2 at carpet work for most of the year and have made very good progress.

Their education goes on very well indeed, and some of them exhibit great intelligence, willingness and readiness at their lessons. The highest class read and write well, they can work out sums in fractions in English figures, they learn Grammar, Geography and Kanarese verses and have quite a small store of knowledge acquirements."

VII. SCHOLARSHIPS.

134. The sum of Rs. 1,332 was expended by Government for scholarships. The following statement shews the distribution for the year 1878—79:—

	Rs.
Colleges	970
High Schools	362
Middle Schools	
Primary Schools	0

135. There are also private scholarships of the aggregate value of Rs. 1,338 per annum, *viz*:—

	Rs.
Palace Scholarship	20
5 Do of 7—8—0 each ..	37½
3 by Mr. Venkat Vardaiengar, M. L. ..	30
1 „ Rangacharlu, C. I. E. ..	5
1 Dobbs' scholarship	7
8 Vernacular scholarships paid from the interest of Rs. 4,592 bequeathed by His Highness the late Maha Raja of Mysore	12

	No. of Scholarship.	Monthly Value.
		Rs.
Tenable at Bangalore	19	92
Mysore	27	62
Shimoga	4	13

VIII. EMPLOYMENT OF STUDENTS IN PUBLIC SERVICE.

136. No record has been kept of students who have passed into the service of Government, and many young men who have gone through the High Schools and Colleges of this Province I have been unable to trace. Appended is a list of some of the best paid appointments held by men educated in Mysore schools during the last 18 years. It is not complete, but is sufficient to shew the positions attainable by those who have qualified for Government employment. No entry has been made of any appointment worth less than 100 rupees a month. Besides these there are upwards of seven hundred holding minor appointments :—

137. In addition to the above list it may be mentioned there are ten Pleaders in receipt of large incomes.

IX. BOOKS.

138. *Stock.*—The value of the books in the Central and Branch Depôts on the 31st March was Rs. 74,870.

Books added to the stock during the year cost Rs. 11,792. Branch Depôts were supplied with 18,742 books worth Rs. 5,714.

Sales.—The amount realized by sales and paid into Government Treasuries was Rs. 14,082.

139. Printed for the Department are the following :—

Amara Kosha	..	5,000
Agricultural Class Book	..	5,000

140. Purchased for the department, the following : —

Kanarese	1,000	Anglo-Kanarese Reader.
Do	200	Ganitarnava.
Do	50	Notes on Matriculation Kanarese Text.
Do	61	Katha Sangraha, Part II.
Hindustani	2,000	First Book.
Sanskrit	7	Wilson's Sanskrit and English Dictionary.
Telugu	10	Morris India.

141. The large new Kanarese school map of India is now completed and 500 will be ready for circulation very shortly. A similar map in Hindustani is nearly ready. The introduction of these maps into Vernacular schools, by facilitating the study of the Geography of India, will help to dispel the aversion that has been shewn by Kanarese and Hindustani masters to this subject.

142. The following summary is taken from the report made by Mr. Rice on publications registered in Mysore during the year.

"The total number was only 25 composed of 13 books and 12 pamphlets.

The publications may be classified under the following prescribed heads:— Drama 2; Fiction 1; History 1; Language 2; Law 3; Miscellaneous 7; Poetry 1; Philosophy 2;" (including Mental and Moral Science). Of these works 7 were in Kanarese and 10 in Hindustani or Urdu, 4 in Sanskrit, 1 in Persian and three others in Arabic.

BUILDINGS.

143. The enlargement of the Central College premises at a cost of Rs. 5,193 was carried out by the Public Works Department.

A further sum of Rs. 328 has been expended on the construction of a 2nd class school house at Koratagere from Public Works Budget.

144. Various repairs to 23 school houses were made by the Educational Department at a cost of Rs. 3,513, and school compounds laid out and enclosed in 8 stations at a total cost of Rs. 756. Repairs were executed to 4 schools by the Public Works Department at a cost of Rs. 1,188.

BANGALORE,
1st June 1879.

R. G. HODSON,
Offg. Director of Public Instruction.

Mysore Government Press, Bangalore.—22-8-79—253.

REPORT

ON

PUBLIC INSTRUCTION IN MYSORE,

FOR THE YEAR

1879—80.

I. INTRODUCTION AND SUMMARY.

1. During the year under review, the re-organized agency for inspection described in last report has been in full operation, and the standards of education prescribed by the Government of India have been generally introduced.

2. With the return of more prosperous seasons, there has been an increase in the aggregate number of pupils under instruction, which has risen from 34,378 at the close of last year to 36,723 at the close of the present one, although the number of schools is fewer by 4. The addition is chiefly due to the Hobli schools.

No. of Pupils.

3. The following comparative statement of the numerical results shows that a slight diminution has taken place on the whole in the attendance at Aided schools:—

Year.	Government.		Aided.		Total.	
	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.
1878—79	875	25,620	180	8,758	1,055	34,378
1879—80	871	28,054	180	8,669	1,051	36,723

4. The numbers attending the above schools include 33,093 boys and 3,630 girls. But these figures do not embrace all the juvenile instruction of the country, as there are numerous private and unaided schools of which no account is taken in the new statistical forms, from their not being under regular inspection.

5 The pupils in Government and Aided schools being classified according to creed or nationality, and distributed under the several grades of instruction, we have the following results:—

Grade of Instruction.		University.	Secondary.	Primary.	Special.	Total.
Hindus	Boys ..	109	2,267	25,543	676	30,571
	Girls ...	...	50	1,900	26	
Muhammadans	Boys ...	...	171	3,138	72	3,648
	Girls ...	...	...	267	...	
Europeans and Eurasians	Boys ...	9	246	414	43	1,046
	Girls ...	1	114	219	...	
Native Christians	Boys ..	...	78	672	...	1,194
	Girls ...	...	6	438	...	
Others	Boys ...	..	1	54	175	264
	Girls ...	...	...	34	...	
	Total... ...	119	2,933	32,679	992	36,723

Instruction classified.

6. The number and strength of the different grades of schools are given in the subjoined tabular statement, together with the figures for last year :—

Class of Institutions.			1878—79.		1879—80.	
			Schools.	Pupils.	Schools.	Pupils.
University Education.						
Colleges			4	92	4	119

Special or Technical Training.						
Engineering and other Schools			9	823	7	992
		Total.....	1,055	34,378	1,051	36,723

7. The following shows the respective share taken by Government and Aided schools in the work of instruction :—

Grade of Instruction.		Government.		Aided.	
		Schools.	Pupils.	Schools.	Pupils.
University		3	112	1	7
Secondary ... ... { Boys		87	1,493	46	1,270
{ Girls		2	5	13	165
Primary ... ... { Boys		761	25,067	81	4,754
{ Girls		12	431	38	2,414
Special or Technical		6	950	1	42
	Total.....	871	28,054	180	8,669

8. *University Education.*—The results of the University examinations were much more favorable than last year, especially as regards Matriculation.

9. *Secondary Education.*—The Matriculation examination provides a definite test of the completion of the High School course ; and in regard to the Middle School course the question needs consideration whether the examination established by the Madras Government for that grade, in supersession of the former U. C. S. General Test, should be adopted here. The alternatives would be, either to institute a separate local examination for Middle schools, or to authorize inspecting officers to grant certificates at the time of individual inspections.

10. *Primary Education.*—The increase in attendance at the Primary Vernacular schools is marked and gratifying, especially in the case of the Hobli schools. An Agricultural Class Book prepared by Mr. Harman has been translated and issued to these schools. The Sanitary Primer is now under translation and will shortly follow; as well as suitable portions of the Revenue Survey Manual.

11. An important step for the encouragement of the Masters of the Hobli schools has been taken in appointing certain of them to the charge of the local Anche or Post Office, without prejudice to their school duties, giving them extra remuneration for the work at the rate of Rs. 3 a month. This arrangement, for which we

are indebted to the present Anche Bakshi, is one as economical in the public interests, without any sacrifice of efficiency, as it will doubtless be beneficial to the Educational Department. I am glad that it is intended to make it general. Several Hobli Masters have previously held extra appointments as Sub-Registrars, and given satisfaction. I doubt not they will acquit themselves equally well as Anche Mutsaddis.

12. *Female Education.*—There is a slight decrease in the number of girls under instruction, which is in part due to the imposition of fees in the Government Hindu Girls' School, Bangalore. The question of introducing fees into all the Native Girls' Schools is one that may now be well brought forward. Not so many years ago it was a common practice to pay native girls for attending school. That time has passed away, and native girls are now gladly sent to school, especially in large places like Bangalore and Mysore. But under the grant-in-aid rules in force, the obligation as regards all other schools, that fees shall be paid by the pupils as a preliminary to obtaining Government aid, is excused in the case of girls' schools. This relaxation should be withdrawn simultaneously with the levy of fees in Government schools.

13. *Special Education.*—The altered footing on which the School of Engineering and Natural Science is proposed to be placed renders it doubtful whether it will prove as attractive to native talent in the future as it has hitherto been. Arrangements for a Normal School were held in abeyance, but provision is being made for imparting to candidates for appointment as schoolmasters a superior training for their office to what has previously been available.

14. *Expenditure.*—The Government educational expenditure for the year amounted to Rs. 3,10,953, and may be thus distributed as to the main heads and the sources of income :—

Head of Charge.	Provincial.	Local.	Municipal.
Direction with its subsidiary charges	18,331	...	...
Inspection do do	15,585	9,613	...
Instruction, including all other charges...	1,87,155	77,438	2,831
Total.....	2,21,071	87,051	2,831

15. The private expenditure from other funds than those provided by Government amounted to Rs. 81,311, which added to the above, gives Rs. 3,92,264 as the total amount spent on education for the year from all sources.

16. The expenditure on instruction in Government and Aided institutions is thus distinguished :—

Class of Institutions.		Government.		Aided.	
		From Provincial Funds.	From Local Funds.	From Provincial Funds.	From other Sources.
University Education.					
Colleges		20,250	...	940	600
Secondary Education.					
High Schools, English ...	Boys'...	22,265	969	4,760	13,177
Do Vernacular...	do ...	...	..	256	197
Middle Schools, English ...	do ...	15,135	1,049	4,755	12,632
Do Vernacular...	do ...	12,102	117	2,236	2,968
High Schools, English ...	Girls'...	...	...	810	1,938
Middle Schools, English ...	do ...	...	...	1,844	3,595
Do Vernacular...	do ...	308	...	381	495
Primary Education.					
Primary Schools, English ...	Boys'...	7,909	194	8,925	17,880
Do Vernacular...	do ...	33,264	73,481	9,955	11,027
Primary Schools, English ...	Girls'...	...	...	2,766	5,822
Do Vernacular...	do ...	3,879	...	8,187	10,155
Special Education.					
Engineering and other Schools... ...		12,979	...	500	825
Total.....		1,28,091	75,910	46,315	81,311

17. The following table shows how the grants-in-aid were distributed among the different religious denominations, and what the private expenditure of each was:—

Denomination.	Government Aid.	Prvate Expenditure.
	Rs.	Rs.
Church of England	9,840	14,384
Do Scotland	3,960	11,374
Wesleyan	11,484	19,674
London Mission	4,500	11,684
Roman Catholic	6,240	14,626
Hindu	3,948	3,407
Muhammadan	5,383	5,105
General	960	1,057

18. Or, according to the language which forms the subject or medium of instruction, the Government grants to Aided schools may be thus classified :—

	Rs.
English	25,300
Kannada	9,962
Tamil or Telugu	2,932
Hindustani	5,494
Sanskrit	2,627

19. As regards the Government expenditure on instruction, an important change has been made for the ensuing year in transferring the charges for all the Taluk Vernacular schools, amounting to Rs. 47,700, from Provincial to Local Funds. In connection with this alteration it seems fair that the fee receipts of the same schools should be credited to the Local Funds ; and moreover that Municipal contributions should be added from all the towns in which the schools are situated. Otherwise the municipal population will be provided with means of education for their children at the expense of the agricultural population who pay the Local Fund cess. Doubtless some of the former contribute to it also, but it is believed a very small proportion.

20. *Receipts.*—The receipts for the year by payment into Government Treasuries amounted to Rs. 1,69,026, derived from the following sources :—

	Rs.
School fees	18,174
Proceeds of book sales	14,231
Educational share of Local Fund collections ..	1,33,790
Municipal contributions	2,831

21. The receipts in Aided schools are reported as being Rs. 81,311, of which Rs. 37,108 were derived from school fees. Adding the private and Government receipts, we obtain the sum of Rs. 2,50,337 as the total educational receipts of the year from all sources.

22. The increase in the amount of fees realized in Government colleges and schools, the total being Rs. 18,174 against Rs 14,493 last year, is very marked, and is due principally to the withdrawal of the remissions previously made on account of the pressure of the late famine, which are happily no longer called for.

II. CONTROLLING AGENCIES.

23. *Direction.*—During my absence on furlough, from the 9th of April to the end of the year, Mr. R. G. Hodson, Inspector of Schools, First Circle, acted in the office of Director.

24. *Inspection.*—The principal inspecting agency underwent a complete change, as described by anticipation in last year's Report. In accordance with the orders received from the Government of India, the two superior inspection circles hitherto existing were broken up, and the European officers in charge of them replaced by Native Deputy Inspectors, the office of Inspectors of Schools being abolished.

25. Mr. R. G. Hodson, Inspector of Schools in the First Circle, has been provided with an acting appointment in British Burmah as Principal of the Rangoon High School ; while Mr. E. Marsden, B. A., Inspector of Schools in the Second Circle, has been transferred to Coorg as Principal of the Mercara Central School. I cannot allow these two officers, who have been so long associated with me, to leave this Department without recording an acknowledgment of their valuable services, which have from time to time been duly brought to the notice of Government.

26. Under the new arrangements the Province was divided into four Circles, named respectively South, East, West and North, each comprising two of the Revenue Districts. In addition to these, a fifth charge was formed for Bangalore, embracing the Town and Cantonment, the Deputy Inspector appointed to this having also to discharge the duties of Assistant in the Director's Office, the separate provision for which was relinquished.

27. The following are the five Deputy Inspectors thus appointed :—

South Circle	Mr. D. Subbaiya, B. A.
East ,,	,, B. Venkatpati Aiyangar.
West ,,	,, B. Desikachar.
North ,,	,, V. Nadamuni Naidu.
Bangalore	,, W. Grieveson.

28. All have worked with energy, and each of them possesses considerable educational experience which is brought to bear upon his duties, thus helping to remove most of the friction generally inseparable from the application of new machinery.

29. The Sub-Deputy Inspectors number, as hitherto, 15 for Hobli schools and 2 for Hindustani Schools. The following are their names and charges :—

Charge.		Station.	Name.
Bangalore	East	Bangalore	Srinivas Aiyangar.
,,	West	Bidadi	Venkat Ramanaiya.
Kolar	South	Hoskote	Dakshinamúrti Shastri.
,,	North	Sidlaghatta	Rangaswami Aiyar.
Túmkúr	South	Kadaba	Srinivasa Tatachari.
,,	North	Sira	Venugopal Naidu.
Mysore	East	Chamrajnagar	Dasappa.
,,	West	Mysore	Venkat Naranaiya.
,,	North	Seringapatam	Múrti Rao.
Hassan	West	Hassan	Venkata Rao.
Shimoga	East	Shimoga	Tirumalachari.
,,	West	Ságar	Puttappa.
Kadur	West	Chikmagalur	Subba Rao.
Chitaldroog	North	Chitaldroog	Applachari
,,	South	Hosdurga	Timmappa.

Hindustani.

East and South Circles & Bangalore	Bangalore	Khwaja Muhammad.
West and South Circles	Shimoga	Sayad Mustafa.

30. These form an exceedingly valuable class of officials, and where they devote themselves with interest to their work the importance of their services cannot be overrated. I am glad to state that, with very few exceptions, they are entitled to commendation and have earned a good report during the year. The only ones noted as not satisfactory are those of Chitaldroog South, Túmkúr North, Bangalore West, and Kolar North. Shimoga West is reported as medium.

31. The regulations for inspection under the new agency are detailed in the Circular Orders drawn up by me quoted in last year's Report. They have been generally adhered to and the systematic results of the examinations of schools submitted to this office at the time bring defects at once to notice.

III. UNIVERSITY EDUCATION.

32. The number of Colleges remains unchanged, namely, three Government and one Aided. The former contain 24 students reading for the B. A. degree and 88 for the F. A. examination, all Hindus except 3, who are Europeans or Eurasians. The Aided College contains one student reading for a degree, with 5 boys and 1 girl reading for the F. A., all being Europeans or Eurasians. The total results show 112 students

in Government and 7 in Aided Colleges, against 77 and 15 last year. The figures representing the amount of fees realized have been almost reversed, being Rs. 1,460 in Government and Rs. 600 in Aided Colleges this year, against Rs. 697 in the former and Rs. 1,440 in the latter last year. The result as regards Government Colleges is due to the prohibition of free students.

33. *University Examinations.*—Branch examinations of the Madras University were held, as usual, at Bangalore, Mysore and Shimoga. For Matriculation there were 235 candidates at Bangalore, 73 at Mysore and 19 at Shimoga : for the First-in-Arts examination 28 at Bangalore, 4 at Mysore and 5 at Shimoga. The number of successful candidates from this Province was 2 in the B. A. examination, 19 in the F. A. and 92 in the Matriculation, which results compare very favorably with those of last year, especially as regards Matriculation, only 26 having passed then. Such fluctuations, however, must be set down to variations in the examination papers and in the method of valuing them, rather than to greater or less efficiency in the instruction. By appointing examiners for periods of three years the University is endeavouring to lessen these oscillations in the standard, which, it is feared, cause no little injury to sound education.

34. The following statement shows the institutions from which successful candidates in the late examinations proceeded, with other particulars :—

Institution from which passed.	Number of Candidates.			
	Presented.	Passed.		
		First Class.	Second Class.	Total.
B. A. Examination, February 1880.				
Government—				
Central College, Bangalore	7	...	2	2
F. A. Examination, December 1879.				
Central College, Bangalore	16	1	8	9
Maha Raja's College, Mysore	4	1	2	3
Shimoga College	4	...	1	1
Aided—				
Bishop Cotton's College	5	3	1	4
Private students	2	...	2	2
Total.....	31	5	14	19
Matriculation, December 1879.				
Government—				
Central College	39	3	12	15
Maha Raja's College	18	2	12	14
Shimoga College	8	...	5	5
Hassan High School	6	...	3	3
Túmkúr do	8	...	2	2
Kolar do	5	...	1	1

London Mission High School, Bangalore	16	...	12	12
Bishop Cotton's College do	12	1	4	5
St. Andrew's School do	...	...	1	1
St. Joseph's Catholic Seminary, Bangalore	4	...	1	1
Unaided—				
Royal School, Mysore	...	...	1	1
Mari Mallappa's School, Mysore	...	1	2	3
Private students	...	...	2	2
Total.....	...	7	85	92

35. In regard to the B. A. examination, it will be seen that the Central College was singularly unfortunate with the candidates sent up, 3 of whom out of 7 were prevented by illness from appearing.

36. In the F. A. examination one of the candidates from Bishop Cotton's took the high place of second on the whole list for the Madras Presidency. Of those sent up from the Maha Raja's College, Mysore, one fell ill and was not present: all who appeared therefore passed, a very good result.

37. In Matriculation there is in many cases a considerable disproportion between the number presented and the number passed. But of those who went up from the Maha Raja's and Shimoga Colleges, from the two Wesleyan High Schools and the London Mission High School, a good proportion were successful.

38. In the Government of India's review of last year's Report (Foreign Department No. 130 I. G., dated 31st January 1880,) it is remarked "that the outcome of collegiate education during the year 1878-79 has not been very successful, and the Government of India consider that your attention may be usefully directed towards arranging for the supply of a really high education, in order that the Native Public Service in Mysore Province may thus be rendered more efficient." It is needless to state that every effort has been made with this view, and that in proportion to the funds at disposal it is believed no Province has done more. But the salaries granted for our second grade Colleges are so much below what are sanctioned elsewhere, that we have more than once, as now at Mysore, been compelled for no other reason to part with efficient and successful Head Masters.

39. COLLEGES.—*Central College, Bangalore.*—No change took place in the staff. Mr. C. Waters, M. A., continued as Principal, with Mr. H. J. Bhabha, M. A., as Vice Principal and Mr. A. G. King, B. A., as First Assistant. There are at the end of the year 24 students in the two B. A. classes and 42 in the two F. A., against 22 and 38 last year. The fees yielded Rs. 1,112 as compared with Rs. 533 last year, due to the fact that none are now exempted from paying full fees, except the holders of scholarships, who pay reduced fees.

40. With regard to the results of University examinations, the Principal remarks as follows:—B.A. examination,—"One candidate who failed had not studied in the College for 3 years. Two others, who would probably have passed very well, were taken ill just before, and a third during the examination. The result is not any thing like so good as I expected. The logic papers were stiff, but the others very fair. We have a promising class of 14 students for next year. I hope they will be rewarded with better success. (F. A. examination)—Three or four of these were old students who hardly ever attended the class last year.

41. The Reading Room and Lending Library continue to be very much patronized by the students. The College Library has now a fair collection of reference books.

42. I am sorry more boys do not take part in cricket and athletic sports. The Challenge Cup, which had been held by boys from Bishop Cotton's School and College, St. Andrew's School, and the Central College since 1872, was last year finally won by the Bishop Cotton's School, that school having carried it off three consecutive years."

43. *Maha Raja's College, Mysore.*—This institution has been throughout the year in the charge of Mr. C. H. Candy, B. A., L. L. M., whose services I regret that we are about to lose on his acceptance of a better paid appointment as Principal of the new College for Mahratta Sirdars at Kolhapur. The following are extracts from his report on the Mysore College.

44. "In the College there is a gain of 25 students, the numbers being 7 in the Senior F. A. class, 30 in the Junior, and 33 in the Matriculation class. In the University examinations I have the pleasure of reporting a greater measure of success than has ever hitherto been attained by this College. Last year the Senior F. A. class consisted of 5 pupils. Of these the application of one was rejected, as he had not attended the College for the required 18 months. Of the 4 others, one whom I expected to come out in first class, unfortunately was so ill at the time of examination he could not appear. The other 3 all passed. Of these, 2 are now studying for their degree at Bangalore Central College, and the third at Presidency College, Madras.

45. Our present Senior F. A. class consists of intelligent students, and if they only work as diligently as their predecessors, equally good results may be looked for next December. Though I fully expect that several of the 30 students in the Junior F. A. class will not complete their two years' course, still I think we may hope to send up a fair number of well prepared candidates in December 1881.

46. The Matriculation class consisted of 26 students. Of these 18 were sent up for the examination and 13 were successful. The number surpasses that of any previous years, but further, what I am particularly glad to point out is the high percentage of successful students and also the good position on the list held by several of our candidates. Three other candidates who had been studying the previous year in our Matriculation class passed from other schools. The present Matriculation class contains a fair number of intelligent and promising pupils. One old pupil of this school, M. Shama Rao, who passed his F. A. in 1877, graduated B. A., 2nd class, this year from the Central College.

47. The Library has been steadily improved, and good use was made of it by the Masters and the College students. The College and High School classes held weekly discussion meetings, at which I generally presided. Each class in turn furnished a representative who read a paper, the style and subject matter of which were then discussed by those present.

48. Athletic sports for the United Schools of Mysore took place in the Residency Park on the 4th and 6th March 1880, and were a great success. Our boys gained a fair share of the prizes, which they had the honor of receiving from the hands of H. H. the Maha Raja. The gymnastic apparatus, which was taken in hand by the Public Works Department a year ago, is not yet completed.

49. Extensive repairs to the School buildings were undertaken during the year. The work in many ways was unsatisfactory. I believe the contractor who undertook the work failed. In conclusion I beg to bring to your notice the cheerful and industrious way in which the whole staff have worked during the year. The work of the Senior Assistants especially (I would name Messrs. R. Venkat Ramaiya, B. A., K. Ramaswami Iyangar, B. A. and M. B. Sriniwas Iyangar, B. A.) has been most praiseworthy, and I feel that our University success is owing in a great measure to their efforts. I would also once again say a word in praise of Mr. B. Mallappa, the Kanarese Head Master."

50. *Shimoga College.*—During the past year Mr. C. M. Leonard, B. A., has been the Head Master, with G. Krishna Rao, B. A., as First Assistant. Here too I am sorry for the prospect of losing Mr. Leonard's services by his transfer to the Revenue Office. The following remarks are taken from the annual report. "Of the 5 boys forming the College class, 4 appeared for the First-in-Arts examination. One was successful well up in the second class, two others passed in all subjects but unfortunately failed to secure the minimum of one third on the whole, and the last failed in mathematics. There are now 4 students in the Senior F. A. and 5 in the Junior. Three others have intimated their intention of joining the latter after the holidays. For the Matriculation examination 8 students appeared and six were successful, all in the second class.

51. The College was visited during the year by H. H. the Maha Raja and Mr. Gordon. His Highness gave a donation of Rs. 200 towards the erection of suitable gymnastic apparatus for the school. Owing to press of work at the Jail, the work was not put in hand at the time, but I expect to have it completed by the end of the midsummer holidays. The swimming and cricket clubs still flourish and have been productive of much good."

52. *Bishop Cotton's College.*—This, which is the only Aided College connected with the Department, continues under the charge of the Reverend G. U. Pope, D. D., the Warden. From the returns it appears that there are only 7 college students now against 15 last year. Those sent up in December to the University examinations seem to have been well prepared, as out of 5 for the F. A. 4 passed, 3 of them in the first class; one of these, W. H. G. Kenrick, distinguishing himself by taking the second place on the list. Of the candidates for Matriculation also, one was placed in the first class. Among those now reading for the F. A. is a young lady, mentioned in my Report for 1877—78 as being the first and only one matriculated in the Madras Presidency.

IV. SECONDARY EDUCATION.

53. The following are the statistics of the High and Middle Schools:—

Class of School.			Government.		Aided.	
			Schools.	Pupils.	Schools.	Pupils.
Boys' High Schools	English ...		8	310	6	326
Do	Vernacular ...		...	...	2	40
Middle Schools	English ...		12	572	12	560
Do	Vernacular ...		67	611	26	344
Girls' High Schools	English ...		...	...	2	21
Middle Schools	Do ...		...	...	6	93
Do	Vernacular ...		2	5	5	51
	Total.....		89	1,498	59	1,435

54. The figures cannot usefully be compared with those of last year, as the differences, principally in the Aided Schools, are mostly due to a more accurate classification under the new standards than was possible at the time of the last report, when they had so recently been introduced.

55. The High Schools appear to have provided 277 candidates for matriculation, of whom, as before stated, 92 passed.

56. The Middle School Examination, instituted by the Madras Government to take the place of the previous General Test for admission to the Uncovenanted Civil Service and for certain schoolmasters' and schoolmistresses' tests, was availed of by 41 candidates from this Province, of whom 16 passed, namely, 3 boys and 1 girl in the first class, and 7 boys and 5 girls in the second class. The notice of the examination being issued only shortly before it was held doubtless prevented more candidates from appearing for it. Whether the passing of this examination should be made obligatory in the Middle schools of the Mysore is a question for consideration. All the fees paid for admission to it, at Rs. 5 a head, now go to the Madras Government.

Boys' Schools.

57. Government High Schools.—These are 8 in number, one at the headquarters of each Revenue District, three of them being departments of the corresponding colleges. The total number of students is 310 against 286 last year. Fees produced Rs. 3,968 in place of Rs. 2,922.

58. *Bangalore*—Has 106 students, of whom 50 are in the matriculation class and the remainder in the 6th. "The work done in this and the lower departments is tested for the most part by *vivâ voce* examinations. The marks obtained at these examinations carry equal value with the daily marks during the year in determining prizes and promotions." The Matriculation results are given above in para 34.

59. *Mysore*—Contains 60 students, the same number as last year, but 7 more are now in the matriculation class. The success of the students from this class has already been referred to in para 46.

60. *Shimoga*—Has 43 students, or one more than last year. The Head Master reports that the classes were examined quarterly, but they were not, he regrets to say, either very strong or very hard working. They improved a little however towards the end of the year. At the annual examination, 7 out of 17 were found fit for promotion from the 6th to the matriculation class, which now numbers 21 students.

61. *Hassan*.—The Head Master is Mr. J. Arbuthnott, B. A., who has had charge the whole year. The school sent up 7 candidates for matriculation, of whom 3 passed. There are 19 students in the High School. The return by fees was Rs. 338 against Rs. 237 last year.

62. *Túmkúr*—Is in charge of Mr. Clapham, who is also Canarese Examiner for the Madras University. Of 8 students sent up, only 2 matriculated. At the inspection, in August, it was found that there were a few boys whose presence in the matriculation class of 19 was premature, but the majority had been taken carefully over the appointed course. Of the 6th class of 14, about a half did well in Language and two-thirds in Algebra.

63. *Kolar.*—In November Mr. J. Coleman, formerly an Army Schoolmaster, who has done excellent work at this and other High Schools, retired on a superannuation pension. Mr. W. Dunning, formerly First Assistant at Mysore and Shimoga, took his place for the present. The complete change in the staff of Assistants made by me at the beginning of 1879 has proved of great benefit, and the school is now stated in consequence to be more popular and in a better condition than for many years past. Of 4 students who appeared for matriculation, 1 passed. There are now 13 students. The fees produced Rs. 89 against Rs. 33 last year.

64. *Chitaldroog.*—Mr. Birch, appointed as Head Master from Kolar in February, was prevented by illness from taking charge until May. When he did take charge, his health was bad, and very little school work was done by him; the consequence was that the school retrograded rapidly. In July he left, and has now been invalided. Mr. M. L. Narsimha Aiyangar, B. A., was then sent from Bangalore to act as Head Master, but at the close of the year Mr. G. Dunning, late an Assistant in the Royal School, Mysore, has received the appointment. The school was inspected in September. The High school, which had been previously completely broken up, was reformed by Mr. Narsimha Aiyangar, with 9 students in the matriculation class and 11 in the sixth. The former included some very intelligent young men, who would under favorable circumstances have been prepared for matriculation during the past year, but as matters stood, much exertion was required to bring the school up to the required standard. Mr. Hodson states that "throughout the High School the handwriting is bad and there is not one good reader."

65. *Chikmagalur.*—The school was carried on throughout the year by Mr. S. Cress, B. A., and has under him made improvement. The staff of Assistants is below the requirements of the school, and there have been one or two absentees on leave for some time. For the preparation of the Matriculation Canarese text, Vedanta Aiyangar, a student in the Primary school, but 25 years of age and a good Sanskrit scholar, has voluntarily rendered efficient service. The following remarks are taken from the Head Master's report. "The VIth class had not sufficiently advanced to commence the Matriculation course in 1879; but the Director pronounced four fit to do so from the beginning of 1880. With two new admissions, the Matriculation class now numbers six, one or two of them promising boys, and if not enticed away by employment, University results may be looked for at the end of the year.

66. On an appeal being made to the gentlemen of the station for donations to start a cricket and a foot-ball club, it was readily responded to, while the Maha Raja on visiting the place helped with the munificent donation of 100 rupees; so that we have a good club. The boys are in no want of means of exercise and in consequence their health has been improved. The cricket matches have been played against the station, one of which resulted in favor of the school. Athletic sports also were got up, in which the Hassan boys took part; Messrs. Chitambaram Iyer, Sub-Judge, Raghavendra Rao, Munsiff, and Murry Gungiah, Anche Bakshi, supplying the funds for prizes."

67. Aided High Schools.—The statement in the margin supplies particulars regarding these. They have a total of 366 pupils against 288 last year.

68. Of the English High Schools, the first three are for Natives and the last three for Europeans and Eurasians. The number of students sent up for Matriculation from the several institu-

tions has already been given, together with the results which attended the examination. No changes of importance have occurred in the management and arrangements of either of the schools. They all continue, as in former years, to take most effectively an important part in such of the work of higher education as does not come under the direct operation of the Government institutions.

69. Of the two Sanskrit institutions entered among High Schools, exceedingly favorable reports have been received. The one at Mysore, of comparatively recent foundation, is stated to be very ably and energetically managed. The studies of the higher classes are Logic, Rhetoric and Dramatic poems. Of the long established Melukote school the Deputy Inspector writes "I cannot conclude my report without expressing my belief that this school is under very strict supervision, and that there is life and vigour in the working on the part of both masters and pupils." An important appendage to this school is the Library of Sanskrit works, containing above a thousand books on paper and palmyra leaves. It combines both a reference and a circulating department.

70. GOVERNMENT MIDDLE SCHOOLS.—These comprise 79 schools with 1,183 pupils, as per margin. The amount of fees paid was Rs. 6,203 against Rs 4,795 last year. All are Taluk schools, except 8 of the English, which are the Middle departments of the corresponding Colleges and High schools at the headquarters of Districts.

71. At Bangalore a good many boys have been admitted to the Middle and Primary schools of the Central College since the re-opening in January. The midday school hours, the Principal reports, seem now to be pretty popular with the students. In the report on Mysore it is stated that "the Muhammadan boys continue to take a good place in the school, in Canarese as well as in all other subjects. Four of them in the Middle school were found worthy of double promotion at the beginning of the year." The reports on the 4 Taluk English schools are not very encouraging, and they are but poorly attended. It is a question whether a class for English primary instruction in the best Taluk Vernacular schools would not better meet the wants of the people than separate schools on this scale.

72. The figures for the *Kannada Schools* show that 58 out of the 76 Taluk schools for teaching that language have a Middle department. Those not yet arrived at this standard are chiefly in Kolar, Shimoga and Kadur Districts. The largest number of Middle class pupils reported are at Davangere, where there are 49, and at Mysore, where there are 32. Below these, Tarikere, Hole Narsipur and Malavalli have the most.

73. The following particulars extracted from the reports of Deputy Inspectors indicate the relative merits of these schools in each Circle:—*East.*—"The school at Dodballapur is the largest and best conducted in this Circle. I have met with no vernacular teacher who does his work half so well as the very able Head Master Venkatapati Dikshitalu." The schools at Sidlaghatta, Kankanhalli, Hoskote, Nelamangala and Yelahanka continue to be well attended and have made satisfactory progress; those at Closepet, Devanhalli, Sarjapur and Goribidnur are fair. *South.*—"The schools at Mysore, Holé Narsipur, Belur, Malavalli, Nanjangúd, Seringapatam and Talkad Narsipur stand first in the rank"; next come the schools at Yedatore, Chamrajnagar, Hassan, Arkalgúd, Gundlupet, Húnsúr, Mandya, Nagamangala and Sargur. *North.*—The best schools are those at Davangere, one of the largest in the Department, and at Hosdurga; those at Maddagiri, Koratagiri, Turuvekere, Pavagada and Chellakere are also good: while Harihar, Kunigal and Huliyar are fair. Sira has temporarily fallen off owing to change of masters. *West.*—Those at Tarikere, Ságar, Sorab and Kadur stand the highest; Shikarpur, Tirthahalli, and Hole Honnur come next.

74. The Deputy Inspector of the East Circle says "Boys in these schools do not generally stay long enough to study for the Middle school examination. What they desire is that they should be taught to read and write and to cast up accounts. They cannot be made to see the utility of studying Geography, History and other branches of knowledge. If their parents have the means and are ambitious, they send them to Bangalore or some other place to learn English, for they perceive

that a knowledge of English is more profitable than that of Canarese. To correct this evil I have suggested the expediency of making the Middle school examination a test for appointments in the subordinate Public Service in Mysore." The Deputy Inspector South reports to the same effect.

75. Of the *Hindustani Schools*, those at Mysore and Kolar are the largest, but one as promising has just been established at Channapatna. At Sidlaghatta there are 25 girls reading with the boys, a very unusual thing in Muhammadan schools. The Kankanhalli and Closepet schools are doing well.

76. AIDED MIDDLE SCHOOLS.—Under this head are included 38 schools with 904 pupils, as per statement in the margin. There is a Middle school attached to each of the English High schools reported on in para 68, in addition to which are the following:—St. John's for European and Eurasian children, chiefly those of European pensioned soldiers; the St. Patrick's, St. Mary's and Blackpalli Roman Catholic schools; and the London Mission Cantonment and Alsur schools. From the inspection report on St. John's I regret to learn that the standard of instruction is far below what it has been. St. Patrick's, a Roman Catholic school, is open to all classes and creeds. The present master is reported to have infused new life into it. St. Mary's is a seminary for candidates for the priesthood. The two London Mission schools, especially the last, are not well reported on.

	Schools.	Pupils.
English	12	560
Kannada	14	132
Hindustani	3	34
Sanskrit	9	178

77. The *Kannada Schools* include 8 Wesleyan schools in Túmkúr and neighbouring villages, with 3 in Mysore, 2 London Mission schools at Anekal and Malur and the Jahagirdar's school at Yelandur. Of the first named, those in Túmkúr are well attended, and of the out-station schools, Kallur and Hebbur seem to be the best. At Gubbi, the head-quarters of a Taluk and containing a large Lingayat population, the masters of the Wesleyan school are Jangamas who formerly had private schools of their own. "They teach" says the Deputy Inspector "school books in the class and attend to the religious studies of their pupils at home." A singular arrangement at Hebbur is that one of the masters is a blind man. "An intelligent boy in the class reads to him the lesson first and enables him to teach it to other boys in the class." The result is that the boys have committed every thing to memory and cannot write a single sentence or work a single sum on the slate correctly, as the master is dependent on the boys to find out mistakes. The Mysore schools are doing generally well, especially the one in Sivarampet, also the Yelandur school. The two London Mission schools are inferior to Taluk schools, and on frequent applications from the people, orders have been received for the establishment of a Government school at Anekal, there being abundance of room for more than one school.

78. The *Hindustani Schools* include the two large Muhammadia and Kudusia Madrasas and the Sultani, all in Bangalore. The first is especially well conducted: the second is also good. The third is distinguished for the superiority of its Arabic instruction.

79. Of the *Sanskrit Schools*, besides what come under High schools, those at Chikballapur, Muttur, and Chitaldroog deserve much praise. At the Vidyá Nilaya in Bangalore a laudable attempt has been made to introduce the Devanagari character. It is desirable that this example were more generally followed. The payment of a grant to the Sravana Belagola school has been transferred to the endowments of the Matt.

GIRLS' SCHOOLS.

80. *High Schools.*—There are two, both Aided institutions, namely, Bishop Cotton's and St. Andrew's, the former having 9 and the latter 12 pupils. Bishop Cotton's, as with the Boys' school, is under Dr. Pope: St. Andrew's is conducted by Miss Millard. A few of the girls it is understood went up for Matriculation but without success. The one who passed in 1877 has hitherto been alone.

81. *Middle Schools.*—The *English Schools*, besides the above, include the Wesleyan school in the Cantonment, the Convent of the Good Shepherd, and St. John's in Bangalore, with St. Bartholomew's at Mysore, all for European and Eurasian children. Several of the girls from each of those in Bangalore appeared in December for the examination held by the

	Schools.	Pupils.
English	6	298
Kannada	5	54

Madras Department for Teachers' Tests as school mistresses, of whom the following numbers passed:—

	1st Grade.	2nd Grade.	3rd Grade.
Wesleyan School	2	3	2
Convent	0	1	0
St. John's	0	1	3
Bishop Cotton's	0	0	1

The report on St. Andrew's is particularly favorable. The Convent school, taught by two of the Sisters, was the only one in which the girls were found to be acquainted with the tables of English and Indian weights and measures.

82. The *Kannada Schools* are Wesleyan, 2 in Bangalore and 3 in Mysore. The Fort School, Mysore, is highly reported on, the attainments of the girls in the language subjects being "very superior." The Nagarta petta School in Bangalore also stands high. The remainder are all doing very fairly well.

V. PRIMARY EDUCATION.

83. The total number of Primary schools is 892 with 32,679 pupils, as per list below, against 908 schools last year with 30,295 pupils:—

Class of School.			Government.		Aided.	
			Schools.	Pupils.	Schools.	Pupils.
Boys'	Primary Schools	English ...	13	531	19	1,357
	Do	Vernacular ...	748	24,519	62	3,414
Girls'	Do	English ...	...	...	6	219
	Do	Vernacular ...	12	444	32	2,195
		Total.....	773	25,494	119	7,185

84. The decrease in the number of schools and the increase in the number of pupils are both due chiefly to the Hobli Schools. Of the pupils now in attendance, 4,631 are in the Upper Primary School and 28,048 in the Lower Primary.

Boys' Schools.

85. Government Primary Schools.—The details of these are as given in the margin. The fees yielded Rs. 6,140 against Rs. 5,796 last year.

	Schools.	Pupils.
English	13	531
Kannada Taluk	76	4,515
Do Hobli	636	18,718
Telugu	8	210
Hindustani	28	1,076

86. The *English Schools* are the Primary departments of those already reported on under Secondary Education, excepting one at Saklespur. Of the decrease of 24 pupils at Mysore, the Head Master says, "It was in this branch that the decrease last year principally occurred. The reasons I think are two:—(1) the counter attraction of Mari Mallappa's School, with its low rate of fee; (2) the idea prevalent amongst the parents that the early school hours are more convenient for the younger pupils. The elder pupils see well the advantages of midday school hours." The Saklespur school is one transferred from Holé Narsipur. From the latter place the Deputy Inspector states that it used to send up several very intelligent pupils to the Maha Raja's College at Mysore. It was removed on account of the lowness of the attendance. The present number of pupils is also very small.

87. *Kannada.*—The condition of the Taluk schools has already been reviewed under Middle schools. Here the *Hobli Schools*, which are distinctively Primary' may be specially noticed. It is gratifying to report that, though the number of schools is less by 17 than last year, the total of pupils has risen from 16,776 to 18,718, an increase of 11½ per cent.

88. The distribution of the Hobli schools by Districts is as shown in the margin. The general average is higher in every District, but especially in Túmkúr, Chitaldroog and Shimoga. To the number of schools shown in the table are attached 28 Branch schools, not separately counted, though, being in villages different from but adjacent to those in which the parent schools are established, they are virtually additional schools.

District.	Schools.	Pupils.	Average.
Bangalore ...	99	2,893	29·2
Kolar ...	105	2,687	25·6
Túmkúr ...	65	2,323	35·7
Mysore ...	108	3,339	30·9
Hassan ...	69	1,600	23·2
Shimoga ...	72	2,462	34·2
Kadur ...	56	1,367	24·4
Chitaldroog ...	62	2,047	33·0
Total.....	636	18,718	29·1

89. Among the pupils of Hobli schools are 328 girls, who attend school along with their brothers or other relatives. The greatest numbers are in Mysore and Kolar Districts ; Kadur is the only District with none. The classes of the population represented in the schools are 17,945 Hindus, 739 Muhammadans, 9 Native Christians and 25 others.

90. The largest schools are those at Tyamagondal with 101 pupils, Ganjam and Belagutti with 97 each, Siralkoppa with 91, Vadigenhalli 88, Melkote 87, Sigebagi 84, Bellavi 80. Bidare, Holavanhalli, Mandali, Mangote and Ajjampur have from 70 to 80 each. Male Bennur, Vásana, Hebbalaguppe, Palhalli, Hirode, Talkad and Kubatur, between 60 and 70. Besides these are 20 schools with from 50 to 60 pupils each, namely, Kandavara, Rangavanhalli, Bharmasagar, Hiremunganur, Tiptur, Kora, Sitagal, Devanur, Kannegaudan Koppal, Heggaddevankote Magge, Kikkeri, Arekere, Halaguru, Ayanur, Kudali, Nallur, Sante Bennur, Kudalur, Hulikere.

91. Several of the Hobli schoolmasters have been employed from time to time as Sub-Registrars and given satisfaction. The proposal to appoint them now generally to take charge of the Local Anche or Post Office, in addition to their educational duties, will prove a great encouragement.

92. *Telugu.*—These are principally in the Kolar District, where the Telugu language prevails. The Deputy Inspector reports that the Mulbagal school is the most advanced and has been very satisfactorily taught. Shrinivaspur, Chintamani and Kolar were fair. At Magadi the people do not allow their children to remain long enough at school but withdraw them soon to put them to their trade.

93. *Hindustani.*—Of these, 5 are Regimental schools, one being established at Bangalore for the Savar or Cavalry, the others for the Barr or Infantry at the following stations, Bangalore, Shimoga, Chikmagalur and Chitaldroog. Those in Bangalore have made considerable improvement during the year owing to change of masters. The remaining schools are at the head-quarters of taluks and have already been remarked upon under Middle schools.

94. Aided Primary Schools.—These schools may be classified as in the margin. The total number is 81 with 4,754 pupils, against 83 last year with 4,616. The two schools less this year are both Sanskrit, the Vinaya Bodhini and Kalanidhi at Chamrajnagar, from which the grants were withdrawn on account of their unsatisfactory condition.

	Schools.	Pupils.
English	19	1,357
Kannada	22	1,573
Tamil and Telugu	7	598
Hindustani	24	938
Sanskrit	9	288

95. The *English* schools, besides the Primary departments of the High and Middle schools previously referred to, include St. John's Infant School, the Cantonment Orphnage and St. Andrew's Poor School, all for European and Eurasian children, the Ordance School, mostly for children of the same class, St. Paul's Mission and Broadway schools for Natives. St. John's Infant School, with 30 boys and an equal number of girls, continues to be well conducted, as in former years, by Mr. Gascoigne, assisted by his daughter. The instruction at the St. Paul's Schools seems to be very poor. The Broadway School has made improvement.

96. *Kannada.*—Of these, 15 are Wesleyan schools, 10 being in Túmkúr and the surrounding villages, 3 in Mysore, 1 in Bangalore and 1 in Hassan. In the remainder are included the Roman Catholic Schools at Mysore and the village of Shathalli, the latter being attended altogether by the agricultural class. There is also the Chetnahalli Branch School, established by the late Captain Fitz Gibbon, owner of the adjoining coffee plantation in Múdgere Taluk.

97. *Tamil and Telugu.*—These are all in Bangalore, 5 being Tamil only, established by the Wesleyan Mission in various parts for the benefit of the camp followers, horse-keepers and other servants of the Royal Artillery, Hussars, &c. One is the Roman Catholic School in Blackpalli for teaching Tamil and Telugu, mostly attended by children of servants. The remaining one is the Chatur Veda Siddhanta Sabha Seminary, conducted by a Native Committee, with distinct Tamil and Telugu branches, and also classes for English and Kannada. Some of the old boys were present at the inspection and promised to help to raise the standard of the various departments. The report on the Tamil branch of this institution is specially favorable.

98. *Hindustani.*—Half of these are in the Bangalore District, some being the lowest departments of the Bangalore Madrasas before reported on, others village schools. The remaining schools are distributed through the other Districts, except in Hassan and Kadur. They are most numerous in Kolar District, where there are many villages occupied by pensioned members of the Silledar horse. All the schools are, it is believed, doing useful work. A grant at Ságar was withdrawn.

99. *Sanskrit.*—No remarks are called for under this head beyond what have already been made respecting the same class under Middle schools.

GIRLS' SCHOOLS.

100. GOVERNMENT PRIMARY SCHOOLS.—There are 12 of these, all Vernacular, giving instruction in Kannada, the language of the country. They are distributed as in the margin. A decrease has taken place in the Bangalore school owing to the imposition of fees. Seeing that no fees are demanded in the Aided Girls' schools, the parents deem it a hardship that they should be called on to pay here alone. But it seems to me that the time has arrived when the payment of fees, which has hitherto not been insisted on as a condition for a grant-in-aid of Girls' school, might be enforced.

District.	Schools.	Pupils.
Bangalore	5	186
Kolar	5	147
Shimoga	2	85
Chitaldroog	1	26

101. The Girls' schools established in large towns, the Deputy Inspector East remarks, have come to be much appreciated by all those that are called a reading and writing people. The one at Closepet is well conducted. Chikballapur is also a good school. Shrinivaspur and Sidlaghatta have held a fair position. At Dodballapur the attendance is large. Those at Holé Honnur and Nyamti are doing well.

102. I regret to record the death of Sivarudramma, the Lingayat Head Mistress of the Chitaldroog School. She was highly interested in her work and very popular in the place. There are female assistants at Holé Honnur, Sidlaghatta and Chitaldroog. One at Chikballapur was removed, and Alamelamma, a young Brahmini widow, who had charge of the promising Branch Girls' School at Melkote attached to the Hobli school, unfortunately died.

103. AIDED PRIMARY SCHOOLS.—There are 2,414 pupils in these schools, as compared with 2,373 last year. A slight decrease has taken place in the pupils of the English schools and an increase in those of the Vernacular schools. The English schools call for no special remarks, being the Primary departments of schools already specified.

	Schools.	Pupils.
English	6	219
Kannada	23	1,616
Tamil and Telugu	7	411
Hindustani	2	168

104. The *Kannada Schools* are composed of 14 belonging to the Wesleyan Mission, 5 to the London Mission and 4 to the Roman Catholics. The 4 Wesleyan and 4 London Mission schools in Bangalore are in a flourishing and prosperous condition, as also 3 Wesleyan schools in Mysore and 4 in Túmkúr. The others established by the same body are in Hassan, Shimoga and Chikmagalur. Altogether these schools are doing important work.

105. The *Tamil and Telugu Schools* include the excellent Hindu Female School and the Regimental Native Girls' School, both in Bangalore and under native management. Also the Tamil Girls' School of the Queen's Own Sappers and Miners. The others are the popular Alsur Caste Girls' School, the Blackpalli Roman Catholic School, those of the Convent of the Good Shepherd and of St. Paul's Mission, all Tamil.

106. The two *Hindustani Schools* are situated, one in the Cantonment and the other in the Town of Bangalore. The girls receive instruction principally in reading and in translating from Persian. Writing is very slightly cultivated and arithmetic not much. In the Madrasa Mufid-un-Nisvan needle and fancy work are taught. The Deputy Inspector was accompanied by a lady who was admitted behind the parda to be present during the examination of the gosha girls.

VI. SPECIAL OR TECHNICAL TRAINING.

107. The institutions for Special or Technical training are, on the part of Government, the School of Engineering and Natural Science at Bangalore and the Jail Schools at Divisional Head-quarter stations: the Aided institution is the Literary and Scientific Institute, Bangalore.

108. *School of Engineering and Natural Science.*—During the year under review. this school has gone through a variety of important changes. Mr. W. P. Lynam, C. E., the Principal, retired on the 21st February last, giving over charge to Mr. E. R. Subbarayar, B. A., B. C. E., his Assistant. The latter, again, was taken on to the permanent establishment of the Mysore Public Works Department as an Assistant Engineer, and delivered over charge on the 22nd March to Mr. C. A. Mahadeva Shastri, B. A., B. C. E., appointed to carry on the school.

109. The constitution of the school too has been greatly changed by the abolition of the Senior department for supplying the local D. P. W. with Assistant Engineers and the Forest Department with Assistant Conservators. There is a proposal also to withdraw the scholarships and guarantee of appointment from the Lower department. This latter change the Acting Principal considers is likely to operate prejudicially towards the interests of the school, as most of the attractions for studying for Overseers and Sub-Overseers will thereby be taken away. If the school, he adds, is to train men for Overseers and Sub-Overseers, the services of an Assistant Master to teach surveying and drawing will be needed.

110. In the beginning of the year under review there were in all 10 students in the school, 4 in the Senior department and 6 in the 2nd class of the Junior department, or the Sub-Overseers' class.

111. The 4 students of the Senior department joined the school in January 1877. After a common course of study for two years, they in January 1879 entered on the special studies required to qualify for the departments to which they would be attached, as per margin. In addition to the instruction at College, lectures on Geology were delivered by Mr. Lynam in the Museum, which was closed for the purpose for an hour once a week; and the Forest students received lectures on Botany and Vegetable Physiology at the Lal-Bagh from Mr. Cameron, the Superintendent. The whole course was completed by January 1880, and in March they underwent examination by a Committee presided over by Major Bowen, R. E., with whom was associated Mr. Hutchins, Assistant Conservator of Forests. The results were not determined by the close of the year.

For Public Works Department.

Sitaram Rao.
Ranga Rao.

For Forest Department.

Narayan Rao.
Prahlada Rao.

112. In the Junior department no first or Upper Subordinates' class was formed. In the 2nd class there were 6 students preparing for the Sub-Overseer's grade. They were admitted in April 1878. One was dismissed in June 1879 for irregular attendance and another admitted in July. Since the close of the year these students have completed the appointed course of study, and await examination.

113. Two ex-Mutsaddis were admitted in October last to learn drawing, surveying and engineering. One of them owing to ill health left after a month and a half. The other has gone through the prescribed course and is ready for appointment as a Taluk Mestri.

114. The numbers under instruction in Jail schools are as given in the margin. With the exception of the boys in the Juvenile Reformatory and 5 at Mysore, all are adults. There are 11 learning English, 918 learning Canarese and 15 Hindustani.

	Male.	Female.
Central Jail	401	26
Juvenile Reformatory	30	0
Mysore Jail	332	0
Shimoga Jail	150	6

115. Dr. Henderson's report on the Central Jail contains the following remarks on the education of the prisoners. "In this year education has been a little more attended to: owing to the gradual decrease in the number of prisoners the locking up did not trench so much upon the evening school hours as in last year. The return shows that during the year 375 prisoners were released from those who were under instruction, out of whom 237 learnt to read and write a little, and 47 who could do so well. The instruction is entirely in Canarese, except a few in English, required for Press work. The numbers at school on the last day of the year 1879 were, in the 1st or lowest class 273, 2nd 24, 3rd 18, 4th 14, 5th 12, English class 12, women 25, boys 22, monitors and others 149. Total 549.

116. The boys in the Juvenile Reformatory are engaged at school for 4½ hours daily in the forenoon; after that they work in the garden, fetch water, cleaning up, &c., and some go to learn a trade. There has been 1 at carpentry, 1 at press, and 2 at carpet work for most part of the year and they have made good progress. Their education goes on very well; some of them exhibit much intelligence and readiness at their lessons. They are taught to work out sums in English figures. They learn Grammar, Geography, Canarese verses and other useful acquirements.

117. The Aided Literary and Scientific Institute is principally resorted to by Europeans and Eurasians. Since the close of the year there has been a great accession of members. The Library and Reading Room are much frequented and arrangements are being made for the delivery of a suitable course of lectures.

VII. SCHOLARSHIPS.

118. The Government scholarships given during the year for general instruction were 49 in number, amounting to Rs. 1,632, and distributed as follows:—

		Number.	Amount. Rs.
Colleges,	Senior B. A. students	4	360
	Junior Do do	4	192
	Senior F. A. do	11	396
	Junior Do do	13	444
High Schools,	Matriculation do	17	240

Of the above, 18 were attached to the Central College, 27 to the Mysore College and 4 to the Shimoga College.

119. For special instruction there were also given 7 scholarships amounting to Rs. 826, as per particulars at foot:—

	Number.	Rate.
Engineering students	5	Rs. 12 a month.
Do „	1	„ 8 „
Ex-Mutsaddi	1	„ 6 „

120. Besides the above, there were 13 private scholarships held at the Central College, Bangalore, and Maharaja's College, Mysore, amounting to Rs. 828, of which the following are the details:—

		Value Rs. 20 a month.
1	Palace scholarship	
3	Given by Mr. Venkatvarda Aiyangar, M. L., B. A.,	„ „ 30 „
1	Dobbs' scholarship	„ „ 7 „
8	Raja's scholarships for vernacular students	„ „ 12 „

VIII. EMPLOYMENT OF STUDENTS IN THE PUBLIC SERVICE.

121. There is little to add to the details given under this head in last year's Report. The demand for educated men for appointments in the public service is universal. No special test for admission to the Government service has been imposed in this Province, but numbers take advantage of the U. C. S. examinations of the

Madras Government, both General and Special Tests. The former is now superseded by the Middle School examination, regarding which some remarks have been made in a former part of this Report, para 56. The Special Tests are obligatory here for practising the legal profession, and there are departmental tests in each branch of the service, without passing which confirmations in appointments or promotions to higher grades are withheld.

IX. BOOKS.

122. The value of the stock of books in the Central and Branch Book Depôts on the 31st March 1880 was Rs. 74,661. The number of books added during the year was 33,650 at a cost of Rs. 12,403.

123. The Branch Depôts were supplied with 23,040 books valued at Rs. 7,132; while the total amount realized by sales under all heads and paid into Government Treasuries was Rs. 14,231.

124. The following is the list of local publications purchased for the Department:—

Copies.	
200	Padya Sara Prakasika.
200	Morris's, India (Can).
700	English First Book, Anglo-Can. edition.
350	„ Second „
200	Telugu Second Book.
50	„ Third „
25	Valmiki Ramayana.
200	Múla Amara.
2,500	Amara Kosha, 1st Kanda.
100	Tika Amara
89	Katha Sangraha, Part II.
200	Panchatantra
500	Hindustani Second Book.

125. The following works were printed for the Department:—

Copies.	
10,000	Katha Saptati
5,000	English First Book
5,000	Amara Kosha, with English and Canarese meanings.
5,000	Agricultural Class Book, English and Canarese.

126. The latter work is one prepared for use in the vernacular schools by Mr. F. E. Harman, M. R. A. C., F. C. S., Superintendent of the Government Experimental Farm. The original English is printed together with the translation into the vernacular, thus increasing the utility of the book. The Sanitary Primer for Indian schools, prepared by Dr. Cuningham for the Government of India, is now under translation, to be printed in the same manner for school use.

127. The large coloured wall-map of India has been completed and issued to schools in two editions, one containing the names in Kannada and the other in Hindustani. The wall map of the World, prepared here in Kannada some years ago, continues in constant supply.

128. According to the report separately submitted of publications registered in Mysore during the year 1879, the total number was 27. They include one in English, 19 in the vernaculars, 4 in Indian classical languages and 3 in diglott. Of the vernacular works, 10 were in Kannada, 7 in Hindustani or Urdu, 1 in Tamil and 1 in Telugu: of the classical works 3 were in Sanskrit and 1 in Persian: the diglotts were 2 in Sanskrit and Kannada and 1 in English and Hindustani.

129. Classified according to subjects, they are thus distributed: Biography 1, History 2, Language 4, Law 1, Medicine 2, Miscellaneous 5, Poetry 1, Philosophy 2, Religion 8, Science 1. Of the publications 7 are described as educational, the remainder belonging to general literature.

BANGALORE,
1st June 1880.

L. RICE,
Director of Public Instruction,
Mysore and Coorg.

READ—

The Report by the Director of Public Instruction on Public Instruction in Mysore for the year 1880—81.

No. 1640—G. 590, DATED BANGALORE, 8TH OCTOBER 1881.

REVIEW BY THE OFFICIATING RESIDENT.—The cause of education in Mysore appeared to have received a check two years ago ; and there was some reason to fear that the adverse circumstance, arising from the famine, which had then affected it, might work a permanent injury, or at least one that it would take long to efface, but those who believed in the inherent vitality of the popular system of education in Mysore, and who felt confident that the check was but temporary, have proved signally correct ; and the past year 1880—81 carries a record the like of which has not been seen. With more expenditure thrown upon Local Funds until they bear upwards of half the cost of instruction, relieving the State funds to the extent of Rs. 62,648 and with economies that have reduced the aggregate expenditure by Rs. 11,554, there have been at once an increase of schools, Government and Aided, and of pupils taught in them, who numbered 42,657, coincident with an increased income, and, what is a most satisfactory feature, an increased income from school fees.

2. The Government educational income was Rs. 1,82,546 of which Rs. 41,633 were collected from fees and the sale of books, the rest being Local Fund and Municipal contributions. Hitherto the aid given by Municipalities to education has been exceedingly trifling, but for the future the Middle English schools at Taluk Headquarters will depend upon the Municipality for funds, the fees collected in those schools being at the same time paid to the credit of the Municipality.

3. There were in the past year 1,087 Government and Aided schools teaching 42,657 pupils (38,713 boys and 3,944 girls) and the expenditure of both Local and State funds was Rs. 2,99,399. The Director of Public Instruction contrasts these figures with the statistics of ten years ago when there were 540 schools teaching 20,958 pupils, and he has reason to congratulate himself upon the progress that has been made, the more especially that expenditure has been reduced by nearly 24 thousand rupees although schools and pupils have doubled in number.

4. By far the greatest number (82 per cent of the whole) of the pupils are Hindus, Muhammadans give 10 per cent and the rest are Europeans and Eurasians, Native Christians and others. Again dividing the whole according to the standard of their education, a very few, only 132 pupils, come under university education, 7·2 per cent are classed in secondary and the greatest number, 89·7 per cent, are under primary education. This is owing to the well sustained popularity and efficiency of the Hobli schools for Vernacular primary education in which the number of pupils has again considerably increased. Expenditure upon these schools is met entirely from the Local Funds and it is an exceedingly satisfactory feature that so widely extended and popular a means of elementary instruction is firmly established without any expense to the State. The cost of primary education too is exceedingly small.

5. By the comparative statement given in the 20th paragraph of the Director's report it appears that each pupil in the primary school only costs Rs. 3—13—3 per annum of public money. In secondary schools each costs Rs. 21—0—3 and each university student costs Rs. 199—12—5. Further on it is seen that the fees paid by the latter class average Rs. 31 per head so that the net average cost to the State is Rs. 169 per annum. The average annual fee per head paid by the 38,296 pupils undergoing primary education was 9 annas which, small as it is, further reduces their net cost.

6. The Inspecting agency of the Province remained unchanged, and consists of 4 Deputy Inspectors who visit all Middle and Primary schools at District or

Taluk stations, and of Sub-Deputy Inspectors for the Hobli and Hindustani schools. A fifth Deputy Inspector has charge of Bangalore and is also Assistant in the Director's Office.

7. Of the 13 students who went up from the Central College for the B. A. examination, six passed, three in the 2nd and three in the 3rd class. For the F. A. 37 candidates presented themselves, of these 18 were successful.

8. Of the 321 students who went up for Matriculation, 8 passed in the 1st, and 118 in the 2nd class; or 34 in excess of the number who passed last year.

9. The Government English High schools at Head-quarters of Districts have now, it is observed, all been brought up to the matriculation standard.

10. Arrangements for improving the status of Taluk Middle English schools are under consideration. In para 68 of his Report the Director of Public Instruction gives a list of seventeen of these schools with from one hundred to upwards of three hundred pupils; there are twenty others with numbers ranging from seventy to one hundred.

11. An addition has been made during the year to the number of Aided English High schools in the Province. In this institution, Marimallappa's school at Mysore, a number of boys are boarded and educated free. It has been endowed, but to what amount is not stated. In regard to two of the older established Aided High schools reference is made in the report to the great decrease in the number of boarders, as compared with previous years; this decline is attributed to the reception of boarders by private families at lower rates. This naturally raises the question whether the charges made by these schools might not with advantage both to the schools and the public be so far modifical as to place them more within the means of parents residing at a distance.

12. The number of Taluk and Hobli Primary Vernacular schools has risen from 892 in 1879—80 to 907 in 1880—81 with 38,296 pupils as compared with 32,679 in the previous year; of these 785 are Government schools with 30,543 pupils and 122 are Aided, with 7,753 pupils. The fees realized during the year amounted to Rs. 7,680 in Government and Rs. 14,232 in Aided schools.

13. There were at the close of the year 3,077 girls under primary education. Female education is clearly gaining in popularity among the lower classes as evidenced by the fact of several applications having been made for the establishment of new Hobli schools for girls.

14. The School of Engineering has been re-constructed during the past year; this measure was considered advisable on several grounds; among others, the costliness of the institution, the small number of students who availed themselves of the special education it imparted, and the very unsatisfactory results of the examinations held; the changes were carried out under the orders and instructions of Sir James Gordon the (late) Chief Commissioner. Instruction up to a collegiate standard has been discontinued and is now limited to that required by Overseers in the Public Works Department including also instruction in matters relating to the Revenue, Topographical and Survey Departments. A limited number of scholarships have however been provided to aid deserving youths of the Province who may desire to graduate in Engineering in any one of the Presidency Colleges. Candidates for these scholarships are selected with due regard to their educational qualifications, intelligence, character and habits. The school now consists of two classes, the Overseer and Lower Subordinate; in the former there are 22 students and in the latter 6.

15. A Botanical and a Medical school have been opened during the year in Bangalore, the former with a view of affording instruction to Forest students. Week-

ly lectures are delivered on the subjects of Botany, Vegetable Physiology and Practical Gardening. The Medical school has been opened in connection with the Bangalore Pettah Hospital and is under the immediate control and supervision of the senior Medical Officer of the Local Government: it provides for a three years course of study and is principally intended for training medical subordinates of the lower grade. The arrangements in regard to scholarships of which there are four at present, tenable for five years, are the same as prescribed for the Engineering school. At the close of the year there were 14 students attending the Medical school

16. The Officiating Resident is glad to notice the liberal act of Mr. Krishnamúrti, Jahagirdar of Yelandur, in granting a special scholarship to a student from the Hassan High school, in order to enable him to pursue his studies at the Madras Agricultural College.

17. The numbers under instruction in Jail schools were 947 males and 27 females, as against a total of 660 the year previous.

W. J. CUNINGHAM,
Assistant Resident.

REPORT

ON

PUBLIC INSTRUCTION IN MYSORE,

FOR THE YEAR

1880—81.

BY

L. RICE, Esq., M. R. A. S.

Director of Public Instruction in Mysore.

I. INTRODUCTION AND SUMMARY.

1. As a key to the results of the past year's operations, it may be stated, that the number of pupils under instruction has risen from 36,723 to 42,657; that the expenditure from Provincial Funds was less by Rs. 62,648 than in the previous year, and also less under all heads by Rs. 11,554; while at the same time the receipts increased from Rs. 1,69,026 to Rs. 1,82,546:—

2. *Number of Pupils.*—The following comparative statement of schools and pupils shows that the increase, though general, is mainly due to the Government schools; and among these it will be further seen that the Hobli schools contribute the largest share:—

Year.	Government.		Aided.		Total.	
	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.
1880—81	899	33,287	188	* 9,370	1,087	42,657
1879—80	871	28,054	180	8,669	1,051	36,723
Increase.....	28	5,233	8	701	36	5,934

3. The aggregate of children in the schools connected directly or indirectly with Government now stands at the highest figure ever yet reached in Mysore, and the following statistics for the past four years show a steady and marked improvement in this respect, with at the same time an equally decided reduction of educational expenditure and increase of educational income:—

Year.	Schools.	Pupils.	Expenditure.	Receipts.
1877—78	928	34,797	3,40,665	95,288
1878—79	1,055	34,378	3.29,292	1,45,392
1879—80	1,051	36,723	3,10,953	1,69,026
1880—81	1,087	42,657	2,99,399	1,82,546

4. Going back ten years for comparison, it appears there were then 540 schools with 20,958 pupils: the expenditure amounted to Rs. 3,22,909, and the receipts to Rs. 39,190. The present year's figures contrasted with these speak for themselves.

5. Of the pupils now under instruction 38,713 are boys and 3,944 girls. By creed or caste, there are 35,757 Hindus, 4,330 Muhammadans, 1,142 Europeans and Eurasians, 1,051 Native Christians, and 377 others.

6. The following table shows their distribution according to the appointed standards of education:—

Class.	University.		Secondary.		Primary.		Special.		Total.
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	
Hindus	117	...	2,435	22	30,079	2,267	812	25	35,757
Muhammadans	...	...	185	...	3,885	157	101	2	4,330
Europeans and Eurasians ...	10	3	244	102	411	261	111	...	1,142
Native Christians ...	2	...	91	3	583	367	5	...	1,051
Others	...	...	2	..	261	25	89	...	377
Totals.....	129	3	2,957	127	35,219	3,077	1,118	27	
	132		3,084		38,296		1,145		42,657

7. Although the issue of the year's work has been to so great an extent successful, the Government schools have been exposed to one considerable interruption, arising out of Census work. With hardly an exception the whole of our Taluk and Hobli masters, and many senior pupils, were engaged for several weeks from Christmas as Supervisors and Enumerators. And since the Census was taken, a large body of the best of the masters has been retained at District head-quarters for months in tabulation of the results. During the first period the schools were mostly at a stand still. Under later arrangements substitutes have been appointed to do the school work of those who are absent. But it will be readily understood that the interruption occasioned altogether has been serious. At the same time the educational subordinates, it is believed, have rendered valuable help towards ensuring the accuracy of the Census, and no doubt lessened much of the odium with which many classes of the population regard it.

8. The details in the subjoined comparative statement will show how general the advance in attendance has been in the various grades of schools:—

Grade.	Institutions.		1879—80.		1880—81.	
			Schools.	Pupils.	Schools.	Pupils.
University ..	Colleges ...	... ...	4	119	4	132
Secondary ...	Boys' High Schools...	English ...	14	636	15	609
		Vernacular ...	2	40	4	39
	Middle Schools ...	English ...	24	1,132	27	1,275
		Vernacular ...	93	955	105	1,084
	Girls' High Schools...	English ...	2	21	2	12
	Middle Schools ...	English ...	6	93	6	90
		Vernacular ...	7	56	7	25
Primary ...	Boys' Primary Schools ...	English ...	32	1,888	32	2,101
		Vernacular .	810	27,933	823	33,118
	Girls' Primary Schools ...	English ...	6	219	6	261
		Vernacular ...	44	2,639	46	2,816
Special ...	Engineering and other Schools	... ...	7	992	10	1,145
		Total.....	1,051	36,723	1,089	42,657

9. In the following table the respective strength of the Government and Aided schools is shown separately under each grade:—

Grade of Instruction.		Government.		Aided.	
		Schools.	Pupils.	Schools.	Pupils.
University Education		3	122	1	10
Secondary do	Boys...	99	1,575	52	1,382
	Girls...	3	6	12	121
Primary do	Boys...	774	30,049	81	5,170
	Girls ..	11	494	41	2,583
Special or Technical		9	1,041	1	104
	Total.....	899	33,287	188	9,370

10. *University Education.*—The number of students who graduated as Bachelors of Arts from Colleges was treble that of last year. The results of the First Arts Examination were about the same, but more favorable to the Maha Raja's College than to the Central College compared with the previous year.

11. *Secondary Education.*—From the High Schools 126 were successful in Matriculation against 92 last year; but still too large a proportion of candidates present themselves without due preparation. The Middle school examination, which will doubtless to some extent check this, excited a good deal of competition. The number who passed was 186 against only 16 last year, but at that time the regulations had not been sufficiently made known.

12. *Primary Education.*—The increased attendance at Primary schools reported last year has not only been sustained, but a much greater advance has been made. It is again gratifying to note that the improvement is chiefly due to the Hobli schools, of whose continued popularity abundant testimony is received from all parts. Of the pupils in Primary schools 2,560 passed the Upper Primary, and 12,273 the Lower Primary, examination.

13. *Female Education.*—There are 314 more girls under instruction than last year, and applications are coming in from several taluks for new Girls' schools, not only Hindu but Muhammadan. The chief drawback in these schools is irregular attendance and the early age at which the girls are withdrawn. This year the marriage season seems to have been an unusually busy one.

14. *Special Education.*—The important steps taken during the year to provide students with the means of obtaining collegiate instruction for the Engineering and Medical professions at the large Presidency Colleges are fully detailed in the proper place; where also the new arrangements for local instruction in Engineering, Botany and Medicine are described. The example set by the Jaghirdar of Yelandur in supporting a student at the Agricultural College, Madras, is one that particularly deserves to be generally made known.

15. In considering the results and tendency of the Government educational system in Mysore, it may be remarked, that affiliation to Madras compels us in University and Secondary education to conform to the courses of study there established, but in the regulation of which we have no voice. It is a question whether in some respects affiliation to Bombay, with which this country has so close an affinity, might not perhaps be more in accord with the genius of the people. And in regard to the South Indian languages there seems no reason why Mysore should not take up a position corresponding to that of the Panjab with reference to the Northern vernaculars. In Primary education we are, so far as the rural population are concerned, unfettered; and the aim, which to a considerable extent is being realized, in this branch is to supersede by an intelligent system the old one of rote in teaching the rudiments which compose "the three Rs," at the same time retaining whatever was good in the time-honored methods. It were to be wished however that some agricultural and industrial teaching could be superadded. Under Special Education the want of the Normal school continues to be greatly felt; and in Female schools some arrangements are needed for teaching needlework. In bestowing Grants-in-aid on private schools the encouragement, by preference, of such as occupy neglected fields of work is steadily kept in view.

16. *Expenditure.*—The total Government expenditure was reduced to Rs. 2,99,399 from Rs. 3,10,953 last year. The expenditure from Provincial Funds alone was diminished to Rs. 1,58,423 from Rs. 2,21,071 ; and Local Funds now bear more than half the cost of instruction.

17. The following is the distribution of the charges, and the funds from which they were met:—

Head of Charge.	Provincial Funds.	Local Funds.	Municipal Funds.
Direction with its subsidiary charges	16,872	...	...
Inspection do do	12,716	9,562	...
Instruction, including all other charges	1,28,835	1,28,659	2,755
Total Rs.	1,58,423	1,38,221	2,755

18. From private funds there was an expenditure of Rs. 91,629 additional, against Rs. 81,311 last year. The total amount therefore spent on education during the year from both public and private funds aggregates Rs. 3,91,029.

19. On analysing the expenditure on instruction in Government and Aided schools respectively, the following results are obtained:—

Grade.	Institution.	Government.		Aided.	
		From Provincial Funds.	From Local Funds.	From Provincial Funds.	From other Sources.
University ...	Colleges	24,961	...	1,410	1,160
Secondary .	Boys' High Schools, English ...	16,121	976	4,920	13,554
	Vernacular...	...	...	400	571
	Middle Schools, English ...	16,915	1,044	6,594	17,570
	Vernacular...	...	12,896	1,913	2,878
	Girls' High Schools, English ...	..	..	550	715
	Middle Schools, English ...	...	...	2,118	4,779
	Vernacular...	...	153	223	394
Primary ...	Boys' Primary Schools, English ...	7,681	251	7,436	7,849
	Vernacular...	...	1,06,860	9,971	12,174
	Girls' Primary Schools, English ...	...	...	2,942	6,487
	Vernacular...	...	3,711	7,905	12,248
Special ...	Engineering and other Schools.. ...	6,728	...	600	1,250
	Total Rs. ...	72,406	1,25,891	46,982	91,629

20. Or the Government expenditure may be thus summarized and exhibited, with reference to the numbers under instruction in each grade:—

Grade of Instruction.	Expenditure.	No. of Pupils.	Cost per head per annum.
			Rs. A. P.
University	26,371	132	199 12 5
Secondary	64,823	3,084	21 0 3
Primary	1,46,757	38,296	3 13 3
Special	7,328	1,145	6 6 4

21. The cost of Taluk Vernacular schools last year was transferred from Provincial to Local Funds, but the fees will not be credited to the latter till the present year. A further step in the same direction has since been taken in transferring the cost of Taluk English schools, both those now in existence and others that may be established, to Municipal Funds. But as the latter are in many places inadequate to bear the charge at present, a grant of one-third of the cost will be made from Provincial Funds. The fees collected will be credited to these schools.

22. Of the expenditure incurred on Grants-in-aid, the following tables give various particulars of the distribution, showing the amount received by different denominations, and the amount devoted to each language :—

By Denominations.	Government Aid.	Private Expenditure.	By Languages.	Amount.
Church of England	9,840	13,171		
Do Scotland	3,960	9,195	English	26,510
Wesleyan	11,694	21,812	Kannada	8,612
London Mission	4,500	16,808	Tamil or Telugu ...	3,672
Roman Catholic	6,040	18,021		
Hindu	4,892	5,515	Hindustani	5,456
Muhammadan	5,456	5,857	Sanskrit	2,732
General	600	1,250		

23. *Receipts.*—The total amount of receipts for the year paid into Government treasuries was Rs. 1,82,546, which shows a great advance over the Rs. 1,69,026 of last year. The following are the items :—

	1879—80.	1880—81.
School fees	18,174	22,860
Proceeds of Book sales ..	14,231	18,773
Share of Local Fund collections ..	133,790	138,158
Municipal contributions ..	2,831	2,755

24. In Aided schools the receipts from private sources are reported at Rs. 91,629, of which Rs. 34,390 represent school fees. The total is Rs. 10,000 higher than last year, but the fees are Rs 3,000 lower. Adding the private receipts to those in Government schools, we obtain the sum of Rs. 2,74,175 as the total educational receipts for the year from all sources.

25. The amount of fees realized from year to year in the Government Colleges and Schools is growing with very decided steps. They now yield a larger amount than has ever before been obtained from that source.

II. CONTROLLING AGENCIES.

26. *Inspection.*—No change was made during the year in the inspecting agency, which under recent arrangements consists of Deputy Inspectors and Sub-Deputy Inspectors. The former visit all Middle and Primary schools at District or Taluk stations and the Aided schools. Of the latter, the Hindus visit the Hobli Primary schools and the Muhammadans all the Hindustani schools.

27. Of the four Deputy Inspectors in charge of Circles, the first place is due to V. Nadamuni Naidu of the North Circle, for the method and judgment with which he has discharged his duties. B. Desikachari of the West Circle has also done very well, and kept up a good control over his work. The fifth Deputy Inspector, Mr. W. Grieveson, who has charge of Bangalore and is also Assistant in this Office, has been very industrious and useful and has rendered valuable help. He states "I have noticed with pleasure an increasing desire on the part of Managers and, Heads of schools to consult me as to the best means for improving their respective schools. I may also mention that at every school I have been warmly welcomed and ably assisted in my work."

28. The Sub-Deputy Inspectors of Hobli Schools, fifteen in number, have been stimulated to greater activity and systematic work by a personal disposal of their monthly reports, enabling prompt and direct action to be taken on all matters brought to notice. The results show that, excepting in the case of Bangalore West and perhaps that of Mysore East, a very creditable amount of work has been done by this important class of officials.

29. Of the two Hindustani Sub-Deputy Inspectors, Khwaja Mahmud has continued the steady discharge of his functions for which he has been several years distinguished. Sayad Mustafa was unfortunately laid aside for sometime by severe illness.

III. UNIVERSITY EDUCATION.

30. As last year, the Colleges are 3 Government and 1 Aided. The number of students has risen from 119 to 132, of whom only 10 are in the latter, including 3 girls. These 10 with 3 others are Europeans or Eurasians, all the rest being Hindus, except 2 Native Christians. The Government Colleges contain 18 students for a degree, and 104 for the First Arts examination: the Aided College 4 and 6 respectively. The amount of fees realized has risen to Rs. 2,931 in the Government Colleges and Rs. 1,160 in the Aided College, from Rs. 1,460 and Rs. 600 last year; or more than doubled in the former and nearly so in the latter.

31. *M. A. Examination.*—One teacher from Mysore appeared, but failed to secure the minimum total of marks required, though he passed in the individual subjects.

32. *B. A. Examination.*—For this, 13 students went up from the Central College, of whom 6 passed, 3 in the second and 3 in the third class. Visvesvaraiya took a high place as 6th on the list for the whole Presidency, there being no first class this year.

33. *F. A. Examination.*—The following are the figures relating to the First Arts examination:—

	Registered.	Examined.	Passed.
Bangalore . ..	26	25	12
Mysore	11	10	5
Shimoga	2	2	1
	39	37	18

34. As regards students from the respective Colleges the results stand thus:—

College.	Registered.	Examined.	Passed.		Total.
			I	II	
Government—					
Central College	16	14	...	5	5
Maha Raja's College	9	9	2	3	5
Shimoga College	2	2	...	1	1
Aided—					
Bishop Cotton's	6	6	1	4	5
Total.....	33	31	3	13	16

Chew of Bishop Cotton's and Srinivasaiengar of the Maha Raja's College took the highest place, being bracketed together as 13th in the first class. Subba Rao of the latter College stood 20th.

35. *Central College.*—Continued under Mr. C. Waters, M. A., as Principal, with Mr. H. J. Bhabha, M. A., as Vice Principal. The First Assistant, Mr. King, being transferred to Shimoga, his place was filled up by Mr. A. E. Adolphus. He was the first B. A. of his year, and subsequently gained a Gilchrist scholarship, with which he went to England and studied at the London University, having matriculated there with honors. But the state of his health compelled him to resign the scholarship and return to India last year. The Tamil Munshi died, and Narayansami Pille was selected to succeed him. Arrangements are being made for teaching Sanskrit.

36. The College department has 72 students against 66 last year, and the fees yielded Rs. 1,472 against Rs. 1,112. Taking all the departments together, the attendance has risen from 511 to 521 and the fees from Rs. 5,712 to Rs. 6,475. Of the College students, 18 are reading for a degree and 54 for the F. A. examination.

37. Mr. Waters says, "The success of the College in the University examinations has been satisfactory on the whole, considering the means at our disposal and the attractions we can offer. We can get passed F. As only from Mysore, and the best of these often go to Madras on account of advantages which they are inclined to over-estimate.

38. "As I anticipated in last year's report, the senior B. A. class did well, the first one, Visvesvariya, being 6th in the list, which he would probably have headed had he not been obliged to do the greater part of his Mathematics alone, whereas those who took up Logic were taught several hours a week. But this could not be avoided. The difficulty of the Logic papers, and the strictness with which they appear to have been marked, prevented our second student Chelavaiengar coming as near Visvesvariya as was expected. One other student should have been credited to us, as he read in the College for two years, but left last year because he was not allowed to be a free student. With one exception, we now have no free students. Holders of scholarships pay half the class fee. I looked for 10 to pass the B. A. examination, and our success would have been greater had not one taken up a teachership 6 months before the examination, and two others failed through laziness. Altogether the class contained a hardworking nice set of boys who quite deserved success. The junior B. A. class contains some good students, but they have not attended very regularly.

39. "In spite of the severity of the Matriculation examination two years ago, the senior F. A. class, drafted from passed boys of that year, did badly. Only 5 passed. The examination was perhaps somewhat severe, the class very irregular. This and the following year's class are more promising. The latter contains about 34 students.

40. "Some time ago there was a talk about building houses for boys who come from the District schools to read for the F. A. and B. A. examinations. Many give up reading because they cannot afford to board at hotels, which besides are uncomfortable. If native liberality were to provide such a building, the students would regard it as a boon.

41. "A Central College boy won the Challenge Cup at the United Schools Athletic Sports. A short address to the boys was given by Dr. Pope, and Mrs. Payn kindly distributed the prizes. The boys do not take so much interest as in former years. I am sorry to say I am unfortunate in having no teacher who cares much for these things".

42. *Maha Raja's College.*—On the transfer to Kolhapur under the Bombay Government of Mr. C. H. Candy, B. A., L. L. M., who had made himself very popular at Mysore both among the Europeans and the Natives, Mr. C. M Leonard, B. A., from Shimoga College, was appointed Principal, and took charge in June. In the College department there are 42 students. The fees have risen to Rs. 1,294, or fourfold what they were last year.

43. The number of pupils in the whole institution is 240 against 268 last year. The falling off is confined to the primary classes, and is due to the preference shown by parents for the early morning hours of the other schools in the place where very young boys are concerned. On the other hand, the total fees amounted to Rs. 3,626 against Rs. 2,163 last year.

44. The Head Master reports:—"Owing to the very favorable results of the Mysore schools (the Wesleyan Mission, Mari Mallappa's and our own) at Matriculation in December 1879, our junior F. A. class was unusually strong during the year 1880. The results in December last, though not so good as in the previous year, gave us another F. A. class in February almost as strong numerically as its predecessor.

45. "On the whole the College did fairly well in the University examinations. Five of the eight F. A. candidates passed creditably, two being well to the front in the first class. Of these, two have joined the Central College, two others have entered the Presidency College and the last has joined the Christian College, Madras. I should like to see all our passed F. A. candidates joining the Central College, Bangalore, as this is the only other school in the Province likely to prove a feeder to the B. A. class at Bangalore.

46. "For the Matriculation examination 20 appeared and 9 were successful, all in the second class. Six others also, who however were not considered to be sufficiently prepared, presented themselves, but failed. Among the successful candidates was one (A. Lingaraj Aras) of the 6 boys who joined the College from the Royal School on the breaking up of the Matriculation class there in June 1880. A strong desire for the study of Sanskrit has been evinced throughout the school and arrangements are being made for providing instruction in it.

47. "Cricket continues to be a favorite game with the boys of all classes. No matches were contested during the year, though the bi-weekly practices have been uninterrupted. Lawn tennis was introduced during the year and proved most attractive. A court was prepared and every requisite procured from the proceeds of a small monthly subscription paid by the students.

48. "The College and the High School students have freely availed themselves of the advantages afforded them by the Library, and have begun to understand better the great and lasting benefits of self-help.

49. "I feel bound to say a word in just praise of the late Head Master, Mr. Candy. He left the College in excellent working order, and it is to this more than to any thing else that its success and present satisfactory state are mainly attributable."

50. *Shimoga College.*—In May, Mr. A. G. King, B. A., from the Central College, was appointed Head Master in succession to Mr. Leonard. There are 8 students reading for the F. A. examination. The fees in the College classes yielded Rs. 165 in place of Rs. 60 last year. Taking all departments into account, there are 183 pupils, and the total fees have risen from Rs. 1,584 to Rs. 2,050. A new feature has been the introduction of home exercises, which seem to have had a good effect in improving and settling the knowledge of the pupils individually. Weekly written examinations were held throughout the classes.

51. The gymnasium provided by the gift of His Highness the Maha Raja has proved a great attraction to the boys. Cricket has been kept up during the season. A Reading Room and Library have been started for the masters and upper students. The Head Master acknowledges the support received towards its establishment, in books and money, from Colonel Clarke, Messrs. Narasimmaiengar, Venkat Vardaiengar, Raghavendra Rao and other gentlemen.

52. *Bishop Cotton's.*—Has continued under the charge of the Revd. Dr. Pope as Warden. At Christmas the services of Mr. Cox, the principal Assistant, were dispensed with from motives of economy. The College classes contain 10 students, of whom 3 are girls. Miss. Gow, the first young lady who matriculated in the Madras Presidency, passed the late F. A. examination and is now reading for a degree. Two others who have matriculated are continuing their studies for the F. A. It will be seen that 5 students passed, out of 6 sent up for the First Arts examination, of whom 4 took good places. Another student, who passed the F. A. last year, was successful in the severe examination for admission to the Thomason Civil Engineering College, Roorkee, being 8th of 16 competitors. It is to be regretted that Dr. Pope, who has mainly by his own exertions brought Bishop Cotton's up to the present standard, contemplates resigning on the ground of failing health.

IV. SECONDARY EDUCATION.

53. Under this head are comprised the High and Middle schools, or departments of schools. The total number is 166 with 3,084 pupils, as compared with 148 last year with 2,933. The following are the details for 1880—81.

Class of School.		Government.		Aided.	
		Schools.	Pupils.	Schools.	Pupils.
Boys' High Schools,	English	8	253	7	356
" "	Vernacular	...	...	4	39
Middle Schools,	English	13	650	14	625
" "	Vernacular	78	672	27	362
Girls' High Schools,	English	...	...	2	12
Middle Schools,	English	...	...	6	90
" "	Vernacular	3	6	4	19
	Total.....	102	1,581	64	1,503

54. The fees in the Government schools rose to Rs. 12,176 from Rs. 9,790 last year, while the fees in the Aided schools fell to Rs. 18,998 from Rs. 21,930. This decrease is chiefly in the English High Schools, both for boys and girls.

55. *Matriculation Examination.*—For the Matriculation examination, which forms the terminal test of the High School course, 327 candidates were registered and 126 passed, or 34 more than last year. The following are the figures for each station :—

	Registered.	Examined.	Passed.
Bangalore	245	241	97
Mysore	57	55	21
Shimoga	25	25	8
	327	321	126

56. The subjoined list shows the High Schools from which candidates went up and the results as regards each institution :—

High Schools.	Presented.	Registered.	Examined.	Passed.

* From Central College 2, Kolar 2, Shimoga 1, Hassan 1.
† From London Mission 2, Wesleyan, Bangalore 2.

57. The column headed Presented indicates the number of candidates sent up by and with the approval of the Heads of schools, while the column of Registered shows the actual number of applicants for examination who entered themselves as students of each institution. The difference is the number of those who went up without or against the advice of their masters. In the case of certain schools (the London and Wesleyan Mission High schools being the most prominent instances) it will be seen what utter disproportion there is between the numbers recommended by the Principals as qualified for examination and the numbers that presented themselves though pronounced unqualified. Also from the results it will be apparent that some of the latter class must nevertheless have been successful. There seems to be a serious defect somewhere in connection with this matter. The inference is that a very large number of boys in each case were prematurely promoted and permitted to enter upon the preparation for matriculation notwithstanding that there was no, or but slight, probability of their qualifying themselves within the prescribed time. From the point of view of discipline this must be condemned as a system injurious alike to the students themselves and to the schools concerned.

58. One result produced is, that certain pupils withdraw themselves from school for the latter part of the course to avoid the predicament of being rejected as unqualified, and then, acting on their own judgment, present themselves as private students. The foot notes to the list include several such cases. This perhaps is the most respectful course, as the candidates argue that if the Principal's judgment was so far at fault as to admit them to a matriculation class before they were fit, it may equally misjudge their qulifications when the time comes for decision whether they shall be sent up or not.

59. *Middle School Examination.*—This forms the entrance examination for the High school course, and the termination of the Middle school course. Out of 464 boys and 48 girls who were candidates, 174 boys and 12 girls passed. Last year there were only 41 candidates, of whom 16 passed; but the examination had then been so recently established, and so short notice issued of it, that the results for the two years do not admit of comparison. The following were the numbers at each station:—

			Registered.	Examined.	Passed.
Bangalore	Boys	..	325	305	113
	Girls	..	48	42	12
Mysore	Boys	..	80	77	30
Shimoga	Do	..	37	35	17
Hassan	Do	..	22	20	14
			512	479	186

60. A proportion of the above were private students. The list of Middle schools or departments of schools which sent up candidates is here given:—

Middle Schools.	Registered.	Examined.	Passed.		
			I.	II.	Total.

61. The list is almost confined, so far, to the English schools, but the Vernacular Middle schools are preparing to compete and will no doubt find a place in future reports.

High and Middle Schools.

62. *Government.*—The English Schools are those at each of the District head-quarters, together with 5 Taluk Middle schools. In regard to those which form departments of Colleges it is unnecessary to add any remarks to what have already been made under that head. For the rest, it will be seen that none of the District High schools is now absent from the Matriculation list. This is the first year that all have reached that standard. Tumkúr has done very fairly under Mr. M. Clapham. The Kolar school, under Mr. W. Dunning, has evidently improved, in spite of the personal opposition he has met with. The others yet have work before them to raise the character of the teaching. But Hassan, under Mr. J. Arbuthnott, B. A., has taken a decided lead in the Middle School examination. Chitaldroog has also shown some results in this department. Mr. G. Dunning, who has had charge of the school during the year, has at the close of it received the appointment of Inspector of Indian Emigrant Schools under the Government of Natal, and is succeeded by S. Malhari Rao, B. A., 4th Assistant of the Central College.

63. The Taluk Middle English schools have long been unsatisfactory, both in attendance and results. Arrangements have therefore been made for reducing the scale of expenditure in the existing ones to a point more proportionate to the actual condition of the schools, and at the same time to extend the facilities for English instruction in taluk stations, the charges to be met chiefly from Muncipal funds, which have hitherto contributed—except in one case, that of Chikmagalur—nothing to education.

64. The following was the order issued on the subject, on the 25th of January, in response to proposals from this Office. "The Chief Commissioner is of opinion that English education solely at Government cost should be confined to the schools now established at District head-quarters, and that its extension to Taluk stations should be subject to the following conditions.

*These candidates and 1 from Hassan belonged to classes above the standard of the Middle school, and should therefore not have gone up for this examination.

"Classes for English instruction will be added to the Vernacular schools at such stations only at the instance of the Municipalities concerned, who must undertake to bear the entire cost of the additional establishment required, partly by contribution from Municipal funds and partly from fees. The fees may be fixed by them at such rates as they may consider adequate. The fees and expenditure connected with the English class should be kept distinct, and accounted for to the Municipality separately from the rest of the school. The school fee receipts from the Vernacular classes will, from the 1st April next, be credited to the Local Funds, which bear the charges. The arrangements regarding the English class in each case may be settled by the Deputy Commissioner in communication with the Director.

"Building expenditure connected with Taluk schools, Vernacular as well as English, should be borne in equal parts by the Municipality and the Local Funds. The only expenditure which the Government will in future bear in respect of these schools will be the cost of Direction and Inspection.

"Arrangements can be hereafter made for treating the service of English Masters appointed for Taluk schools as Government service, as this will greatly add to the value of the appointments and facilitate the change of these masters from Taluk to District schools and *vice versa*."

65. The recent transfer of a moiety of the mohatarfa collections to the Municipalities, it was considered, would enable them to bear the additional expenditure thus imposed on them; but on further representations it was ordered (21st May 1881) that "a Government grant-in-aid not exceeding one third of the cost will, for the present, be sanctioned towards the maintenance of the class for instruction in English which the Municipalities may desire to establish in connection with Taluk Vernacular schools."

66. The Vernacular schools are the middle classes of Taluk schools. As yet there are comparatively few pupils who care to remain at these schools to complete the Middle course, but the adoption of the Middle School Vernacular examination as the standard to be attained will doubtless prove an attraction that will in future deter many from leaving before they have passed it. There are Middle classes in 65 Kannada, 2 Telugu and 11 Hindustani schools, or in 78 schools out of 109, as well as in 3 Girls' schools.

67. The following are those in which there are more than 15 pupils in the Middle department, and which may therefore be regarded as the most advanced. Davangere 40; Hassan 33; Tarikere 23; Mysore, Talkad Narasipur and Sidlaghatta 22 each; Nanjangúd 20; Malvalli and Turuvekere 17; Belur 16; Dodballapur and Chitaldroog 15; Mysore Hindustani school 17. Altogether there are 672 pupils in the Middle classes of Taluk schools, and 6,532 in the Primary classes.

68. But as an illustration of the way in which the Taluk schools are developing, the following list of those with 100 or more pupils may be given:—

Kannada.					
Davangere	..	..	333	Birur	 107
Mysore	..	..	280	Malvalli	 103
Harihara	..	..	160	Tarikere	 102
Hassan	..	..	154	Shikarpur	 101
Dodballapur	..	..	149	Closepet	 100
Nanjangúd	..	..	141		
Holenarsipur	..	..	133	*Hindustani.*	
Nyamti	..	..	133	Channapatna	 162
Koratagere	..	..	107	Mysore	 117
				Hassan	.. 107

69. I think it will be admitted that these are large schools. There are, besides, 3 with over 90, 8 with over 80, 9 with over 70, and so on. Viewed as a whole therefore, the Taluk schools are in a prosperous and improving condition. The main work to be done, besides bringing the attendance at each school, if possible, up to the minimum of 100, is to raise all to a settled Middle school standard. But there are difficulties in doing this, arising from the apathy of the parents and their desire to utilize their children's services as soon as possible in saving or adding to the family income. The report from one Circle is, "The Deputy Inspector may preach to them like a missionary about the advantages that they would derive by continuing their study until they reach the appointed goal, but any amount of preaching would in most cases go for nothing."

70. *Aided.*—To the English High schools which appeared in last year's Report has now to be added Mari Mallappa's School at Mysore, which has since received a grant. This school was founded with an endowment from the estate of the late Gurikar whose name it bears, and is primarily intended for Sivachar boys, a certain number of whom are boarded and receive education in it free. The management is in the hands of a Native Committee.

71. In the other long established schools no changes of importance have occurred. All continue in the same able hands as for several years past, with the exception of St. Joseph's, where the Reverend C. Combal has succeeded the Reverend A. M. Clemot, M. A. In connection with the London Mission High School, a large hall has been erected, in which lectures on religious and scientific topics are delivered to educated Hindus. At Bishop Cotton's an industrial class has been formed, which will be further described under Special education. With regard to this school and St. Andrew's, and more especially the latter, the great decline in the number of boarders calls for remark. At the time of inspection there were only 4 boarders in St. Andrew's Boys' school, though 20 in the Girls: at Bishop Cotton's there were 19 boys and 11 girls. The reduction is attributed to the reception by private families of boarders on lower terms than are charged by the schools.

72. The Vernacular High schools are the Sanskrit schools at Mysore, Melkote, Muttur and Chikballapur, all of which are doing excellent work.

73. The Middle schools were fully reported on last year. The Broadway School, Bangalore, has improved and now finds a place among them. The Sanskrit schools at Shimoga, Turuvekere and Kankanhalli, newly aided, are also additional. The Wesleyan schools in the Pettah Main Street, Bangalore, and at Shimoga have advanced to the Middle standard. On the other hand, of the Wesleyan schools around Tumkúr, those at Hebbur, Hosahalli, Kadaba and Kallur have fallen to Primary schools, as also the Mandipet Girls' school, Mysore. As the London Mission School at Anekal continued to deteriorate, the long projected Taluk school has at length been established there with good prospects.

V. PRIMARY EDUCATION.

74. The Primary Schools have risen to 907 with 38,296 pupils, as compared with 892 last year having 32,679. The fees amounted to Rs. 7,680 in Government schools and Rs. 14,232 in Aided schools, against Rs. 6,534 and Rs. 14,578 respectively last year. The falling off in the latter is in Girls' schools, especially English.

75. The following is a detailed list of schools and pupils for 1880—81 :—

Primary Schools.		Government.		Aided.	
		Schools.	Pupils.	Schools.	Pupils.
Boys	English	13	526	19	1,575
Do	Vernacular	761	29,523	62	3,595
Girls	English	...	...	6	261
Do	Vernacular	11	494	35	2,322
	Total.....	785	30,543	122	7,753

76. Of the whole number of pupils, 4,910 are in the Upper Primary school and 33,386 in the Lower Primary. The number who passed the Upper Primary examination during the year was 2,560, and 12,273 the Lower Primary.

Primary Schools.

77. *Government.*—These consist of the schools noted in the margin. Of those in taluks an account has already been given under Middle schools. The Hobli and Girls' schools more especially demand notice here.

	Schools.	Pupils.
English	13	526
Kannada, Taluk	75	5,138
Do Hobli	652	22,991
Telugu	7	170
Hindustani	27	1,224
Girls' Kannada	11	494

78. The Hobli schools show an increase of attendance from 18,718 to 22,991, being at the rate of almost 23 per cent, or double that of last year. The number of schools is 652, but there are also 79 Branch schools not separately reckoned. The following is the distribution :—

District.	Schools.	Pupils.	Average.
Bangalore	98	3,575	36·4
Kolar	104	3,582	34·4
Tumkur	71	2,494	35·1
Mysore	114	3,961	34·7
Hassan	73	2,484	34·0
Shimoga	79	2,892	35·3
Kadur	52	1,546	29·7
Chitaldroog	61	2,457	40·2
Total.....	652	22,991	35·2

79. The above figures are a sufficient evidence of the popularity of the schools. The testimony from each Circle is to the same effect. The Deputy Inspector North remarks on "the ardent desire on the part of the agriculturists to get their boys educated." The Deputy Inspector West mentions how "villagers in the Honnali and Shikarpur Taluks came to him while examining Taluk schools and begged him to go with them and satisfy himself as to the fitness of their villages for schools." The Deputy Inspector South notices "the progress these schools are making with rapid strides. Fresh applications are being almost daily received for more schools from the rural population." The Deputy Inspector East states that "these schools have awakened much interest in education among the rural population" and adds "that the industrial classes desire instruction in agriculture and mechanics."

80. The largest schools are those at Belagutti with 133 pupils, and Tyamagondal with 105. There are besides 4 schools with over 90, 3 with over 80, 7 with over 70, 17 with over 60, and 44 with over 50.

81. The Girls' schools, though fewer by one, that at Magadi, which was closed, show an increase of attendance from 444 to 494, while the fees have risen from Rs. 13 to Rs. 34. There are, besides, 249 girls in Taluk schools and 352 in the Hobli schools. There is no doubt the Girls' schools are doing a good work, and several interesting applications have been received for new ones. Efforts are being made to provide instruction in needlework.

82. The Deputy Inspector East says "These schools have proved to be an element of beneficence for the social advancement of the Hindus. The parents desire instruction for their daughters, and the girls taught in them are exerting a healthy influence in their families. They try not only to know what is right but why it is right; and they aspire to understand their duties and to perform them well."

83. *Aided.*—The list in the margin gives the details of the Aided Primary schools. The number is the same as last year, with the addition of 3 Kannada Girls' schools, those of the Wesleyan Mission at Davangere and Kyatasandra and one of the London Mission at Malur. In the total attendance there is a general increase from 7,185 to 7,753. The fees realized amount to Rs. 14,232 against Rs. 14,578 last year or about the same; but while in Boys' Vernacular schools the total has risen threefold, on the other hand in Girls' English schools it has diminished to one-third.

	Boys.		Girls.	
	Schools.	Pupils.	Schools.	Pupils.
English	19	1,575	6	261
Kannada	21	1,547	26	1,746
Tamil and Telugu	6	567	7	424
Hindustani	24	1,100	2	152
Sanskrit	11	381	0	0
	81	5,170	41	2,583

84. The various schools included in the above list were described in last year's Report. Of those for boys, St. John's and the Ordnance school are in a very low con

dition; also the Blackpalli and St. Paul's schools. Most of the others are doing well, and a few which were not satisfactory have made improvement. The schools for girls are nearly all making progress, especially the Mission schools, both London and Wesleyan. Also the excellent Tamil and Telugu schools under Native management in Bangalore. The Hindustani Girls' schools are likewise reported to have improved.

VI. SPECIAL OR TECHNICAL TRAINING.

85. In this department several important changes have been made, and in addition to the institutions reported on last year, there are now a Botanical School, a Medical School, and another Jail School at Kukarahalli. Altogether there are 10 with 1,145 pupils against 7 last year with 992.

86. *School of Engineering.*—At the beginning of the year there were 6 students, all in the 2nd class of the Lower Department. A final examination of them was held in June, by a Committee with Major Bowen, R. E., as President. The results reported were very unsatisfactory. Only 2 students, as noted in the margin, were passed, and these have been appointed on probation to the Department Public Works as Sub-Overseers. The remaining four students who did not pass may probably hereafter find lower appointments in the grade of Taluk Mestris or Foresters, but no guarantee is given to them.

Nagaratnam.
W. R. Wright.

87. The re-constitution of this school on a different basis was effected by Government orders of the 17th of August, from which the following are extracts:—

"The difficulty of continuing the system of guarantee of appointments owing to approaching changes in the Administration and the uncertain demands of the public service, the very small number of students who, notwithstanding such guarantee, presented themselves for instruction in the higher course of engineering, and the consequent extreme costliness of the institution, have necessitated the abolition of the Bangalore School of Engineering on a collegiate scale; and it now becomes necessary to provide facilities for such of the youths of the Province as may desire to graduate in engineering in the colleges elsewhere, and also to establish a local school on a lower scale for giving instruction of the standard required for Overseers, Sub-Overseers and Taluk Mestris in the Public Works Department, and for subordinates in the Survey Departments. The Chief Commissioner resolves to issue the following instructions on the subject.

88. "A limited number of scholarships of 25 Rs. each per month will be provided from the Provincial Funds to aid deserving young men in the Province who may desire to graduate in engineering in the College at Poona, Madras or Calcutta. Four scholarships will be thrown open in the current year, and two more every year hereafter. The Heads of schools and the Deputy Commissioners of the Districts may send up, through the Director of Public Instruction, the names of any applicants who may possess the necessary educational qualifications, and who, by their intelligence, character and active habits, may give promise of turning out useful Engineers. The scholarship will be tenable for the period required to complete the course prescribed, subject to periodical reports of good conduct and progress from the Head of the institution. No guarantee can be given for employment in Mysore or elsewhere, though preference would be given to those who had distinguished themselves at College in the selection for appointments in the Province.

89. "The local School for Engineering will provide instruction up to the standard required for Overseers in the Public Works Department, embracing also the knowledge necessary for subordinates in the Revenue and Topographical Survey Departments. Admission to the school will be open to all students who have matriculated, or have studied for a year in a Matriculation class. The school fee will be fixed at Rs. 2 per month. A limited number of scholarships of 8 Rs. per mensem each will be provided out of the Local Funds of each District, 3 for each of the Districts of Bangalore, Mysore and Shimoga and 1 for each of the remaining five Districts, or 14 scholarships in all. The Deputy Commissioners should, in consultation with the

Head Masters of the District schools, select deserving students and send them on such scholarships to the school at Bangalore, where they will moreover be admitted free. Any other poor and deserving students may also be excused the school fee at the discretion of the Director of Public Instruction.

90. "Should the Superintending Engineer consider that any of the existing Taluk Mestris will be better for some training in the school, arrangements should be made for admitting them and giving them the necessary instruction.

91. "No guarantee of appointments will be given, but the Heads of Departments will be required to give preference in filling up appointments to those who pass out of the local school and who may be found deserving. Not only is there a large field of employment for these men in the subordinate grades of the Public Works Department, as well as in the Revenue Survey and Topographical Survey establishments, but the possession of such technical qualifications will count in their favor in the filling up of appointments also in the Revenue Department of the Districts and Taluks. There should be no lack of inducement therefore to attract intelligent youths in the Province.

92. "The Chief Commissioner would further wish to make arrangements for efficient instruction in other branches of practical science, such as are likely to be useful to the students in their after life. The University course, it is believed, now embraces Chemistry, Physiology and Physical Geography in the lower classes, but instruction in such subjects by masters who have not thoroughly studied them cannot be very valuable or sound. If the services of a European or Native well versed in these subjects, as well as in other kindred branches of knowledge, *viz*, Vegetable Physiology, and Botany, Geology and Meteorology, could be secured, he may with much practical advantage be employed as an itinerant teacher giving a course of lectures in the above subjects for a certain portion of the year in each of the three principal schools in the Province, at which both the students at the schools and any others anxious to learn may attend on payment of such fee as may be prescribed".

93. To the School of Engineering thus formed, Mr. Standish Lee was appointed as Head Master, for the special purpose of giving instruction in Practical Engineering on three days in the week for three hours each day. The remaining subjects of study are entrusted to the Assistant Master, C. A. Mahadeva Shastri, B. A., B. C. E.

94. The following is the course of study resolved upon, to occupy a space of two years :—

I. Mathematics.

Arithmetic—the whole, with account keeping.
Geometry—Euclid, Books I to IV.
Algebra—to Quadratic Equations.
Mensuration, including calculations in the square measure of acres, guntas and annas, as required in the Revenue Survey.
Plane Trigonometry.

II. Surveying and Levelling.

Surveying with chain and cross staff (chains to be 33 feet in length).
Do with prismatic compass and chain.
Plotting the surveys and drawing plans.
Taking levels, keeping field book and plotting sections.

III. Engineering.

Elements of Mechanics, Hydrostatics and Practical Hydraulics.
Building materials and construction of Buildings.
Roads, Irrigation and Earth works.

IV. Drawing and Estimating.

95. The School now consists of 2 classes. In the Overseers' class there are 22 students, of whom 11 are scholars, 7 free and 4 paying fees. In the Lower Subordinates' class there are 6 students, of whom 3 are scholars and 3 free. At the quarterly examination of March, 8 of the 22 in the Overseers' class obtained more than half the maximum marks.

96. Mr. Lee remarks that "the local Engineering and Forest services, for which alone the students are under training, are likely to absorb but a few annually. Hence it is not advisable to admit too large a number to the school. But if the standard for admission in future be raised to Matriculation, the numbers will be reduced, and the time now spent in mathematical studies be available for practical work in a Workshop, which should be attached to the school."

97. *Botanical Classes.*—To supply the place of the special instruction for Forest students previously given in the School of Engineering and Natural Science, arrangements were made for Mr. J. Cameron, F. L. S., Superintendent of the Lal Bagh, to deliver three lectures a week on the subjects of Botany, Vegetable Physiology and Practical Gardening. The fee for admission was fixed at Rs. 2 a month to the public in general, and at R. 1 a month to students and masters from Government and Aided schools. The lectures were at first given in the Lal Bagh at 7 A. M., but subsequently it was found more convenient to alter the hour for the lectures on Botany and Vegetable Physiology to 4. 30 P. M. and to deliver them in the Central College.

98. The following is the syllabus of the lectures:—

BOTANY.

I. Definitions and Descriptive Botany.—1. The plant in general. 2. The root. 3. The stock. 4. The stem. 5. The leaves. 6. Scales, bracts, and stipules. 7. Inflorescence. 8. The flower in general. 9. The calyx and corolla or perianth. 10. The stamens. 11. The pistil. 12. The fruit. 13. The seed. 14. Accessory organs.

II. Classification or Systematic Botany.—1. The classes and sub-classes. 2. Divisions. 3. Natural orders or families. 4. Genera. 5. Species. 6. Varieties.

III. Economic Botany.—Plants yielding—1. Food. 2. Fibre. 3. Dyes. 4. Medicine. 5. Oils. 6. Timber. 7. Starch, &c. 8. Plants of scenic value.

IV. Geographical Botany.—1. Indigenous plants. 2. Foreign plants. 3 Acclimatization of plants.

VEGETABLE PHYSIOLOGY.

I. Structure and growth of the elementary tissues.
II. Arrangement of the elementary tissues, or structure of the organs of plants.
III. Growth of the organs.
IV. Functions of the organs.
V. Functions of flowers.
VI. Influence of temperature, electricity and light on plants.

PRACTICAL GARDENING.

1. The quality of soils and manures.
2. The rotation of crops
3. The season of cropping.
4. The propagation of plants.
5. The culture of fruit trees.
6. The culture of vegetables.
7. The culture of flowers, &c.

99. There were 25 in attendance on the lectures at the close of the year, of whom 21 were students from Colleges and Schools, and 4 private students. Mr. Cameron reports as follows on the work done: "Although the progress in working of the class has been interrupted once or twice owing to a number of students not being able to join from the beginning, and to the frequency of holidays, still I am convinced that the students are taking a real interest in this branch of learning, and some have shown an aptitude which is very hopeful. In the elementary course of Botany we have finished Morphology or the practical investigation of external organs; and in Systematic Botany the classification of divisions has been fully explained, as also the natural orders of Thalamiflora. Treating on Vegetable Physiology the internal position of organs and their various functions are now fairly well understood. Under Practical Gardening we have studied the origin and quality of soils and manures, the rotation of crops, season of cropping and the propagation of plants. Numerous specimens have been provided for each morning's lessons, and with these before them, the students have realized the organography of plants with greater ease than they could ever possibly have done by the book alone."

100. *Medical School.*—The formation of the Medical School was directed in Orders of the 16th of November, according to the following extracts: "As the course of instruction prescribed for the department of Natural Science in the Indian Universities is as yet in an experimental stage, the Chief Commissioner does not deem it expedient to appoint a separate Professor for that department in the Bangalore College. He considers that more useful results will be secured by establishing a local Medical School for training Medical subordinates of the lower grade, for whom there is a great demand in the Province. The Master appointed to this school can give instruction in the kindred subjects of Chemistry and Physiology—human and comparative—which are the most important subjects embraced in the Natural Science course, both to the students of the local College as well as to a limited number of outsiders desirous of availing themselves of the instruction.

101. "The arrangements for the Medical School will be similar to those recently prescribed for the Engineering School. For collegiate instruction in medicine in the Grant Medical College at Bombay or the Madras Medical College, 4 scholarships at Rs. 25 each per month will be at once thrown open from the Provincial Funds, and one more scholarship every year hereafter. The candidates for these scholarships should have passed at least the First-in-Arts examination in the University course, and should possess the necessary qualifications in regard to physical health, active habits and general intelligence and character. The scholarship will be tenable for 5 years, the period required to complete the course prescribed, subject to periodical reports of good conduct and progress from the Head of the institution.

102. "The local Medical School will provide a 3-years' course of instruction, to qualify for the lower grades of Medical subordinates. Admission to the school will be open only to students who have matriculated or have studied for a year in a matriculation class, and the school fee will be fixed at Rs. 2 per month. Eleven scholarships of Rs. 8 per month will be at once provided out of the Local Funds, and a similar number will be thrown open to candidates every year hereafter, *viz.*, 2 in each of the larger Districts of Bangalore, Mysore and Shimoga, and one in each of the remaining five Districts. The scholarship students, and any other poor students who may be considered deserving, will be admitted free.

103. "The Deputy Commissioners should at once take steps to select and send out the scholarship-students from their respective Districts, taking care to satisfy themselves in communication with the local Medical authorities in regard to the aptitude of the candidates for the profession. The existing arrangements for sending medical pupils to Madras for instruction should cease as soon as possible, due regard being had to the cases of those who are now studying at Madras."

104. The Medical School has been established in connection with the Bangalore Pettah Hospital, under Mr. D. A. Choksi, Licentiate of Medicine and Surgery, of the Grant Medical College, Bombay.

105. The following further Orders regarding it were issued on the 25th of January:—"The object of the Medical School is not simply to train up a certain number of Medical subordinates for Government employment, but to throw open medical instruction to the public at large, leaving the selection for Government service to be made out of passed candidates as required from time to time, but not pledging the Government to any guarantees in respect to appointments.

106. "The School will be under the control and supervision of the Surgeon to the Commission, or of any other senior Medical Officer who may be appointed. This officer will regulate the course of instruction, make periodical inspections, direct the examinations and exercise such other control over the conduct of the masters and the pupils as may be required, whilst the financial control of the school will rest in the Director of Public Instruction, through whom the periodical progress reports should also be submitted.

107. "There should be no needless restriction on the admissions to the school. The students sent to the school on scholarships from the Local Funds of the several Districts will be selected by the respective Deputy Commissioners from the local schools with reference to their educational attainments, character and general promise. The Deputy Commissioners have been directed to consult the local Medical officers

with regard to the physical fitness of the candidates selected before sending them up to the school. Formal medical certificates of fitness would only be requisite in case of contemplated appointment to the public service.

108. " In regard to the admission of other paying and free students, the certificates of the Head Masters of the schools from which they come, as to their educational attainments and general character, will suffice ; but the total number of admissions in each year will require to be restricted to the number, say 20 or 24, which the school can accommodate. A minimum age, say 17 or 18, may also be prescribed. Students who show no aptitude for medical study, or whose conduct and character are unsatisfactory, may of course be sent out of the school at any time by the supervising Medical Officer on a report from the Head Master.

109. "Having regard to the object of the school, it is not desirable to insist on the rule that the students should, before admission, serve 9 months or a year in a Hospital, as any such restriction might deter the superior classes, whom it is desirable to attract, from taking advantage of the school ; but it is hoped that arrangements may be made for the students attending, in the first year of their course, one of the Hospitals in Bangalore, for a certain time out of school hours. And as higher educational qualifications are required of them than was the case hitherto with the Medical pupils, they ought to be able to complete the course required for Civil Apothecaries in three years' time. No special knowledge of the vernaculars, other than what is embraced in their ordinary school studies, need be required."

110. The curriculum adopted has been made to correspond as nearly as practicable with that prescribed for Civil Apothecaries in Madras. The following are the arrangements:—

1st year.—*Winter session.*—October-March. 6 months.
Anatomy. Descriptive.
Materia Medica, Pharmacy and Therapeutics.

Do. —*Summer session.*—June-August. 3 months:
Botany.
Chemistry and Natural Science.
Pharmacy.
Dissections.

2nd year.—6 months.
Physiology.
Surgery, Systematic.
Anatomy, Dissections or Models; Hospital attendance.

Do. —3 months.
Hygiene, Vaccination, &c.
Pharmacy and Dispensing.
Clinical Surgery and Hospital attendance.

3rd year.—6 months.
Medicine and Clinical medicine.
Clinical Surgery.
Opthalmology.
Hospital attendance and Dispensary practice.

Do. —3 months.
Midwifery.
Medical Jurisprudence.
Clinical medicine.

111. The year closes with 14 students in attendance. Mr. Choksi reports "with respect to the students now under instruction, I have only to say that, although most of them evince zeal and interest in their studies, they are very slow, often unable to understand and follow their Lecturer, which I attribute to insufficient previous education. I hope, however, that in time, when they will be habituated to medical education with its numerous technicalities, they will be able to understand better what is taught to them."

112. *Normal School.*—Under this head there is unfortunately nothing to report. The re-opening of the institution is very urgently required and proposals to this effect have been submitted.

113. *Jail Schools.*—The Jail schools, with the number of convicts under instruction in each at the end of the year, are shown in the margin. From the Jail Administration Report it appears that, of the daily average Jail population of 2271·824 males and 89·542 females, 921·057 males and 26·50 females were daily under instruction. Female education was most attended to in the Central Jail at Bangalore.

	Males.	Females.
Central Jail	387	25
Juvenile Reformatory...	22	...
Mysore	297	...
Kukarhalli	95	...
Shimoga	146	2
	947	27.

114. Of the convicts under instruction, 1,268 males and 13 females were released during the year. When admitted into Jail, 158 of them were able to read and write well, and 116 to read and write a little. But when released, so many as 252 knew how to read and write well, and 442 were able to read and write a little."

115. An Industrial Class has been opened at Bishop Cotton's School with the view of preparing boys for the Telegraph Department. The pupils are drafted from the Cantonment Orphanage and from the boys supported by the Eurasian Association and the Anglo Indian Aid Association. The number in class at the end of the year was 26.

116. The Aided Literary and Scientific Institute has received a large accession of members during the year, the number having risen from 42 to 104. A series of lectures on scientific and useful topics, delivered chiefly by members, attracted full audiences. A fund, though as yet inadequate for the purpose, has been secured for the erection of suitable premises, which are much needed.

VII. SCHOLARSHIPS.

117. *General.*—An amount of Rs. 1,573 was expended during the year on scholarships for general instruction in the three Government Colleges. This provided 51 scholarships as per list below, at rates ranging from Rs. 2½ to 5, of which 18 were held in the Central College, 27 in the Maha Raja's College, and 6 in the Shimoga College :—

		Number.	Amount.
College students ..	Senior B. A. Class ..	4	230
	Junior „ „ ..	4	192
	Senior F. A. „ ..	12	420
	Junior „ „ ..	15	503
High School „ ..	Matriculation „ ..	16	228

118. *Special.*—For the Engineering and Medical scholarships offered in the regulations quoted in the preceding section, especially the former, there was a keen competition. Those for collegiate instruction have been filled up by selection of the most promising candidates who *bonâ fide* belong to the Mysore country, three such who were already found to be in Presidency Colleges being also admitted to the benefit. The first of those who obtained an Engineering scholarship (N. Cheluvaiengar) resigned it for personal reasons : but the vacancy has since been filled up.

119. The following are details of the holders of scholarships and the Colleges in which they are studying :—

Engineering—

Jayasimha Rao	College of Science,	Poona.
Anandatirtha Rao	Do	do
Visvesvaraiya, B. A.. ..	Do	do
Halagaiya Gauda	Do	do
Bhimsen Rao	Do	do

Medical—

Achyuta Rao	Grant Medical College,	Bombay.
Armugam Mudaliar ..	Medical College,	Madras.
Ramaswamaiengar ..	Do	do
M. Rangachari, B. A. ..	Do	do

The first two on the Engineering list, and the first on the Medical, being at College before the recent regulations were made, have been granted Rs. 15 a month; the others receive Rs. 25. The three candidates for the Madras Medical College are attending the local Medical School, receiving half the stipends, until the time for admission to the College arrives.

120. The District scholarships have been disposed of to the following extent, in communication with the Deputy Commissioners: —

District.	*Engineering.*	*Medical.*
Bangalore	3	2
Kolar	1	1
Tumkúr	1	..
Mysore	3	..
Hassan	1	1
Shimoga	3	1
Kadur	1	1
Chitaldroog	1	..
	14	6

121. The private scholarships described in last year's report continue in force. But it is my pleasing duty to bring to prominent notice a special scholarship of Rs. 25 a month granted by Mr. Krishna Múrti, B. L., Jaghirdar of Yelandur, the Deputy Commissioner of Hassan, to a student who matriculated this year from the Hassan High School, to enable him to study at the Agricultural College, Madras, with a view to obtaining a certificate of qualification.

VIII. EMPLOYMENT OF STUDENTS IN THE PUBLIC SERVICE.

122. The foregoing sections will show what arrangements have been made for providing the Mysore State with well trained professional men. Those of that class who have hitherto entered the Public Works and Forest Departments are, it is believed, giving general satisfaction.

123. All ranks of the public service are recruited from students who have passed qualifying examinations, and for this purpose a considerable number present themselves here for the Special Tests of the Madras Uncovenanted Civil Service examinations.

124. During the past year the most valuable services have been rendered by masters and pupils of Government schools in connection with the Census. It may be said that with scarcely an exception the whole of the masters of Taluk and Hobil schools, with a large number of the senior pupils, were employed for several weeks in January and February as Supervisors and Enumerators. And since that time, a very considerable number of the best hands have been retained for tabulation of the Census results, with the prospect of being engaged in the work for some time. From one District it is reported that none but members of the Educational Department have been found competent to do the work.

IX. BOOKS.

125. The value of the books in stock at the end of the year in the Central and Branch Depôts was Rs. 75,308. During the year 47,421 were added at a cost of Rs. 16,027.

126. The Branch Depôts were supplied with 30,292 books, valued at Rs. 7,580. By the sales of school books an amount of Rs. 18,773 was realized and paid into Government Treasuries, being an increase of Rs. 4,500 over the amount of the sales in the previous year.

127. The following local publications were purchased for the Department :—

800	Anglo-Canarese First Reader.
700	Do. Second do.
2,000	Amarakosha, 1st Kanda.
500	Padya Sara Prakasika.
200	Manual of Cattle Disease (Kan.)
150	Múla Amara, 3rd Kanda.
100	Jaimini Bharata.
125	Morris' History of India (Kan.)
500	Telugu First Book.
300	Do. Second do.
200	Do. Third do.
60	Do. Grammar.
75	Tika Amara.
2,000	Hindustani First Book.
200	Hikayat Latifa.
100	Tálim Náma.
50	Khavayad-e-Farsi.
25	English-Hindustani Dictionary.

128. The following school books were printed for the Department :—

1,000	Sanitary Primer, English and Kannada.
10,000	First Book, Kannada.

129. Several vernacular works, prepared by competent scholars in the Educational Department or private persons, have been offered to me for publication or for patronage. I regret that no special provision exists for this purpose. Among other works thus offered are an Algebra in Kannada, translation of Money Matters, a classified Dictionary Sanskrit-Kannada, a History of India in Kannada, translation of the Chemistry Primer, Key to Anka Ganita, a Sanskrit Grammar, and others.

130. I have myself several important old manuscript works ready for the press, the publication of which would be invaluable for the study of the language of this country. Some facilities for promoting the local literature, whether by compositions, translations or editing of deserving works, would prove a great stimulus to the learned classes. The formation of a Standing Committee to consider some of these questions has been proposed, in connection with a recent Resolution of the Government of India.

131. From the Annual Report on publications in 1880, separately submitted by me as usual, it appears that 43 works were registered, a great advance on the preceding three years. There were 5 in English, 25 in the local vernaculars, 7 in Sanskrit and 6 in diglott. Of those in the vernaculars, 22 were in Kannada, 1 in Telugu and 2 in Hindustani. The diglotts were 1 in Kannada and English, 3 in Sanskrit and Kannada, and 2 in Arabic and Hindustani.

132. Classified according to subjects, there were 11 works on Religion, 8 each under the head of Language and Law, 5 Dramatic, 4 Philosophical, 3 Fiction, 2 Poetical, 1 Political and 1 Mathematical.

BANGALORE,
25*th June* 1881.

L. RICE,
Director of Public Instruction,
Mysore and Coorg.
